

"SALT RHEUM"

Had It On Hands For Two Years.

ITCHED SO DID NOT KNOW WHAT TO DO.

Tried Three Doctors and Went to Hospital.

All skin diseases are more or less caused by a bad state of the blood, and no one can expect to be free from some form of other skin trouble unless the blood is kept in good shape. All skin diseases can be very easily cured by the wonderful Blood-Cleansing properties of Burdock Blood Bitters.

This is due to the unrivaled purifying action of Burdock Blood Bitters on the blood, coupled with the thorough manner in which it cleanses and expels the impurities from the body.

Mrs. Richard Conline, White Head, Que., writes: "I have been bothered with salt rheum, on my hands, for two years, and it itched so I did not know what to do. I tried three doctors, and even went to Montreal to the hospital without getting any relief. I was advised to try Burdock Blood Bitters, so I got three bottles, and before I had the second used I found a big change, and now to-day I am cured."

Burdock Blood Bitters has been on the market for about 35 years and is manufactured by J. T. Milburn Co., Limited, Toronto, Ont.

INFLAMMATION AND PAIN

Cured by Lydia E. Pinkham's Vegetable Compound.

Creston, Iowa.—I was troubled for a long time with inflammation, pains in my side, sick headaches and nervousness. I had taken so many medicines that I was discouraged and thought I would never get well. A friend told me of Lydia E. Pinkham's Vegetable Compound and I tried it. I have no more pain, my nerves are stronger and I can do my own work. Lydia E. Pinkham's Vegetable Compound cured me after everything else had failed, and I recommend it to other suffering women.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from these distressing ills should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

PRIVATE OFFICE

Some to lunch back in ten minutes

Cramming down ill-chosen food, and rushing back to work, leads straight to dyspepsia, with all it means in misery.

Proper habits of eating, with a Na-Dru-Co Dyspepsia Tablet after each meal, restore good digestion, health and happiness.

A box of Na-Dru-Co Dyspepsia Tablets costs but 50c., at your Druggist's. National Drug and Chemical Co. of Canada, Limited.

WANT LIFE TO CROSS AT OAK POINT

Delegation Waits on Premier Fleming and Are Met With Assurances of Consideration of Proposals.

Oak Point, Kings Co., March 4, 1912.

To the Editor of The Standard.

Sir:—A delegation representing both political parties from the Parish of Greenwich, Kings Co., waited on the premier, Hon. J. K. Fleming, on Friday, 23rd ult., in St. John, for the purpose of impressing on the premier and his government the advisability of the Valley railway crossing the river at Oak Point instead of at The Mistake interval and Gorham's Bluff, as intended. The delegation with the representatives for Kings, Messrs. Jones, Murray, and Sprout, were, Geo. B. Pickett, O. A. Flewelling, H. R. Palmer, C. K. Connard, W. A. Seely, E. D. Whelpley, Capt. A. L. Peatman, John McKee and Mont. Belyea. The delegation was introduced by E. M. Sprout, M.P.P., in a few well chosen remarks and called upon Geo. B. Pickett to present the arguments in favor of the change which the following is a copy:

To the Hon. J. K. Fleming, Premier of New Brunswick.

"Hon. and Dear Sir:—This delegation wishes to place before you today our reasons in favor of crossing the St. John river at Oak Point with the Valley railway, instead of at the head of The Mistake, as now proposed. There are strong indications to support the view that a rock ledge crosses the river at Oak Point, lying near the surface which would greatly facilitate the construction of a bridge. The pass through the Kingston hills opposite Oak Point, which we have investigated and which comes out on the survey already made through Kingston, we consider a straighter and more practicable route, than the one proposed at the head of The Mistake. The distance to be bridged at The Mistake, is upwards of 2,000 yards, and 400 yards of that distance the water is very deep, from 40 to 100 feet and muddy. In contrast with this the distance across at Oak Point is 150 yards with a channel only 300 yards wide and the greatest depth of water, 35 feet. The remainder of the distance the water will not average more than two feet.

Three surveys were made from the head of The Mistake to Gorham's Bluff, none of them being straight because of the heavy curves between Gorham's Bluff and Kingston, and all requiring heavy cuttings and tunnelling, and one of them involving the bridging of Gorham's Creek.

