MORE PROBE TALK FROM CITY HALL; L. & P. S. NOW

Ald. Douglass Will Start Talk Ball Rolling at the Next Council Meeting.

MAYOR AGREEABLE

Will "Survey" Any Department For Which Aldermen Ask, His Worship Declares.

Mayor Wenige states that the city council retains the right to "investigate" the London & Port Stanley Railway System, and gives assurance that such will follow, upon the request of a majority of the city councillors.

Ald. Leonard Douglass, chairman of the board of works, questioned his worship today if such action lay within the region of the council's power.

"I will move at the next session of the council that the L. & P. S. be also surveyed by the citizens' research bureau," the chairman explained, "providing, of course, that we have the power to do this."

"We certainly have that power," Mayor Wenige replied. "We retained the London & Port Stanley commissioners, and surely we should have something like information necessary, in the interests of the citizens. We appoint the commissioners, and it lies within our province to rescind their appointment and their resignations, if we view such action as timely and imperative."

The mayor added also that all city departments would be surveyed, just as the councillors demand. It will rest entirely with the aldermen, he says, although he is emphatic in his contention that there will be no additional probe of the assessment department.

Ald. Douglass submits that investigations of the fire and the police departments cannot now be avoided in view of what has happened, and what has been said, and asserts that if the Chamber of Commerce declines to participate in an exhaustive survey of the police department, the council will have to hold one of its own.

While the suggestion has also been entered that the board of education proceedings come under observation, Ald. Douglass questions whether it would be advisable for the council to interfere in this department.

THE RYERSON "REDS" WIN SCHOOL EVENTS

Empire Day Delightfully Celebrated by North End Pupils.

Empire Day was delightfully celebrated at Ryerson public school when, after days of preparation, one of the most important and delightful outings ever held for pupils in the north end of the city was staged in Puthough Park.

To foster the spirit of competition and school spirit among the younger pupils the school authorities conceived the idea of dividing the pupils into two factions for the day, the "Reds" and the "Blues."

Ten days before the big celebration, Roy Kennedy was chosen to wave the red banner and Miss Margaret Laing the blue flag, and every pupil from Grade 8 down to the kindergarten had been allotted one or the other side.

On Empire Day, 41 events were run off, and the interest the youngsters took in each of the races and how their side was coming along in the question of points was pleasurably observed by many onlookers, as well as the teachers themselves, through whose efforts the day was made a success.

Waving banners and yelling school songs the entire school marched to the park, where the events were flat staged. On the program were flat races, chum races, three-legged races, obstacle races, blind pig races, relay races, jumping and hopping events, end-ball contests, potato races, club snatch contests, dodge ball and baseball games for both boys and girls.

When the points were all counted it was found that the "Reds" had won out by 109 points.

The competition between the two sections started on Monday last with a poster competition. At this time the "Blues" were 150 points to the good. The poster contest winners were Charlie Muffen, Isabel Clive, Frank Kennedy, Allan Miller, Walter Tamblin, Tom Senton, Celeste Chiera, Wyrle Chambers, Jim Cairncross, Hugh Kennedy, Louise Schoos, Teddy Wright, Norman Price, Robert Moran, J. Marshall, Douglas Scholes, David Scholes, Helen Curtiss, Billie Robinson, Charles Eady, Cedric Tanner, Margaret Wood, Patricia Sylvester and Roger Dorland.

The individual class winners in the events are: H. B. Galpin's class, Helen Price and Jack May; D. H. Carr's class, Marjorie Curtiss and Matt Sandford; Miss H. Chapman's class, Mary Moran and Jim Walker; Stark and Jack Libbings; Miss Grace Sing's class, Louise Neville and Roger Dorland; Miss M. Giddens' class, Phyllis Davenport and Donald Campbell; Miss Muriel Leaster's class, Joyce Butchart and Henry Boker; Miss E. Watson's class, Nora Waide and Jack O'Farrell.

