ONTARIO

CARLETON CO., ONT.

OTTAWA.—Money is reported scarce among the farmers of Eastern Ontario. The prospects for plenty of grass and a good cutting of hay are very bright in the Ottawa Valley.—J. G. R.

HASTINGS CO., ONT.

SIDNEY CROSSING.—Pasture is excellent. It was never better. Crops are excellent. Fall wheat generally is good; clover is badly hurt, a great deal will have to be plowed up. Spring has been a disappointment to every one; heavy rains have kept the grounds wet and soggy, and the grain is in very poor condition. Some farmers are speaking of sowing seed early, but generally speaking seed is very late. What is left this week will be planted or sown to buckwheat. Timothy hay, \$15 a ton; mixed, \$15 a ton; oats, 60c to 65c a bush; barley, 80c a bush; peas, 80c a bush; bran, 80c a bush; middlings, 85c. Fresh eggs, 30c a dozen; creamery butter, 25c to 28c a lb.; potatoes, \$1 to \$1.25 a bag; milk cows, \$40 to \$75; calves, \$2 to \$10.—J. K.

NORTHUMPTON CO., ONT.

EDVILLE.—The new season to have wintered. Some farmers keep quite a number of colonies. Frequently it is quite difficult to bring them out of their winter quarters without serious loss. In some instances, in years past, upwards of a hundred colonies have been lost by individuals. In a single winter, a single colony is thought to be quite necessary in an apple country like ours in order to make blossom produce apples. It is that is so, but very much needed this year as our fruit trees have blossomed most profusely.—H.

VICTORIA CO., ONT.

HARTLEY.—The fall wheat as well as clover have a very good appearance, although not as good as when the snow first appeared. The spring wheat is better and an occasional shower it would make a good showing in a short time. Feed is getting pretty scarce, with the majority of farmers but stock in general will come through the winter reasonably well.—W. M. H.

WATERLOO CO., ONT.

AYR.—May has passed and with it have the cool weather has been a remarkable month on account of the continued cool weather with considerable rain, which greatly delays seeding operations. Winter wheat is growing rapidly. Taking the district as a whole, it is a good crop, although some report that there is winter-killed. The pasture and hay are looking well and with sufficient moisture during June they promise a bumper crop. A greater acreage of manure is being sown on account of the ravages of the turnip leaf last fall. There are numerous silos going up this summer, nearly all of cement. The scarcity of fodder last winter is largely responsible for this increase in numbers. Most of the fat cattle have gone from the stables, the price bringing most by between 5 and 6 cents a lb. Wheat is quoted at \$1.30 at the local mill.—O. C. S.

MIDDLESEX CO., ONT.

LAMBETH.—The milk business is carried on quite extensively around Lambeth. Much milk is shipped to London on the trolleys. The factories at Scottville, Delara and White Oak each have a route and all get a good supply of milk. Many of the farmers are building up their herds and increasing their output by securing either grade or something better in the Holstein line. They are also preparing winter quarters for their stock, and it was told that from one place 312 bars were counted that were undergoing repairs in different ways. The poultry business is flourishing also, and some splendid broods of different varieties are seen happily moving around.—J. E. O.

ELGIN CO., ONT.

AYLMER.—We are now putting manure on all our new seeding. We think we get the best results from manure there than from any other place. After we get the fields covered, we put the balance on the fields where we think it most required.—E. L.

MURON CO., ONT.

GOBERG.—Seeding is practically completed. A spring has passed that has long remembered. The warm weather lately has brought the grain up rapidly.

and has given some encouragement to the farmers. They are now preparing for roots and corn. Considerable corn is grown for the silo and the acreage is expected to be on the increase. The meadows continue to do well, especially the clover, which is better than it has been for years. Fall wheat generally is thriving well, although an old field has been plowed up. Pastures are lustrant and the dairy cows are showing it.—D. G. S.

BRUCE CO., ONT.

CLUNY.—New meadows that were rather thin have thickened up greatly. Fall sown wheat with barley. Those engaged in pairing ground for fodder purposes are preparing ground for corn. Others are manuring sod and plowing the sod and manure down. We like to sow the corn about the first of June, if the weather is dry and warm.—J. M.

MANITOBA

MACDONALD DISTRICT, MAN.

DIACOTAI.—Wheat seeding in this locality is finished. Wheat went into the ground in excellent shape and the first seeding is coming up well. Feed of all kinds commands a high price; prairie hay (pressed) \$10 a ton on car; oats from 60c to 65c a bush. Ground truck of all kinds is exceptionally late this year.—H. D.