As regards the commercial aspect of the case, with reference to lumber the north-east or upper side of Oak Point affords an excellent deep water harbor, and all the steamers capitalizing in its high qualities as a berth for logs preparatory to passing through the bridge. These facilities are entirely lacking at the head of The Mistake.

As far as the local use of the road is concerned there are from Oak Point to Brown's Flat, five miles below, four roads leading in from Queens county which the railway would serve if it crossed at Oak Point. From the natural condition of the country this would not be the case if the railway crossed the river at the head of The Mistake, for the reason that the nearest station would probably be at Eversdale, which is six miles further up.

As to industries other than agriculture, which we all wish to enhance, we wish to say that there is a very excellent water power one mile west of Oak Point, which, as the best, if not the best, in the lower counties of the province, with a lake system behind it that would be ample for storage purposes. This power could be made very valuable indeed if transportation facilities were afforded. This water power is well worth considering by your government, and should the railway cross the river at Oak Point every facility would be afforded for an inland town at this place, and under the circumstances and conditions that are placed before you today we ask that your government will give the whole matter here presented its most careful and serious consideration.

On behalf of this delegation, I have the honor to remain, Very sincerely yours,

Geo. B. PICKETT.

The Premier's reply was all that could be asked for, as he assured the delegation that before any contracts or location surveys were made he would have the proposed routes surveyed, and if the facts were borne out by the survey, the length of the road, not materially increased, he thought there would be good reasons for changing to Oak Point. Every member of the delegation spoke in the highest terms of the cordial manner in which they were received by the Premier and the assurances given.

O. A. FLEWELLING.

WHITE'S COVE NOTES.

White's Cove, Mar. 4.—Henry Duroal who has been laid up with rheumatism for some days, is able to be out again.

Ed. Young, Chester Dean and Son and Kelley Bros., who are doing considerable lumbering, are all hauling into the Little lake.

Dr. Hugh A. Farris left for New York last Monday.

John Orchard, a former resident of this place, but now of Apohaqui, spent a few days here last week.

Mrs. C. W. White who was thrown from a sleigh some days ago was badly shaken up, but no bones were broken and is now very much improved.

Bernard Kelley, of White's Point has been in poor health for some weeks, but is a little better.

Geo. Slocum, of city market, and O. S. Dykeman, of Simonds street, were here buying produce last week. John D. Reardon is still at Joness with his gasoline engine sawing up wood piles for the natives.

The quarterly O. B. of Methodist church will meet at Young's Cove on the 15th, when the vote on church union will be taken for Grand Lake circuit.

How to Kill 199,000,000,000,000,000,000 Flies with One Swat!

To the lives of the people of the United States would be added 170,000,000 years or 4,900,000 lives to the present average length; and \$20,000,000,000 would be saved if the musca domestica was as extinct as the dodo. The musca domestica's other name is housefly; doctors say it should be "typhoid fly."

Most everybody realizes that the fly is our most dangerous animal; that hundreds of thousands of deaths can be traced directly to that deadly carrier of disease germs. That is why whole cities fight the fly every summer: why we screen windows and doors, cover garbage cans, clear away manure heaps, drains, stagnant water and swat every fly we can swat—an annual and costly campaign.

It takes countless numbers of swats to make even the least impression on the billion billions of flies that infest the country. There's a better way. One can annihilate 199,000,000,000,000,000,000

flies with one swat if one goes at it right.

Do it now! Do it before hot weather! That's the secret of fly swatting. If there is a female fly wintering (or enjoying the spring) in your kitchen, or attic or basement, she is due to hatch out six or more batches of eggs. 120 eggs at a time, if she lives, and all of her youngsters are the most prolific creatures in the map. A fly expert has figured it out that from a single female fly 199 quintillion of the dreaded typhoid flies may claim descent in one season, provided, of course that all the young flies grow up.

By swatting Mrs. Fly now you

save yourself the trouble of killing her descendants this summer.

Swat, swat, swat, the boys and girls are swatting.

Ma and Pa are also swatting round; your swatting—

Some day we shall live in flyless towns!

