You Will Not Find in my catalogue "store" seed, venerable with years, and greater travellers than Stanley; seed saved from the odds and ends of various crops; seed raised from unsalable onions, headless cabbages, sprangling carrots, or refuse beets. (*I am always happy to show my seed stock.*) But if you want Northern seed, honestly raised, home grown (not more than two other catalogues contain as many), seed warranted (see the cover), valuable novelties, some of which are to be found in no other, send for my vegetable and flower-seed catalogue for 1887, **FREE** to all. It contains 60 varieties of Beans, 43 of Peas, 41 of Cabbages, 53 of Melons, 44 of Corn, etc., etc., besides a large and choice variety of flower seed.
JAMES J. H. GREGORY, Marblehead, Mass.

The Cheapest Form of Wire Fencing.

I would draw the attention of my patrons to my cheapest form of Farm Fence, made with one or two barbed wires, and the balance my Samson Cable, manufactured from the best drawn steel. Wire, Nos. 11 or 12, twisted together to give elasticity. No. 12 weighs much less than barbed wire per rod, and is equally strong. No. 11, weighing about the same as barbed wire, is at least one-third stronger.

It may be put up as shown above, or a still better form would be to have the second wire from the top and the second from the bottom barbed, the remainder Samson Cable, which gives all the advantages of the ordinary barbed wire fence, much greater strength, vastly less risk of injury to stock, and for less money.

I will deliver Samson Cable to your nearest station, within 100 miles from the city of Hamilton, for 5 cents per pound.

Wire Stretchers for iron posts, 10 cents each; for wooden posts, 15 cents.

If you want any kind of Iron or Wire Fencing, address

E. C. JONES,
47 King William Street, HAMILTON, ONT.

Montreal. 255-c

**THE
Favorite Fence**

machine makes a stronger and better fence, at one-half the cost of any other fencing.

This is the best farm and general purpose fence in the market. Anyone with a small capital will find the FAVORITE a safe and profitable investment.

Awarded Diploma on fence made by this machine at Industrial Exhibition, 1886.

Send stamp for our new illustrated circular.

151 RIVER-ST., TORONTO, ONT. 256-a

HALL'S IMPROVED HAY CARRIER AND REVERSING CARRIER.—This engraving represents my New Reversing Carrier. By pulling down on draft rope it can be changed in a few minutes to pitch hay into opposite mow. It is made from best refined Malleable Iron and Steel, and guaranteed to give satisfaction if properly erected. Hundreds are in operation in all parts of the Dominion, and are giving universal satisfaction. I also make a Carrier for wood track, which is as good, if not better, than any in the market. It is also made from Malleable Iron, and warranted to give satisfaction; can be changed by simply changing end pulley. This is easily accomplished by using my Patent Pulley Hoister. The pulley can be placed in position in peak of barn without climbing, also lowered again, saving all the trouble of going aloft to change pulleys and Carrier, one set of pulleys being sufficient; no pulling of rope or changing ends, always using one end to draw by. This is a new feature in Hay Carriers. The Common Sense Sheaf Lifter can be furnished if required.

Liberal discounts to good agents—no others need apply, as we will not deal with any but good, responsible men. Send for circulars and prices.

Address—**THOS. HALL,**
IROQUOIS, ONT.
