(By James Deuglas, in Chicago Tzibuna.)

Miss Marie Oscalli is a candid friend to man, and she Salla him frankly what has the man and the salla him frankly what has the man and the salla him frankly what has the man and the salla him frankly what has be the conventional man fowards woman. She mays that men regard clever women as being "imasaca". She manistans that "whatever woman does that is higher and more ambitious than the more and she were need of fliaging herealf down at the feet of man and allowing him to walk ever he man and the sallowing him to walk ever he man and the sallowing him to walk ever he man as the the attitude of man towards woman the the attitude of a end. Is man a cast? That is the question which I, as a man, propose to discus. It is one of the characteristics of the end that he does not limove he is a ced, and it is therefore only antural that every man indigensity should resputished the characteristics of the end that he does not move the control of the contr

come. I would pass a law compelling every husband to allow to his wife a certain proportion of his income, not as a gift, but as payment for work done. The wages of the wife would be absolutely her own to be used by her as she pleases. In this way she would be refleved from the bondage of gratitude and the slavery of subservience. The longer she lived with a man the less dependent upon him she would become, and if he ventured to treat her with less than the respect due from one partner to another she would be able to withdraw into a pecition of greater freedom and less responsibility without being forced to face the prospect of starvation at a time of life when her charms have ceased to command a price in the marriage market.

It may be said that this sordid arrangement would destroy the romance of marriage, but the answer to that objection is the retort that if romance can survive the safeting conditions of marriage it can survive anything. What we have to take precautions against is the decay of romance which sets in at the critical period when love is passing out of idolatry into partnership. There is no doubt that perfect friendship is the culmination of perfect love, but human mature it mutable, and the culmination of love often never is attained in these cases where it is attained it will not be affected by the enforcement of a minumum wage for the wife. Where it is not attained the wife will not be asked to socrifice her liberty as well as her love, less dignity es well as her life. The irouy minimum wage for the wife will not be asked to sourffice her liberty as well as her love, her dignity es well as her life. The irony of marriage is the difference between the status of a woman before she marries and the status of a woman after she marries. Before marriage a woman is a divinity; after marriage she is a belot. Before marriage man is a goddoss; after marriage fine to be seen to be seen to be seen to be seen to take a little of the pre-nuptial honey and spread to exchange some of the rounnite homage she receives before marriage for a little homest comredeling after it.

WORLD'S HARBORS.

Facilities of European Ports Improved by "Harbor Trusts."

The vast influence of commerce upo the development of many urban centres makes the improvement and develop-ment of the local facilities for commerce question of vital interest. In cases these works are undertaken by the central Government, and generally any works to be constructed from the proeds of taxation are of this kind. There ceeds of taxation are of this kind. There are also a large number of places where much has been done by municipal authorities or by local Boards. The cost of the undertakings is met from harbor dues, tolls and rentals. The municipalities which have been most active in this field are those of Great Britain, but much has also been done by Continental atties, escepially in Germany, and some American cities have had a part of this mork.

work.

The greatest works of harbor improve-

ment in Great Britain have been undertaken by special harbor trusts in which the municipalities are in mest cases represented, but which also have members from other authorities and interests affected. The Mersey Docks and Harbor Board, at Liverpool, controls all the docks and shipping facilities at the mouth of the Mersey, including 30 huge artificial basins and a quay frontage of 20 miles. The trustees of Clyde navigation, of which the Provost and Councilmen of Glasgow are the dominating members, have not only deepened that river from the city to the mouth, but have constructed the massive quays that line the stream and built large docks and warehouses. So, toe, Manchester, Belfast, Dublin, Plymouth, Swansea, Burnley, Newcastle Gateshead and South Shields have representatives on the local Boards of Harber Trustees all of which have been active in reant improvement works.

The London County Council and the city of London, with the corporations of Oxford, West Ham and Reading, and several County Councils, are represented on the Thames Conservancy Board, which has charge of improvements and landing stages on the Thames from the estuary to its source; but the great docks of London for foreign shipping are owned by joint stock companies. In the British colonies and possessions, docks and harbors are meetly under the control of the Government rather than the municipalities. Thus the Dominion Government owns the docks at Montreal, the New South Wales Gevernment those at Sydney. In Bombay, however, there is a special port trust, after the system so much in vogue in England.

