FREQUENT HEADACHES

A Sure Sign That the Blood is Watery and Impure.

People with thin blood are much more subject to headaches than fullblooded persons, and the form of anae-mia that afflicts growing girls is al-most always accompanied by headtogether with disturbance of

the digestive organs.

Whenever you have constant or recurring headaches and pallor of the face, they show that the blood is thin efforts should be directed and your efforts should be unected toward building up your blood. A fair treatment with Dr. Williams' Pirk Pills will do this effectively, and the rich, red blood made by these pills will remove the headache.

More disturbances to the health are caused by their blood than most people have any idea of. When your blood is impoverished, the nerves suffer from lack of nourishment, and you nay be troubled with insomnia, neuri or sciatica. Muscles neuralgia subject to strain are under-nourished and you may have muscular rheuma-tism or lumbago. If your blood is thin and you begin to show symptoms of of these disorders, try building up blood with Dr. Williams' Pink Pills, and as the blood is restored to its normal condition every symptom of the trouble will disappear. There people who owe their present state of good health to Dr. Williams' Pink Pills than to any other medicine, and most of them do not hesitate to say so.

Pyramid Building.

Pyramid of Cleops is nearly 500 feet high, covers more than thirteen acres, and contains 90,000,000 cubic feet of stone. Its construction is said to have been a task of twenty years, employing the continuous labor of

Modern engineers believe that they could reproduce it in twelve months, at a labor cost of \$1,200,000, using concrete as the material in place of lime-

The great pyramid was built wholly by man power. To erect one like it would be a relatively easy tack mechanically, inesmuch as electrical and other machinery would do the bulk of

the work.

A theory generally accepted has been that the ancient Egyptians elevated the huge limestone blocks by building against the structure a long "ramp" of earth, up which the stones were dragged. Some of our foremost engineers now reject this idea, connding that the sides of the pyramid, being filled in to a smooth slant as rose, themselves formed planes they rose, themselves formed planes sufficiently inclines to enable gangs of men to pull up with ropes the stones required for the successive courses.

With modern devices we could build such a pyramid in a year. mous concrete-mixing plant would be erected, capable of handling thousof tons of material a day. great steel tower, or several of them, Fresh concrete would be erected. would be rushed to these by a multitude of bucket conveyers from the mixing plant. The concrete would be whisked to the tops of the towers You can get Dr. Williams' Pink Pills and thence would be distributed to the through any dealer in medicine or by mail at 50 cents a box or six boxes for up the mighty pile would go. It would up the mighty pile would go. It would be a process twenty times as rapid as the best that slave labor could no under the lash for Old Man Cheops.

The Agincourt has been in reserve since the war.

Surnames and Their Origin

Variations-Adam, Adamson, Addison, Atkins, Atkinson, Adkins, Adkinson, Adie, Edie, MacAdam, MacAdie, MacKeggie, Ayson, Esson. Racial Origin—English and Scottish. Source—A given name.

The family name of Adams is, of course, a shortened form of Adamson,

This surname, together with the variations which have been from the medieval diminutives of the given name, is unusually widespread, because the given name tself was far more common in the Middle Ages than it is to-day.

The medieval English were a sturdy, simple folk, comparatively few whom could read, and so they lacked the modern facilities to search through the Scriptures for names for their children that the modern ability to read, coupled with the development of printing, would have given them.

There was little incentive to learn to read, since books could be produced

The mine layer is to be put on the to point without expanding, and it to point without expanding and it will be approximately and it will be approximately to point cannot, therefore, be picked up by any station unless that station happens to be in the direct line between the transmitting and receiving stations.

The system can be applied to wire less telephone or telegraph, and it is expected that it will be in general use before long.

Privacy by Wireless.

Wireless can, in this way, be renlered as secret and private as a mes

sage by wire.
Professor J. A. Fleming, of London University, tells us that some time ago a ship in the Atlantic spoke by wireless telephone to a station on the American coast; then, by means of a special apparatus called a thermionic valve, the message was transferred to the New York—San Francisco telephone line, and on to Lcs Angeles.

