RESPONSIBLE AGENTS WANTED

Circulars, Prices and Terms on application to M. T. BUCHANAN & CO., Ingersoll, Can.

## FARM LABORERS

Farmers desiring help for the coming season should apply at once to the Government Free Farm Labor Bureau, Write for application form to

Thos. Southworth Director of Colonization, Toronto.

Send for our list of Alberta farms for sale.

## Benson & Houlton, Calgary, Alta.

BOYS FOR FARM HELP The managers of Dr. Barnardo's Homes invite ap-The managers of Dr. Barnardo's Homes invite applications from farmers, or others, for the boys who are arriving periodically from England to be placed in this country. The young immigrants are mostly between 11 and 13 years of age; all will have passed through a period of training in Dr. Barnardo's English Institutions, and will have been carefully selected with a view to their moral and physical suitability for Canadian life. Full particulars as to the terms and conditions upon which the boys are placed may be obtained upon application to Mr. Alfred B. Owen, Agent Dr. Barnardo's Homes, 214 Farley Ave., Toronto.

Grow Mushrooms in spare time. A crop all year round. Anyone can grow them from our special spawn. Immense profit. Undersigned will buy your crop. For directions write to-day. Fungus Co., Tecumseh, London, Ont.

#### COSSIP.

THE FARM BULLETIN.

Saskarchewan men are after an agricultural college; a most encouraging sign that this Province recognizes the importance of high class agricultural education. Insurance investigations are causing con-

siderable interest. Policy-holders will be foolish who drop out on account of the testimony so far offered. We are glad to note that fraternal society insurance will also receive attention.

United States Farmers' Bulletin 239 treats of corrosion (eating away) of iron wire, and gives the following as the result of investigation: Iron wire, when it can be obtained, even at a large increase in price, is by far the cheapest. The life of a steel wire nail is six years. The life of the old-fashioned iron nail (and these can be had if the farmer will demand them) is forty years. The life of iron wire is from twenty to thirty years; the life of ordinary steel wire, from six to

Since April 15th, inst., personal application has to be made for homesteads in Western Canada. The Department of Interior, recognizing the abuses that have crept in through the old system, has been quick to make a change, with a view of remedying matters. The change will have several good effects, and is made in the interest of the actual settler. Another beneficial effect will be that it will tend to induce more careful selection by the new settler, and, as a result; of that selection, will result in greater satisfaction on his part. The idea of a system of purchase, with settlement duties, recently suggested in the Winnipeg Free Press, is, we think, modern, just, and in the interest of the country as a whole. It is right in line with a suggestion of a recent correspondent to this paper.

Mr. H. W. Truman, manager, London, Ont., branch of Truman's Pioneer Stud, writes: Amongst my most recent sales is that of the imported Shire stallion, Prince Charles of Warseley (19028), which I consider by odds the best Shire stallion ever imported to Canada. He has only been shown twice, viz., at the Iowa State Fair last fall, where he stood second to our noted winner, Blaisdon Albert, and at London, Ont., where he was considered by competent judges the best draft horse on the ground; however, he had to be again contented to stand next to Blaisdon Albert. Prince Charles of Warseley is a beautiful brown, with almost perfect conformation, has good, hard, sound feet nice quality of bone, and is a great all round actor. The purchasers, Messrs Johnson Bros., and Robt. Miller, of Rutherford, are to be congratulated on procuring this grand young horse, as I had refused several tempting offers for him, but as they were bent on getting the best they did not let the price stand in their way.

I leave this week for New York, to meet portation since Dece Shire and Hackney stallions and mares Included in this lot will be the noted London (Eng.) prizewinning Hackney stallion, Prickwillow Connaught (7573), sired by that noted horse, Forest King, the double champion of two continents. I have still a few good ones left, that I will sell right, to make room for others.

AMERICAN & ELLWOOD FENCES. -The Canadian Steel & Wire Co., Limited, Hamilton, Ont., started in a small way some four years ago to manufacture woven-wire fencing. Not knowing whether the "American" and "Ellwood" patterns of galvanized, high carbon, woven-wire ience and gates would sell well in Canada, they installed at first only a few weaving machines, and looked for business in Ontario alone. Their success has been far beyond their hopes, and they now have a large plant filled with machinery, and count their customers from Halifax to the Government Park at Banff, and from Banff to Vancouver. If the fencing already manufactured and sold by them to the farmers and railroads in Canada were built in a continuous line, it would reach from the coast of the Atlantic Ocean in Nova Scotia to the coast of the Pacific in British Columbia, twice over. This season they have put on the market another style of fencing, i.e., high carbon, woven of all No. 9 gauge heavy wire. This fencing has already proven a

#### Talks Fence American

MERICAN FENCE is standard of the world. More miles of it are in use than all other fences combined.

It is made of steel that is exactly fitted for it. A woven-wire fence can

be made of wire too soft or too hard. It must be exactly right to render good \_\_\_

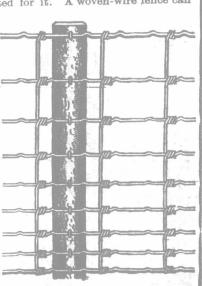

The structure of the American Fence is perfect. It is built of big, solid, galvanized wires, all No. 9 gauge if you prefer it, with the upright or stay wires hinged; in all heights and for all purposes.

American Fence and Gates are for sale by dealers everywhere, or write us direct and we will send you a catalogue free, and tell you where you can get the fence and save

## Our Model Incubators and Brooders

are the only PANACEA for failure—past, present and future. Just take a few minutes and read the following one of many hundreds of unsolicited testimonials from our customers:

Dear Sir,-Masonville P. O., Ont., March 5, 1906.

Masonville P. O., Ont., March 5, 1906.

After trying an incubator for two years, and spoiling eight hatches of eggs, I threw the incubator away in disgust, never meaning to try again, knowing that it was not the fault of the eggs, as I raised over 400 under hens. Last December I read Chas. A. Cyphers' book, "Incubation and Its Natural Laws," after which I ordered a Model, which I had to work under trying conditions. First, I only had eggs from pullets mated with cockerels, mated up only five days before I set incubator. Second, the location in a room that varied from 65 to 28; for two days and nights the temperature was at 30 to 32, and your Model only lost one-half degree—from 103 to 1023. The results are just grand. Out of 71 eggs I got 65 of the strongest chicks I ever saw. All came out on the 20th of February, 1906, within five hours of each other. Two of the eggs I broke. The other four must have died about the 16th day (weak germ). They are now all safe in a Model Colony Brooder, and all 65 as healthy and well as though it were summer. Temperature inside brooder steady night and day at 90. Outside blowing and snowing as hard as it can.
