

FALLS THAT ARE GREATER THAN NIAGARA

Victoria Falls, and the Devil's Cataract—These Greater-than-Niagara Falls are on the Zambesi River in South Africa. A proposition is on foot to harness them as Niagara is harnessed, and to supply power to the Witwatersrand. The Falls are 1860 yards in breadth and 400 feet high as compared with 1350 yards and 167 feet for Niagara. A railway now runs from Durban directly past these Falls.
