

30 PERCHERONS

Also Shires, Hackneys and Clydes, have just arrived with our new importation from Scotland, England and France, of high-class stallions and mares. Many of them prizewinners in their native lands. Bred by the best breeders. Percherons, blacks and grays, weighing 1,600 to 2,000 pounds. Shires at two years old weighing 1,700 pounds. Clydes, bays and blacks, 4 and 5 years old, weighing 1,300 to 2,000 pounds, bred by the best in Scotland. Our Hackneys are bays and chestnuts, combining size, quality and breeding that cannot be beaten. We have a few first-class young stallions that we will sell at cost, to make room for our next importation; and all for sale at reasonable prices.

Clydesdales, Percherons and Hackneys

I have still on hand 12 Clydesdale stallions, 4 Clydesdale fillies, all imported; Scotland and Canadian prizewinners; 3 years old, that will make 2,000-lb. horses of choicest quality and richest breeding; 4 black Percheron stallions, 3 years old, big, flashy, quality horses, and 6 Hackney stallions, 1st-prize and championship horses among them. Will sell reasonable and on terms to suit.

DR. T. H. HASSARD, Millbrook P.O. and Stn.

GRAHAM BROS.

"Gairnbrogie," CLAREMONT,

IMPORTERS OF

HACKNEYS and CLYDEDALES

Established 80 years, and winners at all large shows in Canada and United States. Best of stock always on hand for sale. New importation of Royal winners just arrived.

40 WAVERLY HACKNEYS 40

Imported Stallions and Fillies.

Every one a high-class actor and a show animal. Splendidly-matched pairs and singles. Positively the highest class lot of Hackneys to be found on any farm in America. All ages. Also 4 imported Clydesdale fillies. A big, flashy lot, full of style and quality.

QUESTIONS AND ANSWERS. Miscellaneous.

INDIANS HUNTING.

Has an Indian a right to go hunting when he likes and where he likes?

Ontario.

A SUBSCRIBER.

Ans.—Certainly not. Any exceptions in his favor with reference to the provisions of the Ontario Game Protection Act (of 1900), and any special privileges accorded to him, are indicated by section 32 of that Act, and sections 66, 124, 125, 126 and 165 of Chapter 81 of the Dominion Act respecting Indians (revised statutes of Canada, 1906). Generally speaking, as to hunting elsewhere than on the Indian reserves or hunting grounds, he is in the same position in relation to the fish and game laws as any other person.

PLANTING RASPBERRIES.

I have a sand farm, and was wishing to plant a few raspberries this spring. Please let me know what preparation the soil would require, the time of planting, the distance apart of the plants, and any other information that you can give on the matter. Would the same rules apply to the growth of the black caps?

A. J. B.

Ans.—Black-cap plants are obtained by burying the tips of the growing canes, late in the summer, when they begin to thicken and throw out roots. When thoroughly rooted, the layer is severed, and the "tip" is used for planting. Reds throw up numerous suckers from the roots, and these are most often used in planting, though root cuttings may be used. For near-by planting, the early suckers, moved in early summer, may be used. Planting may be done either in spring or fall. Spring is preferable for black caps. Prepare the land deeply and thoroughly, working in, if necessary, a fairly liberal application of manure. Plant in rows, six feet apart, with plants five feet apart in the rows. Give clean, thorough cultivation, until about the beginning of August, never allowing the soil to become crusted. Pinch off any blossoms that form during the summer, so that the plants may not waste their energies trying to produce fruit the first year. Plants secured from young plantations are preferable, since they possess greater vigor and are less likely to carry disease.

CEMENT-CONCRETE CELLAR WALL.

1. How much cement will be required to build a concrete wall in a cellar, 26 feet by 36 feet by 7 feet by 1 foot?
2. Is it necessary to have the walls 1 foot thick? There is a cellar wall in this vicinity only 8 inches thick.
3. There is also a cellar wall in this vicinity built of broken stone and a mortar made of one part cement, three of lime and five of sand. What do you think of a wall built like that?
4. In placing a house on level ground, and wishing to have a cellar under it seven feet deep, at what depth would you start the foundation?

E. McF.

Ans.—1 and 2. We advise making the wall not less than ten inches thick, and a foot is better. A good eight-inch wall would undoubtedly support an ordinary frame house, but one would feel rather safer with a stronger foundation. Besides, the thicker the wall, the more effective it is in keeping out frost. The wall above mentioned, if made of concrete, mixed one part Portland cement to ten of gravel and small or broken stone, would require about 25 barrels of cement. The gravel should contain a proportion of fine, gritty—but not earthy—material. If it is all coarse, use one-third coarse, clean sand and two-thirds gravel. By imbedding all the field stone possible, the amount of cement might be reduced to rather less than 25 barrels.

3. The mixture of lime and cement is not to be recommended. It is not an economy, and does not make so satisfactory a wall as all cement.

4. All depends on the drainage. The nearer the house is to the ground, the easier it is to heat in winter and keep cool in summer, the better for the cellar, and the more convenient for the housewife. For appearance sake, and for convenience in lighting the cellar, the cellar wall may extend a foot and a half above ground level, but need not be more.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Toronto, Ont.

Kendall's Spavin Cure

Here is just one case out of thousands—

HAMIOTA, MAN., March 13, '06.

Genuine mfd. only by W. F. Young, P.O.F., 73 Monmouth St., Springfield, Mass. Canadian Agents, Lyman, Sons & Co., Montreal.

Imp. Clydesdale Fillies!

Have now on hand about a dozen, nearly all imported. A high-class lot and very richly bred. Combine size and quality, and all in foal. Also one-year-old stallion. Write me, or come and see them. Nelson Wagg, Claremont P.O. & Stn.

SHETLAND PONIES!

P. McCullough & Son, Breeders and importers of Shetland ponies, Markdale, Ont. We showed 8 ponies at Toronto Exhibition in 1906, and got 8 prizes: 3 firsts, 4 seconds and 1 third. All our ponies are imported. Our stallion, Foxglove, took first prize at Toronto. Our mare, Bessie, took first prize, and their foal, Bruce, took first prize also. Good accommodation for mares sent from a distance to breed. Ponies for sale. Our address: Markdale P.O., Ont.

CLYDEDALES and Shorthorns—Four Imp. Clyde mares, 2 and 3 years old, bred in the purple—two of them in foal. One filly, rising 1 year, sired by the great Macqueen—registered. Three Shorthorn bulls from 8 to 13 months Scotch. A few heifers. All sired by Scotland's Fame—47897—by Nonpareil Archer (Imp.), John Forgie, Claremont P.O. and Station.

CLYDEDALES AND SHORTHORNS—Canadian-bred, registered. One stallion, rising 3, by Imp. Macqueen. Two stallions, rising two, by Imp. Primrose. Also my stock bull, Gilbert Logan 35424. W. D. PUGH, Claremont P.O. and Station.

"Lady," began the wanderer, "kin I chop some wood fur you."

"No, thank you," replied the up-to-date housewife; "we cook and heat entirely by electricity."

"Nothin' I kin do to git a bite to eat?"

"Yes. If you care to peel the shocks from the electric wires I'll allow you to eat the currents."
