GAINING EXPERIENCE

The installation of an on-line transaction processing facility provides instantly updated financial services. The videotex host offers a gateway to your mainframe and a dedicated high-speed communications link allows for on-line processing and verification of transactions.

Advantages

- easy integration with existing equipment
- expanded client base
- expanded range of services
- information on complete range of banking services instantly obtainable by customers
- users can monitor account transactions and obtain instant updates
- account monitoring enables customers to benefit from highest possible interest rates.