In a two weeks swatting campaign against flies in Washington, D. C., last summer, 7,000,000 flies were killed by the children. The health department backed the youngsters' swatting war on flies and distributed prizes to the best swatters. Layton Burdette, 13, won the first prize, with 333,400 dead flies to his credit. Health Officer Woodward is of the opinion that the value of the flyless city campaign cannot be overestimated. He says that the fly can be driven out of existence by determination, patience, traps and swats.

BISHOP'S COLLEGE DOING A VERY IMPORTANT WORK FOR THE CANADIAN BOYS

Bishop's College School at Lennoxville, P. Q., worked on the lines of the great public schools of England, has devoted itself for close upon seventy years to training the boys of Canada, and it is no exaggeration to say that it has been an important factor in moulding the national character.

The school was first opened in the village of Lennoxville by the Rev. Louis Dutilleul, rector of Sherbrooke and Lennoxville, and was moved to its present site in 1869. In 1842 Mr.

Edward Chapman, M. A. of Calus College, Cambridge, became its headmaster. Dr. Miles succeeded Mr. Chapman and reigned until 1851 when the Rev. J. Butler, M. A., was appointed headmaster, this gentleman occupied the position till 1857. From this date the list of rectors and headmasters is: 1857-63—Rev. J. W. Williams, M. A. D. D. afterwards Bishop of Quebec. 1863-67—Rev. G. C. Irvine, M. A. St. John's College, Cambridge, previously professor of mathematics at Trinity, Toronto.

1867-70—Rev. R. H. Walker, M. A. Wadham College, Oxford, previously professor of mathematics at Sandhurst, England.

1870-77—Rev. C. H. Badgley, M. A. Queen's College, Oxford, previously headmaster of Trinity College School, Port Hope.

1877-79—Rev. P. C. Reid, M. A. Lincoln College, Oxford.

1879-83—Rev. I. Brock, M. A. Queen's College, Oxford.

1883-85—Rev. J. A. Lobley, M. A. D.C.L., Trinity College Cambridge.

1885-91—Rev. T. Adams, M. A., D.C.L., St. John's College, Cambridge, who was the last of the rectors.

1891-93—H. J. H. Petry, M. A., D. C. L.

1903-09—Rev. E. J. Bidwell, M. A. D. C. L., Wadham College, Oxford.

1909-10—Rev. W. D. Standfast, B. A., Jesus College, Oxford.

1910—J. Tyson Williams, B. A., Emmanuel College, Cambridge, the present headmaster.

The old school has turned out many famous men, and in a speech made at the Old Boys' Reunion dinner in Montreal by Dr. Peiry, a former and very popular headmaster, reference was made to the general, the leaders in the medical and legal professions, and the captains of industry that the school has given to the world.

Mention must be made of the Preparatory School. With its own buildings and grounds where the little boys between 7 years of age and 13, are housed, they have their own life entirely separate from the bigger boys, and the prevailing note is happiness. They have the use in their own time, of the rink and gymnasium, and they attend the chapel services. It is under the charge of an experienced housemaster, and is subject to the general supervision and superintendence of the headmaster.

The present headmaster, Mr. J. Tyson Williams, B. A., Emmanuel College, Cambridge, has had a long experience in school work and has served in his time as assistant master under the Rev. A. W. Upcott, D. D., headmaster of that historic school—Christ's Hospital, and also under the Rev. E. J. W. Houghton, D. D., headmaster of the famous English school, Rossall. He has been identified with the school for about nine years—for six years as headmaster of the Preparatory School and for nearly three years as headmaster of the school. Mr. Williams is thoroughly familiar with all phases of school life, and having in his younger days been a fine athlete he still retains that freshness of mind which enables him to enter heartily into the lives of the boys, and to take a deep interest, not only in their general life, but also in their games.

He took over the school at a difficult time, but the following extract from the last report of the examining—Dr. Fryer and Professor Dale of McGill—will show that he has met with success in his work: "We have no hesitation in saying that under the new headmaster the school has quite recovered its tone. The improvement in the general atmosphere is very noticeable. For this the school and, we may add, the Board of Trustees, certainly owe a great debt to Mr. Williams. He assumed the duties of headmaster under most trying conditions. Assisted by an exceptionally well-qualified staff, he is gradually bringing the school up to a high standard. The work and evidence of this in the thoroughness displayed in the examinations."

