### The Cup Races

To-day the greatest international yachting event, being the America's Cup races, will be witnessed by thousands and tens of thousands of people, assembled on the decks of numerous craft of all kinds, from the stately liner to the smallest motor boat, capable of making seaway in the vicinity of the Sandy Hook course laid down for the competition between Sir Thos. Lipton's Shamrock IV, the challenger and the New York Yacht Club's defender, Resolute. Wind and weather permitting the first of the races will be started, and the magnificent spectacle of both yachts under clouds of canvas, tearing across the line will be one to bring a thrill to the heart of lovers of marine beauty. Each of the yachts is the last word in racing science and construction. With crews trained to the nth degree of efficiency under experienced and shrewd racing masters, the Cup Races of 1920 promise something far exceeding all those sailed previously for the winning of the trophy captured by the schooner yacht America in a race from Cowes around the Isle of Wight on August 22, 1851, against fifteen other entrants.

To-day's despatches contain the announcement that Shamrock IV, has to concede the American defender Resolute a time allowance of seven minutes and one second, which means that the challenger has to win each race by a lead of two miles in a whole sail breeze. This handicap almost makes it impossible for the Lipton boat to win at all, and only under exceptional circumstances and with everything in favor of the Irish craft can there be any chance for her. Those who read the article descriptive of the measuring of yachts, published in Saturday's issue of the Telegram will have formed a good idea of how complicated and arbitrary the rules governing this important matter are. The old rule of thumb methods have given way to those of scientific calculation. The section under which Shamrock IV, has to concede so much time allowance, is taken from the new system of the Universal Rules of Measurement, and reads:

"Yachts shall be rated for classification and time allowance according to the following

formula—Eighteen per cent. of the product of length, multiplied by the square root of sail area and divided by the cube root of displacement."

The mere reading of such a mathematical problem is sufficient to show how very complicated it is, and it may be well said that this rule is one which only yacht designers understand. To the average man it looks too formidable even for thought. The result in its bearing on the present cup races has, however, been worked out, and the American yacht gets the benefit of the handicap. With a slashing breeze and not too much short lopp, Shamrock IV, may bring the green and gold colors triumphantly across the line in the best three out of five of the series. All Britons hope so, anyway. Lipton is a good sport and deserves to win. Lets all wish him the best of luck and hope that thirteen will prove his fortunate number.

### Children's Picnic.

The children of St. Mary's Church, Southside, held their annual picnic yesterday afternoon at McDougall's Farm, on the Black Marsh Road. Accompanied by their teachers, the little ones proceeded to the grounds, where the usual children's sports were engaged in. A bountiful dinner was provided by the women of the parish, and during the evening teas, ice cream, etc., were served. The Rev. A. B. S. Stirling, and other clergymen were present and were very prominent in helping the youngsters enjoy themselves. Before nightfall the youngsters returned to town, having thoroughly enjoyed the outing.

### Accident to Trainman.

Brakesman Howlett met with an accident at the railway yard last evening. He was engaged in making up a train, and in some manner his leg got caught between two cars, with the result that the member was badly fractured. The injured man was attended by Dr. Arch Tait, who ordered him to hospital for treatment.

### Norwegian Pulp Co. for Newfoundland.

Capt. Storm, manager of the Norwegian Company, for the purpose of manufacturing pulp, is making great progress with the initial work. The Company has large timber areas on the Terra Nova River and so far they have not been touched by forest fires. Middle Arm, Alexander Bay, has been chosen as a shipping point, the place possessing deep water and other advantages making it one of the best harbors on the coast. The section of Bonaville Bay is in for an era of prosperity. A machine shop and houses for workmen are under construction, and the foundation of the mill has been started. The latter will be constructed of concrete. As Capt. Storm is endeavoring to have the plant in operation so soon as possible, all the capable help that is available is being engaged. Efficient postal and telegraph communication is badly needed, however, and the Government should see that the Company is not hampered by the lack of it.

### "Nfld. Quarterly."

The Summer Number of the Newfoundland Quarterly, for an advance copy of which the publisher, Mr. John J. Evans, has our thanks, is as usual replete with interesting and readable matter. Among the contents are local articles by A. A. Parsons, Esq., a continuation of the "Experiences by an ex-M.H.A.", a trout-fishing article by J. A. Carmichael, Biographical sketch and photo of Rev. H. P. Renouf, of St. Patrick's; Biographical sketch and photo of Rev. Mons. McDermott, V.G. In the poetical department are some gems of thought expressed in verse, by the late A. J. W. McNelly, Robert Gear Macdonald, Dr. Arthur Selwyn-Brown, Miss P. Florence Miller and Miss Rose M. Greene. The pictorial column contains reproductions of the newest Legislative Councilors, the Minister of Shipping and many local views of towns and scenery. Altogether the present number is well made up and should make a valuable addition to collections of Newfoundland literature.

ENTERS MERCANTILE RACE.—A crew from Harvey & Co. has entered to row in the Mercantile Race. This is the first appearance for the past 6 years. Mr. Frank Miles is rowing the Stroke.

