

MAKES MEN SOUND AND STRONG

Detroit Specialist Making Men's Diseases a Specialty for Years. Will Accept Your Case, Giving It Individual Treatment. You May Use It in the Privacy of Your Own Home.

You May Pay When You are Cured.
A Detroit Specialist who has 14 diplomas and certificates from medical colleges and state boards of medical examiners, and who has a vast experience in doctoring diseases of men, is positive he can cure a great many so-called incurable cases.

DR. S. GOLDBERG.
The possessor of 14 diplomas and certificates, who wants no money that he does not earn.
In order to convince patients that he has the ability to do so, Dr. Goldberg will accept your case for treatment, and you need not pay one penny until a complete cure has been made; he wants to hear from patients who have been unable to get cured, as he guarantees a positive cure for all chronic, nervous, blood and skin diseases, which he accepts for treatment. He not only cures the condition itself, but like-wise all the complications, such as rheumatism, bladder or kidney troubles, blood poison, physical and nervous debility, lack of vitality, stomach trouble, etc.
The doctor realizes that it is one thing to make claims and another thing to back them up; so he has made it a rule not to ask for money unless he cures you, and when you are cured, he feels sure that you will willingly pay him a small fee. It seems, therefore, that it is to the best interests of everyone who suffers to write the doctor confidentially and lay your case before him, which will receive careful attention, and a correct diagnosis of your case will be made free of charge; if you have lost faith with him, as you have everything to gain and nothing to lose; you must remember that no penny need be paid until you are cured. All medicines for patients are prepared in his own laboratory to meet the requirements of each individual case. He will send a booklet on the subject, which contains the full details of his treatment, entirely free. Address him simply 617 Dr. S. Goldberg, 205 and 2-cent postage stamps. The Chatham Company, Windsor, Ont.
No. 1 and No. 2 are sold in Chatham by all Druggists.

Cook's Cotton Root Compound.

Ladies' Favorite.
Is the only safe, reliable, and natural on which woman can depend. "In the hour and time of need."
Prepared in two degrees of strength. No. 1 and No. 2. No. 1—For ordinary cases. No. 2—For special cases—10 degrees stronger—three dollars per box.
Ladies—ask your druggist for Cook's Cotton Root Compound. Take no other as all pills, mixtures and imitations are dangerous. No. 1 and No. 2 are sold and recommended by all druggists in the Dominion of Canada. Mailed to any address on receipt of price and 2-cent postage stamps. The Cook Company, Windsor, Ont.

No. 1 and No. 2 are sold in Chatham by all Druggists.

"The YELLOWSTONE NATIONAL PARK"

Is something absolutely unique in this world. President Roosevelt.
The popular route to this delightful spot is via Union Pacific to Monida, thence by stage to all points in the park.

The stage ride from Monida, by the splendid Concord Coaches of the Monida & Yellowstone Stage Co., through scenery hardly inferior to the park itself.

Very low rates during June, July, August and September.

NOT A "LADY BASS"

Australian Singer Says Title Sounds Like a New Drink.

"Some people are born basses, some people achieve basses, and some people—but they are very few—have basses thrust upon them."
Thus wailed in accents of the deepest melancholy Miss Violet Elliott, the Australian contralto, who sang for the first time at the Alhambra, London, recently. By reason of the amazing depths to which her voice can sink she has been called the "lady bass."

And this title has given her the direct of offence. "It sounds like a new drink," she complained, "and I hate it. I will not be called the 'lady bass'!" and she clenched her little fists.

Certainly there is in the name the suggestion of heaviness, of solidity, of masculinity. This is what the audience at the Alhambra expected. But they were to be mercifully disappointed.

Instead of the tall, austere, commanding presence they waited for, there slipped on the stage a slight, lissom maiden, with rebellious hair and frightened eyes.

WAITING FOR LOW NOTES.
Then they settled themselves into their seats and waited for the deep voice of the "lady bass." But again they were to be disappointed.

When notes that came from the slender throat were high and clear and pure. This was no "lady bass," but the most charming of sopranos. She sang a simple little ballad of "Home, Dearie, Home." There was a lad who would go to sea, and a maid who wished him safe in port.

Suddenly there came a promise—just a promise—of the depths to which that voice could sink.

Its fulfilment came with the second song, "The Diver," a song written for male bass voices, and for which new band parts had to be hastily written yesterday afternoon.

The singer began almost apirily in her clear high notes, but then she went down and down and down—down with the diver "to the depths of the sea." And her voice was full of a sombre and tragic meaning.

But with all its depths there was none of the heaviness and lifelessness that customarily go with the contralto. It was a bass that for all its depths had life and brightness.

It engulfed the whole wide auditorium with its resonance. It had a strange metallic ring in it—the ring of trumpets.

A WOMAN, NOT A FREAK.

Miss Elliott triumphed, and she almost wept over it.
"If," she said afterwards, "I can only achieve fame by sounding fat and wobbly and manlike, I won't have fame at all. I don't want to be a freak; I want to be a woman."
"Such a fuss, too, all because I can get down to D. And the fun of it is that no one, not even my teacher, discovered it till the other day, though I have sung for years, as the bass in a quartet, half the world over. Now they say that I can go lower than Clara Butt, and they call me the 'lady bass.'"

"I never heard such an 'insulting name' in all my life."
This conversation took place in Miss Elliott's house, and the interviewer, who knew that she had been riding about in the wet on the top of an omnibus, and saw that she was smoking cigarettes, asked how she cared for her voice.