There it was transferred to the wire less telephone and transmitted to the of Santa Catalina in the Pacific, thirty miles from the mainland, so that a man on a ship in the Atlan tic spoke across that ocean, across the American continent, and over part of Pacific, a distance of four thousand miles.

This wonder, and indeed the whole remarkable development of wireless over long distances, has been rendered possible by the thermionic valve, a little instrument that magnifies the

Even on an ordinary telephone a much thinner and less expensive cable can be used if thermionic valves are inserted. How great the saving is can inserted. How great the saving is can be judged by the fact that the wire of the ordinary trunk line between London and Glasgow weighs three hundred tons, and by means of the valve than half this weight can be. The General Post Office is now more saved. the valve on all its long trunk lines.

Cabinet of the Empire.

Almost every week there are advances in wireless. Some years ago Professor Fleming foretold that it might be possible one day for the Pre-miers of the British Commonwealth, without leaving their offices, to com municate by wireless telephone and attend an Empire Cabinet meeting in Downing Street.

It seems that we may be on the eve of such a marvel. It might be quite be beyond aid. These Tablets will tary: "I want the opinion of General prevent summer complaints if given occasionally to the well child and will thinks," and for the secretary to come

Wireless telephony has one great children. There is no other medicine as good and the mother has the guarantee of a government analyst that of the sound waves. In the ordinary they are absolutely safe. The Tab-lets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockno distortion, and the sound is clear.

ASPIRIN

"Bayer" is only Genuine

It's criminal to take recreation: new tasks, new thoughts, a regeneration of mind and body. It is not a matter of doing nothing, but rather of doing something different or differently or in a different place.

The only difference between a rut and a grave is the width and depth.

The first bicycle driven by pedals and proved safe by millions. Unless you see the name "Bayer" on package or on tablets you are not getting Aspirin at all. In every Bayer package are directions for Colds, Headache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Made in Canada. Aspirin is the trade mark (regis The first bicycle driven by pedals da. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

LONDON WOMAN IS **MUCH GRATIFIED**

GRATEFUL TO TANLAC FOR HELPING HER.

Now Free From Troubles From Which She Had Suffered For Three Long Years.

"I will always feel grateful to the lady in Toronto who advised me to take Tanlac," said Mrs. Gertrude Pugs

ley, 74 Colborne St., London, Ont.
"For three years I suffered from a a severe operation. I was in the hospital for a month and, after coming home, it was fully ten weeks before I could get around very much and then with difficulty.

"I could neither eat nor sleep with any satisfaction and had very little strength. I was not satisfied with the way I was mending and decided to get

something to build me up. "I read a statement from a lady in Toronto about Tanlac and I wrote to her and she advised me to try it by all means. It certainly has been a godsend to me and I am glad I followed her advice, for I am a well woman to-day. I began to pick up from the very start and my strength gradually came back. I have a fine appetite, sleep soundly all night long and my work is a pleasure. I am grateful for what Tanlac did for me and I believe

it will do the same for others. Tanlac is sold by leading druggist; everywhere.

Why "Pot-Luck"?

When a man offers a spur-on-the-moment invitation to "come home with me and take pot-luck," he is understood as meaning that no special preparation has been made for the guest, but that the repast will be whatever chances to be in the house.

But there was a time when "pot luck" was actually dished out of a pot, and when the guest took his chance of satting atther. of getting either a good meal or a very slim one. In the old days—and the practice is still in force in some parts of Europe—nothing came amiss to the family cooking-pot suspended from the pot-hook in the centre of the

Everything edible was thrown into it, and, to "keep the pot boiling, fire was seldom, if ever, allowed to go out. When meal-time came, persons fished for themselves, and whatever fished for themselves, and they happened to find was their "pot-