The individual class winners in the events are: H. B. Galpin's class, Helen Price and Jack May; D. H. Carr's class, Marjorie Curtiss and Matt Sandford; Miss H. FALL RIVER LINE VESSEL SENDS OUT CALL FOR AID

Associated Press Despatch. New York, May 25.—The Fall River Line passenger steamer Commonwealth, bound for Boston, today sent out a radio message, saying she had been disabled by engine trouble off North Brothers' Island, in Long Island Sound.

The municipal steamer Riverside started at once to her side, with instructions to bring her passengers back to New York. Officials of the Fall River Line declared the injury to the Commonwealth was slight, consisting mainly of a broken radiator on one paddle wheel. Repairs were being made, it was stated, and the ship was expected to proceed to Boston after a brief delay.

Only passengers who were in a hurry were taken off, it was said.

URGES NORDIC TYPES AS CANADA'S SETTLERS

Dr. C. K. Clarke Deplores the Condition of Many Immigrants Sent Out.

By HENRY SOMERVILLE. Special Cable to The London Advertiser by a Staff Correspondent. Copyright.

London, May 25.—Dr. C. K. Clarke of Toronto, lecturing in London yesterday, said Canada should pick her immigrants from the best Nordic types. Rudyard Kipling and other enthusiasts say Canada must pump in a population.

But Dr. Clarke insisted that the suction pipe should be put in waters not polluted by physical degeneracy. The United States, he said, has been taking the best types away from Canada, and at the same time Canada was importing the worst type. He had examined in one clinic alone, 107 girls and 24 boys of most degenerate types, all brought into Canada by one immigration society.

Nearly all the girls were persistently immoral, and the majority were unmarried mothers. These types should have been weeded out before embarkation.

Dr. Clarke complained that psychiatry is a neglected science, not only in immigration policy, but in the law courts. A well advised psychiatrist, he said, hesitated to give evidence in criminal cases, because the dice were loaded against him. The law has been responsible for many judicial murders, because of the acts about mental disease were not realized.

ASKS SPECIAL GRAND JURY TO PROBE PETERS SLAYING

Associated Press Despatch. Albany, N.Y., May 25.—Attorney-General Carl Sherman today recommended the empanelment of a special grand jury to investigate further the slaying of Clarence Peters near Kensico Reservoir a year ago, with which Walter S. Ward, son of the millionaire baker, is charged.

S. F. LAWRASON TELLS KIWANIS OF TRIP ON NILE

Conditions in Palestine Vastly Improved Since Allenby's Victory.

KING TUT'S TOMB

Visit to Valley of the Kings Is Entertainingly Described.

Visiting the London club in his official capacity of lieutenant-governor, S. F. Lawrason was the speaker at today's regular meeting of the London Kiwanis Club.

Mr. Lawrason returned a few weeks ago from a trip to Egypt and the continent, and his talk on the tombs in the Valley of the Kings at Luxor was particularly timely. He also spoke of the vastly improved conditions which prevail in Palestine since General Allenby took Jerusalem. The Allenby railroad, Mr. Lawrason called one of the finest since General Allenby took Jerusalem. The Allenby railroad, Mr. Lawrason called one of the finest since General Allenby took Jerusalem.

Motor traffic was unknown until after the war, Mr. Lawrason said, and now the splendid new roads which have been built are teeming with automobiles. Since British occupation also the country is safe for tourists, who can now go anywhere without fear of being molested with only a dragoman as guide.

One incident Mr. Lawrason related in particular with reference to Egyptian education. An Englishman had established a school there to teach the English language, and the pupils enrolled in it followed his ship along the deck a

begging for literature in this tongue. Contrary to the usual characteristics of the native child, they gave it a great preference over shillings.

Greece and Turkey Mr. Lawrason spoke of as bankrupt and tumbling nations, from whom, unless they received outside assistance, the world had nothing to fear.

Egypt, he said, was completely unable to govern herself. The situation he compared to that with which the United States has to deal in the Philippine Islands. Egypt professed to hate Great Britain, but no other country could undertake the problem of governing her.

GIRL WILL NOT PRESS CHARGE OF ASSAULT

Failure To Prosecute Complaint May Mean Deportation to Canada.

