BLISTERS SHOULD BE CARED

BLISTERS on the heels and toes are caused by the foot rubbing against the shoe.

Often they are very painful and may develop into a painful sore. Blood poisoning from a blister is possible, and often is a probable result when the blister is not properly cared for

erly cared for.

An excellent method for remov-An excellent method for removing a blister, especially when it is on the sole of the foot where the skin is thick, is to take a fine white thread and grease it well with boricated or pure vaseline.

Then thread a rather coarse needle and pass it through the blister. Cut the thread on each side and cover the spot under the stocking with a bit of muslin dipped in vaseline.

Next day draw the thread out.

Blisters in the hands, or on the heel, may be pricked with a needle, but be sure the needle is clean.

pain and disease alone can prevent the signs of age from fastening themselves upon women. All over this country women are awakening to the fact that the ills, aches and pains of women may be relieved by Lydia E. Pinkham's Vegetable Compound and the result is renewed life, energy and the glow of health. In fact, the secret of keeping young is to ward off all internal ailments that cause premature old age, which is easily accomplished by this remarkable root and herb remedy.
