towards heating a house if fed into a Furnace made to heat one which does not send the fuel up the chimney in smoke.

'Sunshine' Furnaces will extract more heat from a unit of coal than any other good Furnace. Every square inch from the bottom of fire-pot to top of dome is a direct radiating surface.

The dome is made of heavy steel-plate, which makes it more effective heater than the cast-iron dome put in common Furnaces.

The 'Sunshine' has the ever-improved feature and still is so simple that any person can operate it.
