

AMUSEMENT FOR CHRISTMAS TIME FOR THE YOUNG.

POTATO PANTOMIMES.

"Potato Pantomimes" may be old as the hills, but I confess not to have heard or seen them until quite lately. So perhaps you have not. Take a good-sized potato with a smooth skin; twist curled horse-hair into the shape of a wig and whiskers or moustache, and fasten on with pins; then make a hole for the forefinger to go into; this gives the head a throat. Wrap a bit of cloth, a handkerchief or what-not round the hand, arranging one corner of it around the second finger. Then you have a little man with hands and arms, capable of bowing and moving his head. Make a screen, let four or five youngsters be behind it, each with their potato characters, and as they say the words of the charade, burlesque or tragedy, let these potato men perform. It is capital fun, and beats Punch and Judy out of the field. Punch and Judy is a brutal performance at best. Potato Men have amiable dispositions. They are generally friends, fond of shaking hands, embracing, and nodding their heads cordially at each other. They also have a thoughtful way of rubbing their foreheads that is very funny. Sometimes they fight, I admit, but they don't bang each other all the time as Punch and Judy. Try them.

MARK TWAIN'S FARMING.—In July Galaxy, Mark Twain gives an account of a disagreement he had with the editor of an agricultural journal, who, Twain complains, called his contributions "a disgrace to journalism," because he did not make a proper distinction between a harrow and a furrow, because he wrote of the moulting season for cows, because he recommended the domestication of the polecat on account of its playfulness, and its excellence as a ratter. He then gives some extracts from his contributions, from which we extract a few sentences:—

Turnips should never be pulled; it injures them. It is much better to send a boy up and let him shake the tree.

The guano is a fine bird, but great care is necessary in rearing it. It should not be imported earlier than June or later than September. In the winter it should be kept in a warm place, where it can hatch out its young.

It is evident that we will have a backward season for grain. Therefore it will be well for the farmers to begin setting out his cornstalks and planting his buckwheat cakes in July instead of August.

Concerning the pumpkin—this berry is a favorite with the natives of the interior of New England, who prefer it to the gooseberry for the making of fruit-cake, and who likewise give it the preference over the raspberry for feeding cows, as being more filling and fully as satisfying. The pumpkin is the only esculent of the orange family who will thrive in the north, except the gourd and two varieties of the squash. But the custom of planting it in the front yard with the shrubbery is fast going out of vogue, for it is now generally conceded that the pumpkin, as a shade-tree, is a failure.

GENTLEMEN, having invented a CHEESE PRESS

That is now giving satisfaction to those using them, I now introduce it for general use. The advantage it possesses over the common press is, that in addition to the screw pressure, there is a constant steady pressure on the cheese, as the box, as shown in the engraving, is laden with stones. Thus, when the pressure of the screw slackens, as it invariably does by the settling of the curd, still the heavy weight continues, independent of the screw. The screws are made of either wood or iron, as preferred. The price of the single Press is \$6, with wooden screw; or \$9 with iron screw; in ranges of three complete sets for dairies, \$27, placed on board the cars.

N.B.—I will sell a few shop or county rights in distant parts of the Province, or allow them to be made on royalty. For circulars and rights apply to R. SHERWIN, Patentee, Ailsa Craig.

Interesting to Ladies.

In this rapid age it is absolutely necessary for Ladies to keep au courant of what is passing in the world around them.

For this purpose no medium is so good as a first-class magazine.

We recommend to Ladies, who desire one useful and sensible as well as fashionable, *Demorest's Illustrated Monthly*, as the very best parlor periodical that we know.

It is more complete in its departments than any other.

Its fashions are more unique, because they are authentic and original, and not blind copies of French and German models.

It gives with every number full-sized Patterns, which supply, during the year, all that any lady needs for the cutting of her own and her children's wardrobe.

It is always high-toned, and its contributors include some of the finest talent in the country.

Its Ladies' Club affords valuable and interesting information upon every subject.

It is the best magazine for the utilities and ornamentation of the household; the best magazine for floriculture, original music, architecture, and other topics interesting to ladies—all calculated to assist in making our homes attractive and happy.

It is the most enterprising of all magazines, and gives more than twice as much for the money.

It also offers a large and magnificent Parlor Steel Engraving, 28 by 35 inches, entitled "The Picnic on the Fourth of July," valued at \$10, to each subscriber as a premium.

The engraving is all done in line and stipple, from the original painting by Lillie M. Spencer, and besides the copyright, cost over \$7000, and is acknowledged by artists to be the most perfect and beautiful large engraving ever issued in the country. Certainly \$10 will not procure another that combines so much interest and beauty.

Or, it offers a fine Chromo, worth \$5, and other premiums, worth more than the cost of the magazine, to each subscriber, post free, and extraordinary premiums for clubs.

Subscription price \$3 per annum. Commence any time.

Single copies 25 cents. Specimen copies, with circulars, mailed free on receipt of 15 cents.