In Germany the municipal docks of Hamburg, with their network of rail way tracks and large public storage warehouses, are said to offer the finest harbor facilities in the world; and their cost represents a considerable proportion of the Hamburg debt of \$80.009,000. Important harbor and dock works have also been construyed by the municipalities, but those at Mannheim are owned by the

ogne, Mainz and elsewhere the docks are owned by the municipalities, but those at Mannheim are owned by the Government. All of the seaport towns of Holland, Belgium, Norway and Sweden own docks and wharves, though in Am-sterdam there is also Government ownsterdam there is also Government own-ership. The new docks at Antwerp are deserving of special mention. The har-bor of Barcelona, which is wholly arti-ficial, represents the results of municipal activity. Vienna and Budapest have ex-pended large sums in work on the Dan-

pended large sums in work on the Danurbe.

In France the harbors, ports and docks
form part of the national highway systems under the central Government Buressu of Ponts et Chaussees; and it is only
in some towns, such as Lille and Roubaix, located some distance up a river,
that the wharves for local traffic are
owned by the municipalities. So, too, in
Italy, Austria and Greece, the docks of
Venice, Leghorn, Triests and Piracus are
owned by the Government. This is also
the general rule in Russia, but in Riga
the municipality, in conjunction with
the Board of Trade, is constructing a
floating dock and grain elevator.

The work of harbor improvements in
the United States is sharply distinguished from the ownership and management
of docks and wharves. The former is undertaken for all seaport towns by the

dertaken for all scaport towns by the national Government under private control, though with important instances of municipal ownership. By far the most important instance is New York city, which, while it has sold most of the inland real extate received under the Department. land real estate received under the Dongan charter, has retained most of the water frontage of Manhattan Island, granted to it in 1730.

FLIES AS DISEASE BEARERS. The Common House Variety Are Menace to Health.

The United States Department of Agriculture has started a crusade against the common house fly and is carrying on asked her class to draw a picture of that extensive experiments as to the best way of banishing it from the abodes of men.

The fly hea been found to be not apply with paper and pencil, some drawing pic-The fly has been found to be not only nuisance, but a menace to man's health. Its hairy bady carries both disease and death. Many epidemics which sweep over communities in the hot seaon have been traced to the fly. Having its origin in filth, it brings with it the bacteria which breed in filth. And as it moves about, now crawling over refuse, now over the food on the table, flying from the lips of the sick to the lips of the healthy, it is said to be more dangerous to modern society than were the wild beasts to primitive man.

The high mortality areas the children

The high mortality among the children in the congested districts of a city, where families are closely crowded together. where refuse accumulates fast, where food is often kept in living rooms, is due to a large degree, so scientists now say, to the fly. Infant diseases chiefly prevail in the hot season, when the flies abound. Dr. J. T. C. Nash, in the Journal of the Royal Sanitary Institute, giv-in his experience as an English health officer, says that the fly is responsible for the death of many children because of polluting the milk which they dring. "It is a matter that has been entirely overlooked," said Dr. C. O. Probst, recently, "but we now know that the com-mon house fly is an agent of importance in carrying the germs of typhoid fever. It was formerly believed that the erms were only carried in water, milk, r other liquid food. Flies both breed and feed in places where the germs are to be found, and then, flying into our houses, no doubt often carry the germs and deposit them on our food.'

WEEDS OF VALUE.

New Zealand flax is one of a number of whid weeds that yield their gatherers great wealth, says the Scientific American. This flax, the strongest known, grows wild in marshes. When it is cultivated it dwindles and its fibers become brittle and valueless.

Indian hemp grows wild, and out of it hasheesh, or keef, is made. Keef looks likes flakes of chopped straw. It is smoked in a pipe; it is eaten on liver; it is drunk in water. It produces an intense, a delirious happiness, and among Orientals it is almost as highly prized as beer and whiskey with us. beer and whiskey with us.

The best nutmegs are the wild ones.

They grow throughout the Malay archi-

pelago.

