Canada's trade with Latin America and the Caribbean is often overshadowed by its ties with its larger trading partners. However, the table above shows exactly how valuable Canada's trade relationship with Latin America and the Caribbean has become. It indicates that Canadian exports to the far less populous region of the Caribbean, Mexico, and Central and South America are in fact worth more than exports to India, Indonesia, Russia, France, Germany and Eastern Europe combined.<sup>1</sup>

## Towards a Green Hemisphere

During its term as Chair of the Summit of the Americas, Canada has made important progress on environmental issues—on the world stage, in our Hemisphere and at home.

Canada took an important step forward in the battle against global climate change in December 2002 when it ratified the Kyoto Protocol to the United Nations Framework Convention on Climate Change. With this ratification, Canada has become the only country in the Americas with a binding emissions reduction target for the Kyoto commitment period.
