Dr. Snell,
College.

Dear Sir:

In reply to your letter of the 13th instant, re the Graduate work put on under the Department of Animal Nutrition and Breeding, I should like to know who will represent the work and as to whether both the departments should not have representatives since the work of the two departments is quite different in many respects.

Although this department was quite willing to co-operate under the policy as established at that time, we did not wish to be considered secondary in the work when representation was considered.

I might say that this same policy was considered for the plant work, as well, as through that policy the Horticulture Department was to have the Graduate work considered. The plant co-operation, however, did not materialize.

Yours faithfully,

(Sgd) W.A. MAW.

Assistant Professor of Poultry Husbandry.
