NOTES.

Archibald & Shea, Winnipeg, Man., who have been in business as plumbers for some time past, have now bought out the business of J. C. Orr & Co., on William avenue, and will largely increase their operations.

The Dominion Office & Store Fittings Company, London, Ont., are erecting a new factory on Dundas street two blocks east of the Fair grounds. This factory will be a 2-story building and equipped in the most modern fashion, slow burning mill construction throughout. The first story is almost completed and the company expect the factory to be running by the first of October. The company are devoting themselves specially to interior fittings and with the increased facilities the new factory will afford,

they expect to do one of the largest trades in this line in the Dominion.

Contracts have been closed and work is now under way on what will be the most notable series of reinforced concrete buildings in Montreal. The American Tobacco Company, Limited, for whom the factories are being erected, demanded speed in construction and selected as the builders the Dominion Engineering and Construction Company, Limited, of Montreal. All the work is being done on the Glibreth System and the cost-plus-a-fixed-sum contract. The architects, Messrs. Findlay & McGregor, declare that the plant when completed will be a model of its kind in Canada. The plans call for many novel effects and also for the completion of the whole in five months.
