BELLEVILLE - CANADA

**Talk of the Town and of the Country**

Captain Frank D. Graham, M.D., M.R.C.S., formerly of the medical staff of the Ontario Hospital at Brockville, and now an officer of the Royal Army Medical Corps, was in Brockville Thursday night visiting friends and on leave from England. He enlisted in British Columbia with the C.A.M.C. and overseas was sent to India with a mobile frontier force. While there he contracted malaria and was invalided to England, returning to Canada at the commencement of this month. Capt. Graham reports at Aldershot early in July.

We are pleased to note that the pupils of Miss Edith Pitcher, who recently tried their Toronto Conservatory of Music examinations, were very successful passing as follows: Primary piano, Lorena Kemp, Frankford; elementary piano, Margaret Macaulay, Marjory Badgley, Frankford; introductory piano, Ruby Snider, Frankford.

The Women's Institute of Kemptville has decided to build at least one bathroom and possibly two on the banks of the Rideau river this summer to provide accommodation of children of the village. The river is to be deepened and obstructions removed. The institute already hold \$300 for this purpose and proposes to raise the remaining sum by popular subscription.

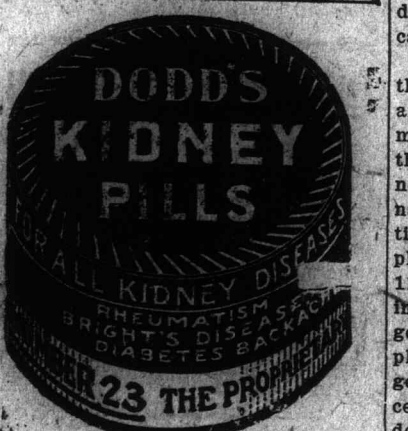

Professor T. S. Scott, who has been on the staff of the Faculty of Applied Science at Queen's University for the past five years, has tendered his resignation.

In 1915 Prof. Scott was appointed acting professor at the university, supplying for members of the staff who had enlisted in overseas units on lecturing in railway and municipal engineering. One year he spent at Halifax with the Royal Canadian Engineers and on his return he was engaged by the university to develop a course at the college in highway engineering. This course was begun following the grant made by the Government a year ago of twenty million dollars for highway construction. The Government has failed to assist Queen's in financing such a course and the authorities have decided to drop the course.

Prof. Scott is going to Brockville shortly in connection with a road paving contract.

A new train running via Rome, Richland and Watertown to Clayton, N.Y., operating under the new summer timetable, effective June 27th, will move earlier and quicker service between Watertown, N.Y., and New York and the south, although designed primarily to meet the demands of the Thousand Island region. This train, with the New York-Clayton sleeper, will reach Watertown at 6.05 o'clock in the morning, leaving at 6.15 o'clock for Philadelphia and Thousand Islands. It will bring the Syracuse papers into Watertown forty minutes ahead of the present service.

Lying upon the ground under a farm house window, 50 miles north of Kingston, John Naylon of the Kingston police force, found the jewels valued at more than \$100, which were stolen three days ago by a young girl working at a house in

**DODD'S KIDNEY PILLS**

FOR THE RAPID CURE OF ALL KIDNEY AFFECTIONS

23 THE PHARMACY

Kingston. On hearing the police arrive she evidently tossed the valuables out of the window. The girl, 16 years old, came to Kingston three weeks ago intending to become a housemaid. Receiving employment in one of the most congenial houses in that city, she started to work and apparently was doing well. The temptation was too much for her however. She left quite suddenly early in the week taking with her a diamond ring and several other trinkets of jewelry. The police were notified and a search warrant was issued. No arrest was made as the family in which she worked felt that she has had her lesson.

Sir Lomer Gouin, Prime Minister of the Province of Quebec, accompanied by Lady Gouin, returned to Montreal from a trip to Europe. The Premier said that what was causing the greatest interest in Europe was the wealth of Canadian forests, and added that several syndicates with large capital, both in France and England, were coming to Quebec Province to secure forest lands. He said that he expected to see a large influx of technical explorers come out to that Province in the near future to look into its mineral resources, and later encourage immigration from France, Belgium and England. J. C. Downie, Governor, Winnipeg Man., having introduced movies as part of the routine of the provincial lock-up, is now arranging a series of concerts and lectures for his guests. They are to become a weekly feature of the jail programme. Governor Downie holds to the theory that education and humane treatment are the best medicine for criminals.