New York, May 25.—Her failure to prosecute complaint she is alleged to have made a few days ago against Albert Fray, 26, of Kingsland Road, Elmhurst, may cause the deportation to Canada of 15-year-old Irene Corey, who gave her home as Toronto, yesterday she was turned over to the immigration officials at Ellis Island by Magistrate Doyle, who requested that she be sent back to Canada, she having been detected missing from home on April 20.

At the same time the magistrate said he would ask that Fray, who three months ago while they were employed in a factory at Toronto, yesterday, however, when the case came up before Magistrate Doyle, the girl refused to press the complaint. She was returned to Ellis Island with a woman immigration inspector.

Detective George O'Connor, of the Missing Persons' Bureau, testified he received word from the police of Toronto of the missing girl and traced her to the home of Fray. She charged at that time, the detective told Magistrate Doyle, that she had been assaulted by Fray, whom she had met three months ago while they were employed in a factory at Toronto.

Yesterday, however, when the case came up before Magistrate Doyle, the girl refused to press the complaint. She was returned to Ellis Island with a woman immigration inspector.

DEVISE CONTROLS TO LOCATE SPIRIT, NOTHING HAPPENS

Walker C. Prince and Houdini Attend Third Seance at New York.

MEDIUM GOES HOME

Electric Appliance Expected To Reveal What Took Place in Room.

Special to The Advertiser. New York, May 25.—Electrical controls, devised by Austin C. Leach, managing editor of the Scientific American, was used at the third seance conducted by that magazine before Houdini and Dr. Walker C. Prince of the physical research society, here last night.

These electrical controls, it is claimed, will show when the records are examined exactly what took place in the darkened chamber during the seance last night.

Practically the only visible details of the controlling apparatus were bits of white paper, which were fastened to the chair of George Valentine of Wilkesbarre, the medium, and to the floor.

This was so arranged so that if the chair was moved in any direction these bits of paper would be broken.

The most important parts of the controlling device, it was stated, were out of sight.

For an hour after the lights were out nothing happened. Hymns were sung and there were long periods of silence and waiting. Finally somebody was touched on the knee with a trumpet, which moved away again immediately, and for some time the trumpet could be heard moving about the room.

MINE WORKERS' HEAD INVITED TO TESTIFY

Commission Takes Steps To Avert Another Possible Coal Strike.

Special to The Advertiser. Washington, May 25.—A definite step to avert another anthracite coal strike is to be taken today or tomorrow by the United States coal commission in summoning John L. Lewis, president of the United Mine Workers of America, to appear before the commission to lay the miners' cards on the table.

Lewis was in Washington today but without any appointment with the commission. At the offices of that body, however, it was said that a meeting with him would be arranged. The commission has held long meetings with anthracite operators and has at the same time pushed its own private investigation into conditions of the industry. Lewis' testimony will complete the data on which the commission will base its recommendations.

Finally Dr. Prince announced that it was resting on his knee. He added that it would be interesting if the spirit would come along now and pick it up, but they didn't, and when Dr. Prince moved his knee the trumpet rattled to the floor and rolled over near Houdini.

For a time all was quiet, but when the time guide Kokum started to speak someone slapped Houdini violently on the head. At the same time a voice whispered in the ears of J. Malcolm Bird, associated editor of the magazine, something that sounded like "Harry Myers," but Harry or whoever it was, didn't venture any more, and the seance was ended.

Valentine, the medium, announced at the end of the seance that he was going back to Wilkesbarre and might not be back for some time.

WOULD HAVE VICEROY STATE INDIAN CLAIMS

Public In India Believe Imperial Conference Will Probe Status.

Associated Press Despatch. Simla, India, May 25.—The feeling is growing in India that the question of the status of Indians in the British dominions and colonies will be referred to the Imperial conference. Indian opinion therefore is anxious to secure able and adequate representation for India at the conference. It has been suggested that the Viceroy should attend as the chief representative. Two Indian members have tabled a resolution in the legislative assembly urging this besides the despatch of two Indian delegates.
