

Abenakis Springs Hotel

Recreation

At Abenakis Springs you will find a charming freedom from the restraint of city life. The surrounding country affords opportunities for pleasant walks and delightful drives along the river's banks and through groves of pines, and there are few places where driving can be indulged in at as moderate a cost. The boating on the St. Francis and St. Lawrence Rivers and Lake St. Peter will long be remembered by all who visit this delightful country. Music, dancing, and lawn games without limit will add to the pleasure and enjoyment of those so inclined. You may have a quiet or gay time as you desire, and whether you go for rest, health or recreation, you need not depart disappointed.

Climate

Abenakis Springs is one of the coolest and most health-giving resorts in North America, a fact which is attested by the increasing number of visitors who annually return to enjoy the restorative influence of a climate hardly to be equalled for its salubrious qualities. Here the overworked brain finds rest. A few weeks or even a few days spent in this invigorating atmosphere is like a tonic. The dryness of the atmosphere makes it exempt from malaria and hay fever.

The Hotel

THE ABENAKIS HOTEL is a commodious building erected with special reference to health and comfort. It is two-and-a-half stories high, one hundred and twenty five feet in length by one hundred in depth, with a central tower four stories high. Adjoining the hotel proper is an extension one hundred and twenty-five feet long. There are nearly one hundred large, well-aired and easily accessible bedrooms, with a spacious dining-room, parlors and baths, arranged with special reference to personal comfort, social enjoyment and recreation. It is the constant aim of the management to make the guests feel "at home."

Lakes and Rivers

The St. Francis River flows on past the Hotel to the St. Lawrence. Its clear, blue waters, dotted with innumerable islands, present a most charming view and ever-changing panorama.

Lake St. Peter is formed by the union of the St. Francis, Yamaska, Richelieu, Nicolet and St. Lawrence rivers. It is twelve miles wide and thirty long.