Mr. Williams is assisted in his work by an able staff of generous and generous-minded men, who have the best interests of the school at heart and never spare themselves in their efforts to promote the interests of the boys, with whom they are deservedly popular. The housemaster in the upper school is J. Ramsay Montgomerie, M. A., Bishop's College, an old C. S. boy, and the housemaster in the preparatory school is the Rev. H. R. Gattorna, F. R. G. S., who is also assistant chaplain of the school. Both these gentlemen have rendered valuable service to the school.

The domestic arrangements and the care of those who are ill are in the hands of Miss Jeffery (upper school) and Mrs. Holt (preparatory school) both of whom have done much good work.

The health of the school is under the care of Dr. J. B. Winder, an old boy, who has proved himself a most able and conscientious doctor.

The old school has had a long and honorable career. Many of its old boys hold the highest positions in the Dominion and in other parts of the Empire. It is endeavoring as it has always done, to provide a real training in truth and moral courage, and to cultivate a high standard of character and conduct which combined with scholarship and careful training will turn out the type of man the country

HOW TO DESTROY THE DANDRUFF GERM

BY A SPECIALIST.

That the dandruff germ is responsible for nearly all the diseases to which the scalp is heir, as well as for baldness and premature gray hair, is a well known fact, but when we realize that it is also indirectly responsible for many of the worst cases of starvation and consumption, we appreciate the importance of any agent that will destroy its power. We are, therefore, particularly pleased to give herewith the prescription which an eminent scientist states he found, after repeated tests, to completely destroy the dandruff germ in from one to three applications. It will also almost immediately stop falling hair and it has in numerous cases produced a new hair growth after years of baldness. This prescription can be made up at home, or any druggist will put it up for you: 6 ounces Bay Rum, 2 ounces Lavender Compound, 1/2 drachm Menthol Crystals. Mix thoroughly, and after standing half an hour it is ready for use.

Apply night and morning rubbing into the scalp with the finger-tips. If you wish it perfumed, add half a teaspoonful of To-Kalon Perfume, which unites perfectly with the other ingredients. While this preparation is not a dye, it is unequalled for restoring gray hair to its original color.

Caution—Do not apply where hair is not desired and be sure to avoid tonics containing poisonous wood alcohol.

Today the school is carrying on the work begun so long ago, the great traditions which have been handed down are kept constantly in view, and there is an earnest desire among the present boys to live up to these traditions, and to do nothing to tarnish the fair name of the school, its historic cadet corps founded by Captain Rawson—whose son, Wyatt—an old boy—died a glorious death in the trenches at Tel-el-Kebir, after guiding the army across the desert by the stars the previous night, and whose last words were, "General, did I not lead them straight?"—still flourishes and wins high praise every year from the inspecting officer.

In the fine and up-to-date gymnasium the physical instructor holds daily classes and every attention is paid to physical drill. No boy is allowed to overtax his strength, and regular records are kept of a boy's physical development.

Apart from the serious work of the class room there are visible signs of a boy's life at Lennoxville and one may mention the boxing competition, the cross country run, the library and reading room, the debating society, the photographic and scientific society, the musical society—each department being in charge of a master and senior boy.

This varied life, coupled with certain responsibilities, teaches a boy the doctrine of personal responsibility more distinctly than any other system, and there is no doubt that the best way to prepare for the freedom of a man is to give the boy at school some freedom and to hold him responsible for his use of this freedom. It helps to train his self-reliance, self-control, and sense of honor and it is because of this system that Lennoxville has turned out so many fine men.

For more where a border of hardwood is required the flooring is just as good as our regular stock in long lengths and costs much less.

needs. It has suffered in the past from want of endowment, but a whirlwind campaign has been organized to raise \$250,000 for this purpose. The hearts of all old boys will go out to the school at the present time, and there is no doubt that it will receive the hearty and loyal support of every Lennoxville "boy," and inspired by love and gratitude, and their friends will contribute liberally, and thus make it possible for the school to become a greater power for good in the country than it has been even in the past. The secretary of the general committee is G. Herbert Carter, Esq., 218 Notre Dame street West, Montreal, who will be glad to hear from old boys.
