NO COMPOSITION ROOFING equals Carey's in scientific construction; none equals Carey's in durability; none has earned such convincing testimonials as to satisfactory service.

Let us PROVE these assertions by sending you evidence of Carey Durability in the form of voluntary tributes given by actual users after severe tests covering a period of from 10 to 20 years. Don't waste your time and money on "cheap," shoddy roofing that may look well—until the weather hits it. Such roofings are made merely to sell to the unsuspecting.

CAREY'S Flexible Cement ROOFING

is made to render long and satisfactory service—to last as long as the building stands and with the least bit of common-sense care it will do it. Its first cost is little more than that of "cheap" inferior roofing with which the market is flooded. Because of its superiority, Carey's is the least expensive roofing.

Carey's Roofing is composed of best Woolen Felt, a heavy body of Carey Process Asphalt, East India Burlap and Carey Fire-Resisting Cement Compound—all compressed at the factory into indivisible roofing sheets of permanent flexibility. The Carey lap covers and protects nail heads.
