

The Colonist.

FRIDAY, OCTOBER 20, 1893.

A NOTABLE EXEMPTION.

A good deal has been said lately about the depreciation of commodities and the appreciation of gold. It is quite true that a great many commodities are sold cheaper now than they were ever before.

It has been found that while almost everything else has gone down in price the remuneration of labor has gone up. Workers of almost all kinds get more for their labor than they did, say, forty years ago.

It is an excellent one, and will well repay a careful perusal.

IGNORANT AND RECKLESS.

It has been long evident that the majority of the City Council has no regard for the health or the comfort or the convenience of the citizens.

The decrease in the price of the necessities and the comforts of life is even more surprising than the increase of the remuneration of the wage earners.

The reader sees from this that the wage-earner has, in the last forty years, profited in two very important ways. He has profited by the increase of wages, and he has also profited by the lowering of prices of nearly all the goods he uses.

CONSUMPTION.

The Canadian Magazine for October contains an exceedingly interesting and instructive article on "Consumption—A Hopeful Outlook," by John Ferguson, M.A., M.D., Ph.D.

The disease is most deadly among the young. Dr. Ferguson says that between the ages of 15 and 45 years about one-third of those who die perish of this disease; while from the ages of 15 to 35 nearly one-half the deaths are due to it.

The disheartening belief that consumption is hereditary, and that there is no use in fighting against it, Dr. Ferguson informs us is not now nearly so general among the ablest observers as it used to be.

heretic and the unbeliever as if he were of the household of faith. There are others again who believe that this kindly and charitable feeling towards all men is an evidence of the growth of the spirit of true Christianity, which is a religion of love, a religion in which there is no place for either hatred or spiritual pride.

THE ONTARIO TOUR.

Sir John Thompson finished his tour through Ontario a week ago. His progress from first to last was a pleasant one. Every where he received a hearty welcome, and everywhere he was heard with attention and respect.

It is evident that the policy advocated by the Dominion Premier and his colleagues meets with the approbation of the whole of the Conservative party, and of not a few who are now in the Liberal ranks.

These are the leading features of the case. There has been a great deal of talk about it and much has been published that is irrelevant and no doubt untrue.

THE LIB OLIWHERD.

The Times said on Thursday that Mr. Davis, while in Cariboo, did a good deal of quiet canvassing in favor of Mr. Murphy, whom he wished to see elected.

It is well known that Lord Salisbury is a very able man, an accomplished writer and an astute politician, but it is not generally known that he is a man of science.

THE PACIFIC CABLE.

The cable between Queensland and New Caledonia has, according to the latest mail advices, been successfully laid, and is now in working order.

IRIGATION CONGRESS.

LOS ANGELES, Oct. 14.—The Irrigation Congress adjourned sine die at five o'clock. The closing hours were chiefly occupied in congratulatory over the work as performed, and in complimentary resolutions to the people of Los Angeles, and to the local, state and national press for the kindly and liberal manner in which they had not only aided the national project, but also the local project.

UNION PACIFIC RAILWAY.

NEW YORK, Oct. 14.—F. M. Anderson, one of the receivers and government directors of the Union Pacific was seen today. Being asked what movement the directors would make regarding that road he said: "Mr. Clark, the president, Oliver W. Mink and I will meet some time next week for a conference. The Union Pacific railway owes the Government something near \$50,000,000, which it cannot pay. I am in favor of getting all we can for the Government. If the road cannot lay the golden egg, I favor having it so that it will be useful at some future time to lay it."

IMPORTANT TO WORKINGMEN.

Artisans, mechanics and laboring men are liable to sudden accidents and injuries, as well as to various diseases, which are often fatal. All this trouble we would recommend Hagar's cure, for outward and internal use.

MILITIA INSPECTION.

Col. Peters Compliments the Artillery for their Steadiness and Fine Physique.

A Large Turnout and Comprehensive Test of Efficiency of All Ranks.

Steadiness on parade was the merit in the British Columbia Battalion of Garrison Artillery which the new Deputy Adjutant General found most highly commendable at the annual inspection yesterday afternoon.

The turnout was a good one, there being in the three companies 131 of all ranks. Lt. Col. Prior, M.P., was in command, and Major Irving acted as adjutant.

Forming at the Market hall, the parade marched along Douglas and Humboldt streets and the Park road, to the Albion cricket ground at Beacon Hill, where a large square had been flagged off for the occasion.

Next, the companies were inspected singly, particular attention being paid to the condition of the uniform and equipment; and then the officers were called on to put the companies through a variety of movements and to give the necessary details with drill book completeness.

THE HAWAIIAN THRONE.

One of the guests at the Driad in Mr. Theophilus H. Davies, of London, England, who, with his son, is awaiting the arrival of the Miowera, on which it is his intention to proceed to Honolulu.

There has been a great deal said, and I see it has been telegraphed to San Francisco about the position which the Princess bears towards the Queen. They talk about the Princess being willing to take the throne now the position is simply this, that the Princess is no question of the Queen's throne during the Queen's life time, except at the Queen's request, so that all this talk to the contrary is entirely unfounded.

Mr. Davies, who is a strong and ardent Imperial Federationist, looks upon the Canadian-Australian line as the great link in uniting the Empire.

MARINE MOVEMENTS.

A San Francisco telegram of yesterday says: "The owners of the steamer Haytian Republic have appealed to the United States Circuit Court of Appeals for a decision of the United States District Court of Oregon, ordering the steamer to be sold for smuggling."

THE "SINKER" MADE FOR SEA.

The tug Constance removed the ship Sinker from the outer wharf to Royal Roads yesterday afternoon, where the big sailing vessel will remain at anchor until tomorrow and will then tow to sea with the Lorne.

TRIPPING INVERNESS.

A survey was held yesterday on the American schooner William Bowden by Capt. Clarke and others, but the damage sustained during going ashore the previous day was found to be so slight that it will not detain the Bowden on her voyage. She will probably go to sea today.

ACCIDENT TO THE "NORTH STAR."

In working around Williams Head yesterday afternoon the little steamer North Star lost her rudder, and had to be towed into port. She will repair immediately.

POWDERKEEPER SHAW OFFICATED.

Execution of numerous and sundry unranked dogs yesterday. The collection secured during the week was the largest and most successful the season.

THE THEORY OF THE TOR QUAY DISGUSTED.

"The theory of the tor quay disgusted the chair, but our show in General constituted." He gestured, but Senator who evidently desired exactly how power passed it.

AT 9:45 SENATOR I.

At 9:45 Senator I. at the first session of the Forty-third session of the Legislature, the Hon. Stewart continued, time to time by call senators were excused and left the chamber, and the danger line was broken by the Democrats to vote. Finally, at 10:40 impossible to get to
