

MISCELLANEOUS.

Bangles for dogs' legs are the latest foolishness.

Only a little pinch of salt should be used with eggs in custard.

Rice, boiled very dry, is acceptably served with fish instead of potatoes.

Sometimes a woman has real golden hair and sometimes it is only plaited.

There is no emergency of life that the average woman does not think can be met with cut flowers.

Many a man who objects to carrying a bundle home from the provision store goes home from the barroom loaded.

When a brother comes to deal with the mistakes of a brother, he should remember his own frailties, and in gentleness rebuke, in kindness instruct, and in love admonish.

Playwright—I have a new spectacular drama which will prove a great attraction. Manager—Of what does it consist? Playwright—Chiefly of an Arctic scene in which there are blocks of real ice.

Little Tommy had spent his first day at school.—“What did you learn?” asked his auntie on his return. “Didn't learn anything,” said Tommy. “Well, what did you do?” “Didn't do anything. A woman wanted to know how to spell ‘cat’ and I told her.”

A Philadelphia bachelor has a large frame filled with photographs of young ladies, under each of which is pasted a newspaper clipping. With a pathetic accent the poor man exclaims: “They are pictures of the only girls I ever loved, and those clippings are their marriage notices.”

Argand, a poor Swiss, invented a lamp with a wick fitted into a hollow cylinder, up which a current of air was permitted to pass, thus giving a supply of oxygen to the interior as well as the exterior of the wick. At first he used it without a glass chimney, but one night while sitting by it, his little brother was amusing himself by placing a bottomless oil flask on different articles. Suddenly he placed it on the flame of the lamp, which instantly shot up the long circular neck with increased brilliancy, and at the same time flashed into Argand's mind the circular chimney, by which his invention was perfected.

A German wool-polish is thus described: Three kilograms of shellac dissolved in pure spirits; then some collodion is to be put in a flask and moistened with sulphuric acid and some camphor added. These substances are to be stirred well together, after which spirits are poured in. Now both solutions are to be poured together and shaken well. This polish is to be rubbed in with an oil prepared in the following manner: Some camphor is dissolved in good rose oil—as much of the former as the oil will hold in solution. The polish already prepared is diluted with spirits of benzine and reduced at pleasure, so long as it retains sufficient body to give the desired result.

**Hotter the Weather Bigger the Proof.**

As the weather grows warm, the sale of James Pyle's Pearlina Washing Compound rapidly increases. This proves that many women recognize the fact that Pearlina makes washing and cleaning very much easier than when done with the ordinary means. Proves also that summer clothing, being of delicate texture and color, will not stand the rough usage necessary when washed with soap, and establishes the fact that PEARLINE, in doing away with the rubbing, lessens the wear and tear and fills a very important place. Delightful for bathing in fresh or salt water. Its ingredients render it harmless to the most delicate skin. Especially during the hot weather it is to your advantage to use Pearlina, and only humane to supply your servants with it, and thus lighten their labors; besides you insure much better results.

Beware Peddlers and some unscrupulous grocers are offering imitations which they claim to be Pearlina, or "the same as Pearlina." IT'S FALSE—they are not, and besides are dangerous. Pearlina is manufactured only by JAMES PYLE, New York.

**DR. A. WILFORD HALL'S HEALTH PAMPHLET.** Health Without Medicine.

Read the Following Testimonial: "DEAR SIR.—I was among the very first to order Dr. Hall's Health Pamphlet on seeing its announcement in the Microcosm. I was then in Washington City, and proceeded immediately to put the new treatment into practice personally and with others, more especially to test its physiological and therapeutical effects. I have become so well convinced of its value for the alleviation of many forms of disease, such as dyspepsia, lung troubles, constipation, kidney derangements, and in fact all forms of disease which have their origin in an impure state of the circulation, that I am ready to give it my unqualified indorsement as a potent adjuvant in the treatment of such cases.