From tables just published at Ottawa, by the poultry division of the experimental farms showing the totals of all pens entered in the different egg laying contests in Canada, pen number two in the Canadian egg laying contest at the central experimental farm Ottawa has the highest total. This pen's total up to April 30th from November 1st last was 898 eggs. It has been recently bought by Dr. S. Lafortune, Gatineau Point, Que., from J. E. Rhoades, Ottawa.

The Kingston police magistrate heard of a new drink at Friday morning's session. It is not a new drink to the public at large, but Friday was the first time that a tippler claimed that he got under the influence of liquor on it. Some person has said that there is nothing new under the sun, but from time to time the police court hears something new. We have all heard a lot about lemon extract, dandelion wine, port wine, Florida water, etc., but it remained for a poor unfortunate before the magistrate on Friday to put over the rhubarb wine. It is to be hoped that the drinkers will not take to it too heavily, as it will mean that the price of rhubarb will take a big jump on the market and then it will be a case of goodbye to the pie's mother makes.

In a communication to the Brockville R. & T. Mr. John L. Publow, former well known resident of Brockville, who has been a resident of Calgary, Alta., for some time, says the crop prospects in the southern part of that province are not looking any too rosy owing to hot winds and no rains, but in the northern portion conditions are much improved.

Strawberries sold in Kingston Friday at 45 cents a basket and at Malorytown, forty miles to the east, at 27 cents. Can they grow fruit cheaper in Leeds than in Frontenac?

The Kingston Automobile Club have had road signs prepared for the district north of Verona. Some of the County Councillors who were in Kingston last week from the northern part of the county have consented to assist in placing these signs and took them with them when the County Council session was over.

The annual June ball was held at the Royal Military College, Kingston on the evening of June 21st. His Honor, the lieutenant-governor of Ontario, Hon. Lionel Clarke, was in town for the ball and will take part in the programme on diploma day, June 23rd, presenting the prizes and diplomas awarded to the gentlemen cadets.

At 10 a.m. he will be received by the battalion of gentlemen cadets and there will be an inspection and march past. At 10.30 he will inspect the buildings and witness an engineering demolition; 11 a.m. the gymnastic squad will put on an exhibition; 11.30 the third class will give physical training and outdoor games; 11.40 the first class will give a riding exhibition. At 2.30 p.m. the governor will present prizes and diplomas. The commandant, staff and gentlemen cadets will be glad to receive any friends of the cadets who desire to be present to witness the

events. The commandant regrets very much that he has been obliged to give an order to shut the main gates at night owing to the extensive damage done by cars. During an social function at the college on the evening the gates will be open.

A good joke is going the rounds in Kingston, says the Whig, about a Kingston man who planted aspirin tablets in his garden the other night. Hubby spent a busy time getting the garden in shape for the planting. His good wife came out with a package of what she believed to be carrot seeds, but when the man, who was doing his best for increased production, investigated, he found that he had been dropping aspirin tablets in to the ground.

Wednesday afternoon a young man named A. Gilmour, a prisoner at Pictou jail on a charge of theft, made good his escape. He was allowed out to assist in cutting grass on the lawn when he took French leave. He wore a grey cap and dark trousers and wore a pair of running shoes.

Becham Trotter, Brandon, Man., a former resident of Pittsburg township has written a letter to the Brandon Sun, recalling events of other days. Speaking of the disappearance of old buildings, he writes that in a general store on the site many a tenderfoot, who thought of starting a chicken ranch asked if the eggs should be planted in hills or ditches and many a farmer started out to farm with a double-barrelled gun. He tells of a farmer in Brandon, offered 14c a bushel for his grain, "drove down to the river and backing up to the swift current shoveled his grain into the water."

An unusual form of excitement stirred the village of Portsmouth Thursday night. A patient from Mowat Hospital on crutches, who was taking a rest in Aberdeen Park was suddenly heard crying, "Catch that man" and hobbling after a man who was running through the park. The chase was taken up by the villagers within hearing distance, but the unknown man escaped into the penitentiary grounds. The returned soldier claimed that he recognized the fugitive to be a man who had stolen \$50 from him at an earlier date.

A very dangerous practice seems to be spreading among the boys of the city of Kingston. It is that of stalling rides on the spare tires of automobiles, a habit which obviously might result in a serious accident. In New York City motorists have their tires guarded with spikes.

