Gossip.

OURVILLE FARM HOLSTEINS.

Every breeder of Holstein cattle in Canada is familiar by reputation if not by acquaintance, with the noted Ourville herd of Laidlaw Bros., of Aylmer, Ont., for probably no other herd in Canada has produced so many heavy producers nor made so long an array of official records. At the present time the herd is about 100 strong. Comfortably housed in the commodious stables at the time of a visit by a representative of this paper were some fifty head yielding a copious flow of the lacteal fluid through the gentle art of hand milking, for Laidlaw Bros. have no use for artificial milking. Passing back and forth through the stables we were particularly struck with the remarkable uniformity of type and udder development of the entire lot, which was convincing proof that the greatest possible care has always been exercised in the selection of breeding sires and their official backing. Putting the official production of the herd in a nutshell, seven of the mature cows' records average 25.50 lbs., and some of them much higher. Nine of the four-year-olds average 22.83; ten of the three-year-olds average 20.49, and twenty of the two-year-olds average 16.44. Eight of the two-year-olds in the R. O. P. test average 12,361 lbs. milk, and 551 lbs. of butter in twelve months. Over half the herd are daughters of Dutchland Colantha Sir Abbeke, a son of Colantha Johanna Lad, with 80 A. R. O. daughters, three of them over 30 lbs., and three others world's champions in R. O. P. tests, one two-year-old giving 22,750 lbs. The dam of the Dutchland bull was Tidy Pauline De Kol, record 28.44 lbs. This bull has now 22 daughters in the records, one of them with 26.50 lbs. as a three-year-old. Following him was the great bull, Royalton Korndyke Duke, a grandson of Pontiac Korndyke, and his sire's dam a daughter of the renowned Hengerveld De Kol. The dam of this bull was Royalton De Kol Calla, record 31.76 lbs. She and four of her sisters averaged 112 lbs. of milk a day. The present stock bull is Royalton Canary Alban, a grandson of Canary Mercedes Alban, with two 30-lb. daughters and 28 others in the A. R. O. The dam of this bull, under most unfavorable conditions, made 26.28 lbs., which is not near her capacity. All the young things, including a number of young bulls, are sired by the two last-mentioned bulls. In the herd for sale are high-class young herd-headers and a number of females.

Ventilation of Farm Building.

Ventilation of Farm Buildings is the title of a recent bulletin prepared by J. H. Grisdale, B. Agr., Director of Dominion Experimental Farms, and E. S. Archibald, B.A., B.S.A., Dominion Animal Husbandman, and issued as Bulletin No. 78 of the regular series of the Experimental Farm Bulletins. This is an illustrated publication of thirty-two pages, and treats exhaustively of the subject of ventilation.

During the past few years or more, much experimental work has been carried on at the Experimental Farm in farm building ventilation, and the results of these experiments are clearly outlined, and from them numerous deductions are set forth, and these only after most thorough investigation and repeated trial under every likely condition or handicap. The bulletin is divided into three parts: Part 1 is entitled Ventilation the Cow Barn; Part 2, Ventilation the Horse Barn; and Part 3, Ventilation the Piggery.

The Rutherford System of ventilation, which is fully described and illustrated in this bulletin, is now in operation in the barns and stables on all Experimental Farms and Stations from Prince Edward Island to British Columbia. Copies of this bulletin in a few of the Branches of the Dominion Experimental Farm, Department of Agriculture, Ottawa.