### Exhibition of Handicraft.

In Connection with the Restoration of Returned Sailors and Soldiers to Health and Strength.

For the past five or six weeks, Miss M. E. Smith, Supervisor of Ward Aldes, has been training the candidates in handicraft, previous to their proceeding to hospitals, to afford to the men therein recreative and beneficial occupation. The six candidates under training have made splendid progress and go out next week to the hospitals to commence their work of charm and delight. To-morrow (Friday) afternoon, Miss Smith and her class will give an exhibition of their work in their workshop in Victoria Hall. These ladies will be delighted to see anyone who is interested in this work; the exhibition is of a most attractive nature and all who can pay a visit will feel well rewarded. The exhibition will be open from 3 until 6 o'clock p.m. There is no charge.

### Kilbride Garden Party and Derby.

The Kilbride Garden Party and "Derby" yesterday afternoon proved an unqualified success in every way. The special train which ran to the fields at 2.30 p.m., was filled to its capacity, the regular excursion brought a large number, whilst the busses, buckboards, and carriages which piled between the city and Kilbride all the afternoon, were kept busy. The field, which was tastefully decorated with bunting, its numerous tents, tables and side shows filled with so many pleasure seekers, presented an attractive scene. The programme of sports, consisting of Football Fives and minor events, was run off without a hitch, under the capable supervision of W. J. Higgins, M.H.A. The Pelicans belong winners of Gold Medals. The "Kilbride Derby," the event of the day, was run in truly Epsom fashion, and brought back to the older generation the famous horse races in the old days at Mount Pearl. Thirteen ponies entered, run in three heats, the winner contesting for the final. The winners of the different heats were Kelly's "Lady of the Lake," Wall's "Daisy," Fraser's "Nell," and Kirby's "Cherry Pip." In the final heat "Lady of the Lake" and "Cherry Pip" tied for 1st place, and it was decided to take the course again. In this heat "Cherry Pip," Jockey P. Baird, proved the winner, "Lady of the Lake" 2nd, and "Daisy" 3rd. As the winner reached the winning post, the crowd rushed forward and some of the "sports" taking the money prize in connection with the "Derby" were drawn by the Hon. Sir M. P. Cashin, Jas. Parker, Esq., and other gentlemen, the lucky winners being Mrs. M. Dwyer, Kilbride, Mr. Norman, Mr. Pearl, and Miss M. Murphy, Hamilton Street, St. John's. Much credit is due to the success of the race is due to the Judges, who were: Rev. Bro. O'Regan, P. Merner, W. Brennan, and M. O'Regan, also the Stewards of the course: Messrs. M. C. Flannigan, C. R. B. McNeil, M. Aylward, Doyle, Myler and others who assisted. The success of the event yesterday will make the St. Ledger to be run at Mt. Cashin, the "Derby" of the future. The success of the event yesterday will make the St. Ledger to be run at Mt. Cashin, the "Derby" of the future. The success of the event yesterday will make the St. Ledger to be run at Mt. Cashin, the "Derby" of the future.

### McMurdo's Store News.

THURSDAY, July 15.  
Acco Spray has been used with success for potato bugs and other insect pests, and is said to be superior to most things of the kind. It may be used either for house plants or in the garden, and if used according to the printed directions will certainly be found effective. Price 70c. for 1/2 lb. package.  
Just arrived: Ely's Cream Balm; Pazo Ointment.

### Competency Mariners' Meeting.

At a meeting convened in the city, by Shipmasters and Mate, holding Certificates of Competency, Capt. N. J. Kennedy, Chairman, Capt. S. C. Marshall, Secretary, it was proposed and seconded that the Examiners appointed by the Legislature at its last session, be approached and asked to set a limit of time, say three or four years, after which no further certificates of service will be granted, thereby encouraging young men now in the foreign trade to study for certificates of competency.

### Personal.

The many friends of Miss Marion Saunders (sister of H. A. Saunders, Esq., Supt. of the Anglo-American Telegraph Co.) will regret to hear, that she leaves her native land, perhaps for ever, by Friday's Steamer, but will rejoice with her in the pleasant cause of her self-expatriation. She leaves to be a principal in a very pleasant function, namely her marriage to Capt. E. B. Rice, Senior Flight Commander, R.A.F. Cairo. This is another romance of the war, one and a half years in England and the balance in Egypt where she met her future husband. The gallant Commander was an aviator, and in the war. He is the son of W. E. Rice, Esq., manager of the Western Bank of South Africa, Cape Town. The Telegram notes Saunders' friends, admirers, and well wishers of Miss Saunders in bidding her "bon voyage" and hopes she will enjoy many years of wedded bliss in the land of her adoption.

# BARGAINS in MEN'S WEAR

## Knowling's

We are offering some specials in

## Men's Collars, Underwear, Socks, Shirts.

Some of the items in this offering are

### HALF REGULAR PRICES.
