Heart Strength

Heart Strength, or Heart Weakness, means Nerve Strength, or Nerve Weakness—nothing more. Postively, not one weak heart in a hundred is, in it self, actually disensed. It is, almost always a hidden tiny little nerve that really is all at faul. This obscure nerve—the Cardiac, or Heart Nerve—simply needs, and must have, more power, more stability. more controlling, more governing strength. Without that the Heart must continue to fail, and the stomach and kidneys also have these same controlling nerves.

This clearly explains why, as a medicine, Dr. Shoop's Restorative has in the past done so much for weak and alling Hearts. Dr. Shoop first sought the cause of all this painful, palpitating, suffocating heart distress. Dr. Shoop first sought weak and wasting nerve centers. It builds; it strengthens; it offers real, genuine heart help. If you would have strong Hearts, strong disection, strengthen these nerves—re-establish them as needed, with

800 acres, or about 4.7 square miles, containing 520 blocks and about 25, 000 buildings, one-half of which were residences.

The amount of insurance covering

"The amount of insurance covering property in the burned district was approximately \$235,00.000 (estimated). The value of buildings and contents destroyed in the fire must have been about \$350,000,000, being an estimate upon the insurance liability, the known ratio of insurance to value (about 70 per cent.) and a guess that there was about 5 per cent. of property that carried no insurance."

At the latter place articles were shaken from shelves. No perceptible damage was sustained here.

Hon. Adam Beck Explains Liability of Taxpayer and Municipality.

London, Dec. 8.—Hon. Adam Beck and the engineers of the Hydro-Electric Power Commission were here yesterday, pointing out to a score of delegates from the municipalities of Woodstock, St. Thomas, Tillsonburg and Ingersoll, the various aspects of the Niagara power project.

Mr. Beck explained that the position of the taxpayer was simply this: No debentures were issued, no capital invested, the credit of the city was not impaired, because the Government's credit brought the power to the door of the municipality. The Commission regulated the rates to consumers. The taxpayer who did not use the power did not pay one dollar. The consumer paid the shot.

The liability of the municipality, Mr. Beck explained, as at Brantford and Berlin. He touched on the observations of a Toronto engineer, that stepping up the power for that city would cost more than the commission estimated.

"There will be no further expense."
