J. Bradley & Co., Bawlf, Alta.

CAREY'S
MAGNESIA FLEXIBLE CEMENT
SHEETS NAILED PAT'D LAP UP
LAP CEMENTED DOWN
ROOFING

WHY Carey's is the Time-Proof Roof

CAREY'S Roofing has well earned its reputation of making the only really "time-proof roof." In laying it, the lower sheet extends two inches under the upper sheet. (See illustration.) The two sheets are securely nailed on to the roof boards, after which the Carey patent lap—an extension from the upper sheet—is cemented down and over nail-heads and seam, making an absolutely perfect, water-proof, wind-proof, rust-proof, sun-proof and time-proof union of sheet to sheet and Roofing to roof board. Then again, Carey's Roofing resists fire, will not melt, rot, dry out, crack, break nor lose its elasticity. It is equally adapted to flat or steep surfaces. For these and other good reasons fully set forth in our free booklet, Carey's is everywhere accepted as the best protection for any and all buildings about the farm.

Carey's Roofing is cheaply and easily laid over old shingle or metal roofs. Sold at Manufacturers' prices from nearby distributing point, insuring lowest freight rates. Write to-day for FREE sample of Carey's Roofing and our interesting booklet.

Guarantee Against Unsatisfactory Harvesting

WHEN you purchase a Deering binder you secure insurance against unsatisfactory harvesting. It's just as important to insure your crops against unprofitable harvesting as it is to insure your property against fire loss.

Harvesting a good crop with a poor binder will hardly be more profitable than harvesting a poor crop with a good binder.

You see how essential it is to have a good binder. You must have a machine that will harvest all your grain quickly and economically so that you will be able to realize every dollar possible out of your crop; in other words, you need a Deering.

The Deering binder is built to cut, elevate and bind all the grain, no matter in what condition the field may be.

The reel will bring tall or short, down and tangled grain to the sickle without fail; the elevators will handle it whether it be light or heavy, and the binding attachment will throw out nice even baled bundles.

When a field of grain is harvested with a Deering, you won't find crow's feet scattered all about; you won't find the grain lying in

patches where the reel never picked it up. The Deering is built to harvest the crop in the right way.

Deering binders can be purchased with either a 5, 6, 7 or 8-foot cut.

The 8-foot binder is equipped with a tongue truck, which materially reduces the neck weight and draft.

The Deering line of harvesting machines is complete and includes, besides grain and corn harvesting machines, a complete line of laying machines, mowers, tedders, various styles and sizes of rakes, hay stackers and loaders.

Call on the Deering agent and let him explain to you why a Deering machine harvests in the right way. These local agents are found everywhere, and will be pleased to give information and a catalogue concerning the Deering machines.

LANDS LANDS LANDS

30,000 acres wheat lands in the famous **Goose and Eagle Lake country**, with homesteads adjoining.

Call or write for information.

C. W. Blackstock & Co.
Rose St., REGINA, SASK.

SYNOPSIS OF CANADIAN NORTH-WEST

HOMESTEAD REGULATIONS.

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry may be made personally at the local land office for the district in which the land is situated.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,

Deputy of the Minister of the Interior.