But the most valuable weed of all these wild growths is the seaweed. The nitrate beds of South America, which yield something like \$65,000,000 a year, are nothing but beds of seaweed de

FRUIT CROP.

The reports indicate that there will be a large quantity of very small apples, otherwise fairly good. Shippers should not forget that there is no lowering of the standard and that the size for No. 1 or No. 2 is not the medium size as grown in Western or Southern Ontario in 1907, but the medium size in an or-dinary season. There will, therefore, be a large number of apples that will be marked No. 2 or even No. 3 for no other marked No. 2 or even No. 3 for no other reason than that they are too small to qualify for a higher grade. The Fruit Inspectors have already recommended prosecution of some shippers who have offended in this particular. A. McNeill, Chief, Fruit Division

CARE OF THE LAWN.

Mow It Often, Water It Well, Use Good Commercial Fertilizer. The oftener grass is mowed the better

it will withstand dry weather. If it be It will withstand dry weather. If it becomes necessary to apply water during
July or August, do it thoroughly. A little wetting with the good for nothing
lawn sprinkler is worse than none.

Enough water should be applied, says
the Village, so that the ground below
the sod becomes thoroughly soaked, thus
attracting the roots downward. Do not
use the lawn mower when the grass is
wet.

Try using a commercial fertilizer on the lawn at intervals during the sum-mer. The result will surprise you. All fertilizer manufacturers make a lawn fertilizer that is much more efficacious than stable manure, more cleanly and sanitary.

If old, well rotted manure could be

applied very thick and allowed to re-main, some good might be accomplished, but the usual custom is to spread thin coat, leave it a few weeks and then rake it off. It might about as well not be used at all.

The commercial fertilizer is much better in every way. By its use an old, worn out lawn may be rejuvenated. Any fertilizer dealer who knows his business is able to give full information about

its cost and use.

If you have a thin, weedy spot in your lawn, scratch it and sow grass seed very thick. If at first you don't succeed in getting turf, try again. Thick grass will drive out the weeds in time.

Proved His Mettle.

The Sultan of Morocca is barbarous in The Sultan of Morocca is barbarous in his methods in spite of his acquaintance with European civilization. Not long ago, the story runs, he visited his private menagerie with a camera in order to photograph the animals. Arrived before the eage of a tiger, the young monarch suddenly desired his minister of war to hold the beast by the ear while

war to hold the beast by the ear while he photographed it.

Dreading his master's displeasure if he refused, the trembling minister approach-ed the cage, and, thrusting his hand be-tween the bars, grasped the animal by the ear. With a fierce growl the tiger sprang to its feet, while the wretched minister clung grimly to it, divided be-tween fear of the tiger and dread of the sultan. At that moment, to his inthe sultan. At that moment, to his in-expressible relief, the camera clicked, and his ordeal was over. His courage did not go unrewarded. The sultan has dis-tributed numerous copies of the photograph as an evidence of his skill as a photographer and of the pluck of his war minister.—London Spare Moments.

Shadows That Sing.

At the recent exposition of the French Society of Physics exhibitions were given of an ingenious combination of the phonograph with the cinematograph, whereby the figures upon the screen were caused to go through all the motions of singing, while the sounds issued concordantly from the phonograph so that the illusion was astonishingly complete. Similar combinations have been made before, but seldom with so much attention to details. The apparatus emattention to details. The apparatus employed is called the chronophone.

Ambition is but the evil shadow of as piration.-Macdonald

ISSUE NO. 37, 1907.

Marquis Ito.

On one stage of that hot journey I had a long talk with him. I looked with interest, as we sat together in his private car, at the figure before me. The broad, capacious forehead, the large ears, the teeth blackened with much smoking, the moustache and goates beard trimmed with silver, and the well-brushed hair were all the framework for a pair of luminous, kindly, piercing eyes, that seemed to read one through and through. The thickest body proclaimed that physical vigor of the man which is to-day almost a proverb in Japan. "Ito at eixty could do more than three young men at twenty," your Japanese neighbor will tell you. And when he began to talk, one appreciated the fact that here was a son of Nippon who had apparently thrown off Oriental habits of thought. There was a frankness, an openness and an air of confidence about his conversa-tion that could not fail to entrance one. F. A. McKenzie, in Cassell's Magazine.