A practical committeeman, in presenting diplomas last June to a graduating class spoke as follows: "Girls, in presenting you these diplomas, it is by their significance you are led to allow your mother to do all the work, bake all the bread, sweep all the floors because you can read Latin or demonstrate a theorem in geometry, then has your school been a most unfortunate course, and in all the teachings you have ever received at my hands, I trust there has been no lesson that has weaned you from the dish pan. Boys, if from this graduation you go out into the world too nice to carry wood and swing the hogs if need be, then has our school failed in its purpose and sown the wrong seed."

Charles J. Foy, barrister, of Perth, received a message stating that his son, Leo, had fractured his ankle after winning the high jump at the field sports at Loyola College in Montreal. Up to the time of the accident he had won three medals, and had the accident not occurred would have won a championship cup for himself, a shield for his class, and also the junior championship for the college. Mr. Foy, who in his college days was one of the fastest amateur runners in Canada, is naturally proud of his offspring.

Judging by the figures compiled in Switzerland, the war at first increased the world demand for Swiss watches, but the coming of peace makes it necessary for the watch manufacturers to get together and plan with all the acumen at their disposal such ways and means as shall offset the determination of other countries to develop watch-making at home. Seemingly in danger of being brought to a standstill when war broke out in 1914, the Swiss watch industry actually exported more watches than ever in 1915, and in 1916 the total export of watches and movements reached nearly 18,000,000, with a total value of more than \$40,000,000. Then the economic restrictions that were being put in force in various countries began to effect the Swiss watches exportations fell off, and Swiss watches accumulated; there were 2,000,000 or 3,000,000 more Swiss watches in the

world than anybody knew what to do with. Even so, more and more people purchased Swiss watches, while from Russia the income of the Swiss watchmakers fell off from over 22,000,000 francs in 1917, to less than 2,000,000 francs in 1918. But things are happening in the countries that have thought so well of the Swiss watch that the watchmakers "view with alarm" in Switzerland, and are going to do their best to counteract. Watchmakers in England, France, the United States, and Japan are making a strenuous and promising effort to provide the home folk with all the watches they need, and the Swiss Chamber of Watch Manufacturers is ill-pleased.

The Inland Oil Company struck oil Friday afternoon at a depth of 270 feet about one hundred yards from where the former well was sunk on the John Bothroyd farm, Thamesville. The well struck Friday gives promise of being much better than the old well. It overflowed. A pump will be placed in position on Saturday morning. The oil well flowed from sixty to seventy barrels a day for several days. Drilling on the new well stopped when the big line was reached.

Three hundred and fifty thousand dollars has been set as the amount desired for the erection of a Student's Union at Queen's University Kingston, to commemorate the memory of the members of the university who served in the late war.

Such a building which is felt to be much needed at Queen's would act as a centre of all the social and religious activities of the students. It would contain, first of all, a room dedicated to the memory of service that the university had given during the great war, and especially to those who had died as a result of the struggle. There would be gathered into this room all the memorials which could be procured of the men who had fallen, and their would be erected also tablets giving the whole roll of honor. The Union would contain a dining hall to take the place of the present successful but rudimentary cafeteria, a debating hall, rooms for the Alma Mater Society, the staff of the Journal, the Y.M.C.A., and other agencies of student life. It is felt too, that a wing should be erected for the women students of the university. Towards the fund for this building the students have liberally subscribed \$30,000 and it is expected their contributions will reach \$40,000.

The splendid part played by Queen's in the great war is well known by the citizens of Kingston, the fine records made by its Engineers, its Field Ambulance, its General Hospital, its Batteries, the 253rd Battalion, and by the hundreds of men who enlisted in other units. The list of slain totals 179.

Some protection should be furnished by the town at the C.P.R. station at nights," remarked a Lindsey horticulturist Saturday morning when referring to the fact that small boys are in the habit of destroying flowers and breaking shrubs at the C. P. R.'s beautiful flower garden. Friday night several beds of pansies were missed and some shrubs broken. "The trouble usually takes place when the evening train comes in from Toronto," said the gentleman, "and I think the night constable should take an occasional stroll over there and settle the heads of some of these mischievous lads."

The large class room on the ground floor of the old medical building at Queen's is being fitted up as a biology laboratory. The work in biology has been carried on up to date in the new medical building but the quarters have become too small. The class last term numbered 87 and while the number of medical freshmen to be admitted next fall will likely be limited to 60 the class will be large for the present accommodation.

