Londoners and Their Hobbies

E. E. Reid's Tennis Courts Have Fostered the Game

Constructed Ten Years Ago, They Have Been the Rendezvous of Lovers of the Game Ever Since.

E. E. Reid's home stands at the top of Talbot street overlooking the river in the direction of the setting sun. Mr. Reid is a hospitable citizen and his home knows many a guest. But are few, compared with the guests who invade his tennis courts below on the flats. For Mr. Reid has made tennis his hobby.

Not only has he two splendid cinder and clay courts located here, but near at the river's edge is the finest little brown shingle tennis house equipped with showers and dressing

modation. The property, of course, is private, but so generous has Mr. Reid been that during the past ten years his courts have been the rendezvous of many of the best tennis players in the city, not to mention numbers of beginners, who received their first lessons in the game there. Indeed, some of London's finest tennis players of today were educated in game on Mr. Reid's courts, which championship game during the las

When visiting teams played in London they played on Mr. Reid's courts, and the public gathered down at the foot of his garden to see. Now that Tennis Club has been organized, the matches are played on its courts located on the flats next to the courts of Mr. Reid. But whenever there is an overflow Mr. Reid's courts again come into requisition. tennis life of the city. He says that if it hadn't been for John Puddicombe nothing would have been done. It was Mr. Puddicombe who enthused him and helped him build his courts. And they actually built them by their own physical effort. They had teams and scrapers to do the heaviest work, of course, but when it came to shoveling and leveling, both Mr. Reid and Mr. Puddicombe figured prominently with shovels and picks. It was while they were erecting the wire end-nets and building the fence ing made to hold water so that the courts and his garden might be watered from tans placed at the courts and the courts and the garden might be the courts and the courts and the garden might be the courts and the courts are considered as the courts and the court out the courts that Mr. Reid conquently turned out that this piping formed an excellent hot water system and that as a result hot showers could be had in the tennis use from water heated in the sun.

Advocates Showers. Mr. Reid is a strong advocate of shower after a game. He believes that the way to get most enjoyment out of a game of tennis is to follow it up with a shower and change of clothing. Before he began to play tennis ten years ago, Mr. Reid admits that he used to complain about the heat of the summer. Now that he plays tennis he no longer feels the heat, and he has become a believer in the saying—the hotter the day the it up with a shower and change of the saying-the hotter the day the

etter the tennis. Mr. Reid advocates tennis for the young people of today, because it affords discipline as well as pleasure to the player. And he has not advocated it merely by word of mouth, but he has actually got the people there on his courts and started them

So the wise house-mother will furnish her steps as prettlly and invitingly as she does her living-room or guest chamber. The steps must silently invite the passing neighbor to come in and drop down for a few moments, and make the passerby wish they too were friends of the people behind the steps.

The secret of pleasant summer steps lies, of course, in the cushions used. They must be plentiful, bright, and oh, so plump! No thin, scrawny
