CRAMP, TORRANCES & CO.,

10, Wellington Street East.

AMONG recent assignments we notice the following, none of which are of much importance, not involving any serious losses to creditors: Walter Brydon, waggon-maker, Galt; D. M. White, hotel-keeper, Stratford; Henry Cardiff, baker, Ainleyville; Thomas Townsend & Co., cabinet-makers, Orono; Wm. M. Lyon, druggist, Springfield; Richard Keeler, shoemaker, Listowell; C. H. Farr, shoemaker, Welland.

IT is asserted that during the late visit of Mr. Carl Piehl, the distinguished Norwegian engineer, arrangements were made for inducing emigration from Norway into our Free Grant District. This is a wise and proper movement, which we hope will be successful. The Norwegians are a hardy and industrious people, far better suited to the wants of this Province than the ornamental but often needy gentlemen that hail from the mother country. There are a great deal too many of this class now looking for easy situations in our various towns and cities, and possessing only the recommendation of a fair exterior and a famished purse.

WE UNDERSTAND that the hands employed in a manufacturing establishment in a small town east of Toronto stopped working on Wednesday last, many of them being unable to obtain arrears of wages for some time past. The concern has been struggling along under difficulties for the last two or three years, and the result is not altogether unexpected. It is not known yet whether the firm will go into liquidation, as efforts have been recently put forth looking to

Corsets (French and English,)

Skirts (the Newest Styles.)

R. H. GRAY & CO.

the formation of a joint stock company. Strong and unfavourable local comments have lately been made regarding the somewhat ostentatious mode of living indulged in by the proprietor, which seems out of place in view of the financial emergencies of the business. Even a good reputation and open-handed hospitality will not disarm public criticism nor compensate needy workmen for the loss of their wages. "Be just before you are generous" is a practical maxim that might have been well adopted in the case under notice.

AN INFLUENTIAL meeting of gentlemen interested in the lumber trade was held in Quebec on the 7th inst. From a report of the proceedings in the *Chronicle*, it appears that the trade of Quebec are of the opinion that the placing of booms on the Ottawa River, at certain points, would materially reduce the cost of rafting saw-logs down that stream, which is now so great as to operate almost as a prohibition. Mr. John Roche, one of the speakers, gave it as his opinion that by the placing of these booms, the cost of bringing saw-logs from the Upper Ottawa would be reduced from \$3 per 1,000 ft., the present expense, to \$1.25, thus saving \$1.75 on every 1,000 ft. This would enable the merchant of Quebec to become the purchasers of the rough timber. Mr. Sharples gave it his opinion, derived from experience, that unless some such scheme as that proposed was effectively carried out, but few would come into Quebec harbor. The English people could obtain Swedish and other timber, delivered at their quays, for 10d. per foot, and timber which was quite good enough for the required purposes, so that they

37 & 39 Front Street, Toronto.

would be indisposed to pay us a higher price for our commod timber, which can only be used for the same purpose. After a good deal of discussion, a resolution was adopted to the effect that a petition should be presented to the Minister of Public Works, requesting him to cause a survey to be made to ascertain if the placing of booms at certain points named would materially interfere with navigation, and if not, to ask the Government to place such booms at its cost and under its control, the trade agreeing to pay fair rates for the same. So moderate and reasonable a request, coming from an influential body of merchants, ought to, and doubtless will, receive every attention, and in case that no obstacle to navigation is created by the proposed works, the compliance of the Government will naturally be expected.

TRUTH IN LIFE INSURANCE.—If you are sincere and fully informed upon the subject, you will know that your customer cannot possibly confer so much benefit upon you, by insuring his life, as you give him, taking pains to present the claims of your particular company with great care and exactitude, knowing that this is not only honest, but that the very best thing you can say about life insurance, properly conducted, is the exact truth. When so presented, your story is the best that can be told, and conviction and success must surely follow. Any deviation from truth will some time be surely discovered, and must redound to the everlasting shame of the solicitor. In the opposite course you will also have the satisfaction to see your business kept up, and your policies steadily increasing.