During the war great quantities of waste silk—"floss" from the outside of cocoons, not available for spinning—were purchased by the United States Government in China. The stuff was required for the making of bags to hold the smokeless powder charges of big army and navy guns. It is of utmost importance that when the powder charge of a big gun explodes the bag shall be instantaneously consumed. For the very large naval guns there may be half a dozen bags to a single charge, several hundred pounds being required. Every particle of the smokeless powder (which is as powerful as gun cotton) is instantly converted into gas. There must be no smoldering residue of the bag tissue left in the powder chamber of the gun, else it might get fire to the next charge, causing a disastrous explosion. This might easily happen

# Annual Demonstration AND SALE OF "WEAR-EVER" Aluminum Utensils

JUNE 28th. to JULY 3rd.

—with—  
Demonstrator from the factory, who will demonstrate in various ways, the reason why Wear-Ever is the ware that wears.

**MADAM LANDRY TELLS WHAT DODD'S KIDNEY PILLS DID FOR HER.**

New Brunswick Lady Who Had Tried Other Medicines Claims She Found the Remedy She Was Looking For in Dodd's Kidney Pills.

St. Leolin, N.B., June 21 (Special)—Among the many women who claim they owe their health to Dodd's Kidney Pills, none is more enthusiastic than Madam Bruno D. Landry, a highly esteemed resident here.

"It is with great pleasure that I recommend Dodd's Kidney Pills," Madam Landry says. "I was ill for a long time, and nothing I took relieved me. I read often of the good Dodd's Kidney Pills did for others, but I had not much faith in them. At last, after having tried a lot of other medicines, I decided to give Dodd's Kidney Pills a trial. The result has brought me perfect health. If those who suffer from kidney diseases will use Dodd's Kidney Pills they will find them good and soon be convinced, as I have been, that they are the remedy for kidney disease."

Dodd's Kidney Pills are no faith cure. You don't have to believe in them to find in them the relief you are looking for. But if you ask your neighbors they will tell you out of their own experience of the work Dodd's Kidney Pills have done.

**STIRLING**

Mr. and Mrs. Robt. Sharp are leaving this week for a trip to western Canada.

Revs. F. H. Howard and Jas. Batstone are attending conference in Whitby.

Mr. and Mrs. Mark Tucker, of Belleville, spent a couple of days in this vicinity.

Mr. and Mrs. Arthur Anderson, of Montreal, spent the week end with

the Misses Judd.

Miss Annie Green spent the past week with friends in Belleville.

Mrs. Clifford Hatton and children returned home to Toronto on Sunday.

Mrs. McDonnell, Mrs. Parker, Mrs. Yeats and Miss Parker motored to Belleville on Tuesday.

Miss Annie Mosher was a guest at the Haggerty-McColl wedding in Wooler yesterday.

Mrs. (Rev.) Terrill of Norwood, and daughter Kathleen, are visiting at the home of Mrs. Wm. Montgomery.

Mrs. McAuley and daughter Kathleen, who have been visiting relatives in Frankford, returned home last week.

Mrs. Geo. Rupert is visiting friends in Belleville this week.

Mrs. G. Clair Brink and H. Broome London motored to Saranac Lake the beginning of the week where they are taking a special X ray course.

Mr. and Mrs. Mather and Mr. and Mrs. Sparrow, Corbyville, were guests at Mrs. A. Conley's and Mr. and Mrs. John Osborne on Sunday.

Mr. and Mrs. Jas. Caskey of Madoc were guests of Mr. and Mrs. Robt. Reid on Sunday. Mrs. Ketcheson of Belleville, was a guest there on Sunday.

Messrs. C. B. McGuire and Chas. N. Morton are in Whitby attending the Bay of Quinte Conference as representatives of Stirling and Rawdon Circuits of the Methodist church.

Mr. and Mrs. Chas. Barton and family, of Havelock, and Mr. and Mrs. E. MacMullen and daughter, Myrtle, were Sunday guests of Mr. and Mrs. Albert Sims of Minto.

Mrs. Wm. Harris and Miss Olive, of Windsor, and Mrs. Chas. Simpson and Master Martin, of Walkerville, arrived this morning to attend the funeral of the late Mr. David Martin.

Miss Goldie Rosebush, who has been on the staff of the Bell Telephone Co., Stirling, for the past seven and a half years, resigned her position with the Co., yesterday. During that time she has made many friends here and will be greatly missed.—Leader & News—Argus.
