THE

## HURFORD BOLT AND SCALPER

Hurford Reels and Scalpers are furnished in one, two, and four reel chests, 6 feet, 8 feet, 10 feet, 12 feet and 14 feet lengths.

Are also extensively used to replace six sided reels in old chests, doubling the capacity and greatly improving the quality.

No change of driving gear necessary.

Pillsbury has 30 Hurford Reels doing the work of 60 six sided reels in the "A" mill at Minneapolis.

We contract for mills complete on our improved system of rolls and bolting, and guarantee the same the best in Canada.

The only Round Reel with inside brush, and no Round Reel will do satisfactory work without it.

In a recent test of the most approved modern round reels, made at the Galaxy mill in Minneapolis under the exclusive auspices of the proprietors of the mill, the Hurford Reel scored an unqualified victory, showing more than double the capacity and far better results than any of its competitors.

We have made arrangements with the manufacturers of the Cochrane Roller Mill Supply Co. as special agents for the sale of their train roller mills. Parties wishing information as to purchase will do well to write us for prices and other information.
