

his earliest yrs. has had a predilection for caricature. He first devoted himself to newspaper illustrating about 13 yrs. ago, during which time he exercised both pen and pencil, much of his paragraphing finding a market among the comic weeklies in the U. S. Several yrs. were spent in the Can. West, studying Indian life and the picturesque of the plains, and his reproductions of native life found ready sale both there and in the east. The last 3 or 4 yrs. have been devoted to caricature exclusively, during which time this work has been a feature of many of the leading Can. dailies. At present Mr. H.'s time is occupied in producing cartoons for the *Toronto World*, and very often he has produced 12 to 17 political caricatures a week, a record which perhaps few cartoonists have yet essayed for any length of time. Such a strain requires relaxation, however, and July and August of each year are spent in camping out, fishing, exploring and roughing it generally among the northern lakes. He is a firm believer in the possibilities of Can., and desires to see it occupy the position of a nation in the near future. He m.
