FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

Twunn has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of ull pill—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative melicine is acrimonious and irritating to the boweits. This is not. Many of them produce so much criping pain and results in in the system as to more than counterbalance the good to be derived from them of these sulls.

the patient hitherto that almost every purgative, methods is acrimonious and irritating to the bowers. This is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction of detangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the screnn discases to which they are applicable are given on the box. Among the complaints which have been specific quied by them, we may mention Liert Complaint, in its various forms of Jaundice, Indigestion, Langore and Loss of Appetite, Listlessness, Irritability, Bilious Headache, Bilious Fever, Fewer and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient, they alford prompt and sure relief in Contraction, they alford prompt and sure relief in Contractions, Piles, Colic, Dysentery, Humors, Serofth and Scurvy, Colds with screness of the body, Ulcers and imparity of the blood; in short, any and every case where a purgative is required.

They have also produced some singularly successful curse in Rheumathem, Goul, Dropsy, Gravel, Erysipelas, Palpitation of the Heast, Pains in the Back, Stomach, and Side. They should be freely taken in the spring of the year, to purify the blood and prepare the system for the change of scasona An occasional dose stimulates the stomach at bowels into healthy action, and restores the appetite and vigor. They purify the blood, and, by their stimulant action on the circulatory system, renovate the strength of the body, and restore the system of diseased energies of the whole organism. Hence an occasional dose is advantageous, even though no serious deregies of the whole organism. Hence an occasional dose is advantageous, even though no serious deregies of the w

TO BE SOLD a SHINGLE MA

AYER'S PILLS

This is alike true of Golds, The efficit vinptums, and Billious deranguments. They all tend to become or progluce the deep scatch and formalable distangurations which load the incarses all over the land. Hence a reliable family physic is of the first inportance to the public health, and this Fill has been perfected with consummate skill to mee: that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing anything latherto known of any medicine. Our share been effected beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the sosphicon of unruth.

Among the ominent gentlement to whom we are allowed to refer for these facts, are Phor. Valenting Morr, the distinguished Surgeon of New York City.

Duct. A. A. Havro, Practical Chemist of the Portof Bostom, and Geologist for the State of Maet sachusetts.

Duch, A. A. Hayrs, Practical Chemiat of the Port of Boston, and Geologist for the State of Mass sachusetts.

Jas I. Moorg, M. D., an eminent Surgeon and Physician, of the City of Lowell, who has long used then in his extensive practice.

H. C. Sovernevez, Ben, one of the first mery chunts in sex tensive practice.

H. C. Sovernevez, Ben, one of the first mery chunts in New York Cap., one of the first mery chunts in New York Cap.

C. A. Dayrs, M. D. Sirp't and Surgeon of the United States Maria. Did space permit, we could give many hundred such names, from all control sive many hundred such names, from all control six of the medicination and study, are offered to the public as the best and most complete which the present state of nodical science can afford. They are compounded not of the drugs themselves, but of the medicinal vartace only of Vegetable remedies, extracted by chanical process, in a state of purity and combined together in such a manner so in practice between the found in the Cherry Pectrol and Phile both, to produce a more efficient bemody than shed hitherto been self-taimed by any process. The reason is perfectly jodition, while by the old mode of composition, every medicine is burdenic with language of a crimonious and injurious qualities; by this, each individual virtue only that is desired for the curatice effect is present. All the inert and obmoximus qualities of each getstance employed are left beginned, the excellent virtues only bring retained. Hence it is self-evident the effect should pure a six production one of the production of the control only of the desired with language and the production of the control only of the production of the control of the control only of the control only of the control only of the control of the co

few would be taken if their composition was known. Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject, freely acknowledge their convictions of their intunsionaries. The Cherry Dectoral was pronounced by significe men to be a wonderful medicine before its effects were known. Many connent Physicians have declared the same thing the my Pills, and even more confidently, and are writing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence, out the internal viscera to purify the blood and stimulate it into healthy action—pemore, the obstructions of the blody, restoring their are gular action to health an into your complete their control of the bloody, restoring their are gular action to lead the angular by correcting wherever they can't such daranges mentassa are the first origin of discusse.

Being sugar wrapped they are pleasant to take, and being puricy vegetable, no harm can arise from their use in any quantity.

For minute directions, see the wrapper on the Box.
