H. T. Gibbs Gives Interesting Illustrated Lecture Thursday night.

On Thursday evening H. T. Gibbs of the Westinghouse Electric Company gave an illustrated lecture on the Chippawa Canal development to a packed meeting of the International Corre-spondence Schools Club. The lecture was necessarily somewhat technical, but Mr. Gibbs sustained the interest of his audience to the last. One would have appreciate the magnitude of the Chip-pawa Canal development, which when empleted will be a big factor in creat ing permanent prosperity for London and the province in general.

Views were also shown of the L. and the lecture. E. V. Buchanan gave a few remarkable comparisons, showing that vhen this development is completed sufficient electricity will be generated to circling the globe.

#### HOW TO GROW A DIAMOND

A traveler one day heard a man make the assertion that he knew how to grow diamonds. A friend accused him of either being a real genius or an enemy of the truth, and insisted on knowing something of this discovery—the whole truth and nothing but the truth. So William tells him: I learned this method from a jeweler in London. He formed a diamond-growing club and the members started by selecting a small diamond and later had it exchanged for a larger stone and in every transaction he allowed full purchase price of the last diamond bought. I joined the club and planted \$25 in a small diamond. It was a small stone, I know, but the next month, cutting down on my smokes, sidetracking a few movies, left me a little surplus, so when I again hit London I had \$25 to the good, so looked up My Jeweler and traded the dewdrop for a \$50 diamond. I did this over and over again till now I have a real beauty, blue-white and perfect stone—the only kind Mr. Nash sells. Say does My Jeweler grow diamonds? He surely does and his store is 182 Dundas street, London, "where you will eventually buy." b
