

electric service, will probably result in discouraging the investment of much larger sums of money by the competing lines through territory where there is not business enough for more than one such road.

SANMETTO IN GONORRHŒA.—Dr. A. G. McCormick, Richmond, P.Q., Canada, writing, says: "I prescribed Sanmetto in a recent severe case of gonorrhœa with the greatest satisfaction. I never prescribed any remedy in such cases that acted so well. The case was one of simple gonorrhœa, of a severe type—pain, burning and scalding, with a profuse discharge. By the use of Sanmetto my patient made a rapid and satisfactory recovery. Sanmetto is a sovereign remedy in such cases. I used it two years ago in a like case with a similar result. I am well satisfied that Sanmetto is by far the surest,

speediest and safest, as well as the most pleasant and most satisfactory remedy we have for gonorrhœa."

HÆMOPTYSIS.—Dr. Thos. J. Mays believes that many cases are strongly dominated by the rheumatic spirit, that they belong to the rheumatic class of diseases, and that they must be treated with and promptly yield to antirheumatic remedies. It is really remarkable to see the sudden improvement in many of these cases under the salicylate treatment, and in cases too which previously had resisted all other treatment. He cites a case in which he successfully used

R. Sodium salicylate. . . . ʒ iv.
 Potassium acetate . . . ʒ j.
 Tincture of digitalis . . fʒ iij.
 Wintergreen-water, sufficient to make. . . . fʒ iv.

M. Sig.: One teaspoonful four or five times a day.—*Philadelphia Polyclinic.*

BABIES

Reared on **Robinson's Patent Barley**, when eight months old, should be fed upon **Robinson's Patent Groats**, with an occasional return to the **Patent Barley**.

Gruel should be made from the **Patent Groats**, and with milk; it then forms a perfect diet, with heat-producers, muscle, bone, and flesh-formers nicely balanced.
