WHY POPULATION OF CHATHAM STATIONARY

Said to Be Those Who Profit By Population Stand-

ing Still

Chatham, June 29 .- (Special) .- It is being suggested that the reason the population of the city is standing still is because the law calls for a tax of five per cent. more as a business tax in cities under 10,000 and there are those who profit, indirectly or otherwise, from the population being stationary. The authorities are naturally indignant at the innuendo, but there is apparent silence on the part of any in a position to speak, as they consider that the care exercised by the assessors last time is sufficient answer to the allegation of interests or the innuendoes that may

be extended. There is a possibility, which those In the inside say amounts to positiveness, that the city will, in course of a few months, see the erection of a local oil refinery, provided the Raleigh and Tilbury oil fields develop as they have been doing. A party of Missouri gentlemen came through the country a short time ago, and after looking over the field they expressed the opinion that, should the pired in her arms. On behalf of the club, after a short introductory speech by Wm. Hadley, J. M. Pike, in his usual felicitious manner, presented each of the retiring members with a handsome gold locket, suitably engraved.

Messrs. Ifft and Heath replied for themselves, thanking the members for their courtesies, displayed during their sojourn in Chatham, and Mr. Hadley replied for Mr. Northway, who was unable to be present.

Mr. Ifft, especially, has, during his stay in the city, made very many friends, and all regret his departure to Germany, while recognizing that it means advancement and wishing him every success.

AGAINST BOOKMAKERS

Complaints Lodged by Private Detec tive at Windsor.

Windsor, June 29 .- (Special.) -- Acting on evidence secured yesterday afternoon, Detective Garner lodged complaints to-day (noon) with Magisat the Windsor Driving Park. The informations were accepted and the cases will be tried Tuesday.

Garner is a private detective, said to be in the employ of W. M. Germain, the Welland lawyer and former invoked with George M .Hendrie in litigation over the Fort Erie track. It is thought here that Germain instigated the prosecutions. Garner first wanted him to take proceedings their way among the stores. against the bookmakers. Mr. Rodd refused to do so, saying there was a test case in the courts now over the conviction of the bookmakers at the up further litigation.

Word has been received from Ottawa to the effect that Hon. Wm. Templeman, minister of inland revenue, will not give any decision affecting the ferry franchise until the company's side is heard.

Revels a Mystery.

This part of the enquiry was brought to a full stop by the chairman's re-Woodbine, and he was averse to piling fusal to go into details. How far the revels proceeded are a mystery to this day. But the kind of prevarication which marked the testimony was seen in the two accounts given by the commander of the expedition of the fish diet issued to the crew, who were mostly Catholics. The fish was ordered to be issued on Wednesday instead of Friday. Asked why it was not given on Fridays, he said he was afraid the supply would not hold out Yet it is in evidence that fresh fish was provided by the natives in plenty, the door, but said he could not stand and 7,000 lbs. surplus was on hand at the end of the trip.

As Mr. Stockton remarked, the enquiry was not fair from beginning to end, but blocked and obstructed in a way that would not be tolerated from any judge sitting in court.

This is but a sample of matters so far investigated, but enough remains to occupy the attention of Parliament for months to come, if it were advisable to go on at this time. It is but the opening of the case which the Opposition are prepared to deal with. The Arctic story is but the key of official procedure in every branch of the marine service. How the country has been plundered in the policy of graft will be sufficiently revealed next session in spite of every obstacle the Government may put in the way.

New York, June 29.-Bradstreets to-morrow will say: "A week of comparative quiet closes a half-year period, the like of which for activity and volumes of business done has probably never been equalled. The crop situation, as a whole, is excellent, and will compare favorably with any similar period in the country's history.

Canadian retail trade has improved with seasonable weather a humper crop of grain and fruit is predicted; collections are rather better, and fall trade prospects are of the brightest. Productions of dairy products is larger than a year ago, and prices are better. Collections are better, particularly in dairying

What is a Tonic? tonic is a medicine that creases the appetite, increases the digestion, increases the power of the system to assimilate and appropriate

This is the action of all true tonics To be sure there are tonics that are simply stimulants. They irritate the stomach, and an unnatural craving for food is excited. This class of medicines should be classed as stimulants rather than tonics. A tonic, as above stated, quickens all the functions of digestion. It in-

vigorates the body by furnishing more force for the body. The action of true tonics is not temporary, but lasting. The lassitude which warm weather brings is due to an under-supply of nutrition for the body. Plenty of food may be on the table, but the food is not relished, or else is not digested.
