Demonstration and Sale of "Omo" Dress Shields Monday

If you do not know the difference between a "no rubber" and a rubber shield, come Monday and the advantages of the "OMO" no-rubber shield will be simply and clearly demonstrated by an expert of the factory, who understands the construction of shields and who will explain the advantages and disadvantages of the different kinds of dress shields.

This will be one of the most interesting demonstrations, and a most instructive one, as the beauty of the most handsome gown is marred very often by the use of the wrong kind of shield, and the season is at hand for their use. A few pointers from our demonstrator next week may prove more valuable than you have any idea of, as the shield is the most important article in the

Another Shipment of Those Special Women's Aprons and Dust Caps

Just in time for the housecleaning. Another big shipment from the biggest manufacturers in America, from whom such prices are only obtainable by buying in immense quantities. We placed what might be considered an order for a season's supply. These came in a few weeks ago, and the values proved so great that the whole shipment was cleared in a day or two. Today we offer a duplicate order which we have just received.