BETTER THAN SPANKING.

miles of the North Pole, tells of a curious custom existing among a colony of Poles who dwell there. The woman is the head of the house and the family, and she has an ingenious system of keeping her husband out of mischief during her absence. The method is simplicity itself. As she is leaving she pours a pailful of snow water over the entrance to the snow hut. This instantly freezes and the husband is thus safely imprisoned within the house, as he is too lazy to dig out, and is therefore compelled to stay at home until the return of his lady. Unfortunately, climatic condition and others prevent the adoption of this system in England, where something of the sort is much needed.—London Judy. Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. S. Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

The Bishop of Maryland was much interested in uplift work among the lowly, and maintained a school for neglected children in one of the poorer quarters of Baltimore, says the Sun. Among the pupils was a little girl, whose free use of "swear words" indicated lamentable conditions in the home circle. One one of the hishop's wights to the school the conditions in the home circle. One one of the bishop's visits to the school the teacher told him of this little girl's persistent use of profanity, and asked him to talk to her about it. Later the good bishop called the child to him, and, after putting her at ease by a few kind and fatherly words, told her how very wrong; it was for a little girl to swear, and hoped she would not do it any more.

The child, in no wise abashed, wanted to know of the bishop "who told/him."
"Oh," he said evasively, "a little bird told me."
"Well." said the child, with a flash of

"Well," said the child, with a flash of quick intelligence, "I bet it was one of them d—— English sparrows."

ITCH Mange, Prairie Scratches and every form of contagious Itch on human or animals cured in 30 misutes by Wolford's Sanitary Lotion. It never fails. Sold by druggists.

The Tragedy of Being Lowly Born.

Nine-tenths of man's felicity depends upon being well-born; in London a bit more than nine-tenths. In the upper classes eighteen per cent. of the children die bfore reaching the age of five years, but in the lower classes—aay of St. George's-in-the-East—the average death rate' is twenty-nine years of age. So by the mere fact of being born out of the nobility and gentry the Londoner is stripped of twenty-seven years of the life that might have been his. Oh, of other things, too, he is shorn. His short life is bare of comfort or delight. Nor can he take pride in it—it is, at cace, too dirty and too sad; all by that chance of birth too far eastward. Pain and hunger and helotry—the empty belly and the overburdened back—are his heritage. He sadhis woman—a pair of lean, warped ant-mals—stink together through the grayness of life, under the iron laws. And in blows and oaths, they find a certain joy in gin—which is what as water and runs hellishly hot down the throat and smokes in the brain; find, too in the pewtor pot a heavy-wet a certain sleep which is better than waking; go thus through life till the Iron law of averages knocks them on the head at twentynine.

An inexorable law, decreaing that one of Encouraging Storage of Coal. At the solicitation of some Western railroads, the Interstate Railroad Com-mission has sanctioned a reduction of 25 cents on coal shipped in certain parts cents on coal shipped in certain parts of the West during the months of July and August. This action is for the purpose of encouraging the shipment and storage of coal during the period when the greatest number of cars are available for the purpose, rather than later when the demand for cars is greater than the supply. the supply.

Minard's Liniment Cures Burns, etc.

The Walls of Jericho.

Professor Sellin's excavations on the site of the ancient city of Jericho are yielding unexpectedly rich treasures. In his last letters to the Vienna Academy of Science, the professor writes that over hundred men are digging at five different points.
One of the most interesting finds is

the historical city wall, built of burnt lims bricks. It was some ten feet is thickness, rising from a stone foundation. On the western side of the city the wall was nearly forty feet in widt another point a private house was found built over another house of a still ear-

Other discoveries include lamps, plates, cups, needles, weights, mortars and mills of bronze and stone, some of very rough and primitive handiwork, and others very finely executed. In the inner city remains of rows of houses have been un-covered. The ancient Hebrew lettering proves that the old Hebrew characters

vere in use.

Professor Sellin hopes to renew the ex-Professor Sellin nopes to renew the ex-cavating work next winter. In the mean-time he says that the work already done has opened up a wealth of material for the student of the pre-Israelite and Can-anite period.—Pall Mall Gazette.