"Care for it?" cried Miss Elliott. "I don't care for it. I don't live for art's sake, but for my life's sake. Training? The first training I remember was shouting 'Coo-ee' in the Australian bush. I shouted so well that I scared away the 'possum for miles around."

With frank and simple courtesy she went down to the hall door to bid the representative of the "Express" good-bye. With one hand she undid the latch, and with the other took in a parcel which had just arrived. "Good-bye!" she called down the street. "And don't forget I'm not a 'lady bass.' I may be poor, but, goodness, I'm a contralto."—London Express.

Locomotive That Will Travel 3,000 Miles Without Stopping for Fuel

New York, Nov. 3.—Railroading may be revolutionized by a locomotive that will be soon turned over to the Southern Pacific railway. It is a power house on wheels. It is fireless, smokeless and waterless. It needs no coal, it drops no ashes and it throws no sparks or cinders. Its builders say it would be able, provided a clear track could be obtained, to haul a 2,000-ton train from New York to San Francisco without a single stop. There would be no need of delays for fuel or water, for the locomotive can carry enough fuel for the journey of 3,000 miles, and it needs no water for steam.

Theoretically all this has been figured out to a mathematical certainty. What remains now is a practical demonstration. The locomotive uses a combination of compressed air power, fuel oil power and electrical power. It is an application of the Diesel type of engine to locomotive. The engine proper is being built at the Corliss works in Providence, R. I.

This new locomotive is the design and joint product of Joseph H. Hadley, president of the International Power Co. and organizer of the American Locomotive Co., and Walter H. Knight, chief engineer of the International Power Co. and formerly with the General Electric Co. It embraces some remarkable features. The Diesel engine, which heretofore has been applied to stationary engine work alone, will be used to drive a dynamo, which will provide the electrical power for the locomotive. A speed of from 100 to 120 miles an hour is expected on the trial run. There is said to be no limit with reason for the speed the locomotive might attain provided the roadbed and other conditions permitted. An average speed of 100 miles an hour could be maintained from the At-

ENGINEER'S LAST RUN.

His Story of How He Lived His Life All Over in a Flash.

"Drowning is not the only experience that causes a man to read his own biography in the flash of a second," said F. C. Roberts, a locomotive engineer.

"I was running on the passenger trains between Atlanta and Macon several years ago, and I was to meet the northbound train at a certain station on the road. Well, it was all my fault. I hadn't slept any for five nights, and the only rest I had was in my cab. The last stop that we made before this experience of which I speak the fireman had to wake me up when the signal to go ahead was received. I had gone to sleep in my cab.

"As we approached the next station the conductor may have signalled me, as he claimed he did, but we dashed through the town at about forty miles an hour before I heard the down break signal. The minute I heard it I saw the headlight of the northbound train less than 300 yards away coming around a curve. I threw on the air brakes and reversed, but it all looked too late. The fireman jumped, but I was paralyzed. The two great engines, one bearing a special train, rushed to frozen like angry bulls, and I was frozen there, and while those trains rushed together I saw every incident of my life just as plainly as the day it happened. That's all I know about it.

"They took me to the hospital, and nine days later I woke up after a spell of brain fever. The trains stopped so close together the pilots were sprung out of place, but otherwise there was no damage. They had to get a new engineer before my train pulled out, though, and that was the last time I ever pulled a throttle."

HALE AND HEARBY AT EIGHTY-TWO

Mr. Angus McMillan, of Laggan, Ont., Owes His Health Dodd's Dyspepsia Tablets

Mr. Angus McMillan, of Laggan, Ont., Owes His Health to Dodd's Dyspepsia Tablets.

Hale and hearty at the age of eighty-two, Mr. Angus MacMillan, of Laggan, Ont., is a splendid specimen of the grand old Scotchmen of Gleanery County produces. But if you ask Mr. MacMillan to what he owes his splendid health he will reply, "Dodd's Dyspepsia Tablets." His explanation is this:

"I suffered with Dyspepsia for more than 20 years but never met anything to cure me till I commenced taking Dodd's Dyspepsia Tablets. After I had taken the Tablets for two days all the pain and restlessness left me entirely. I feel it my duty to tell the public of the good Dodd's Dyspepsia Tablets have done me."

If you would live to a hearty old age keep your stomach in order with Dodd's Dyspepsia Tablets.

PEER AND CLOCKMAKER.

Lord Grimthorpe Has Designed Another Timepiece for Clock Tower.

Lord Grimthorpe, lawyer, church restorer and horologist, and very nearly a monogamian has just designed a new clock for the tower of Worthorne Church, in Lancashire.

Lord Grimthorpe's greatest achievements, apart from his enormous practice at the Parliamentary bar, have been the designing of the clock at the Houses of Parliament, and the restoration, at his own charges, of St. Alban's Abbey.

When the clock was projected Vulliamy, and other famous clockmakers, who were asked to tender, murmured to a stipulation that it should be guaranteed not to vary more than a minute a week. But Mr. Beckett-Denison, as Lord Grimthorpe then was, was adamant, and the contract was given to Mr. Dent, who worked from Lord Grimthorpe's designs after the Astronomer Royal had withdrawn from the whole affair.

A curious sequel was the action brought by the founders of Big Ben against Lord Grimthorpe, who had declared that the bell was a disgrace to the country.

It fell to the lot of the man who afterwards became Lord Russell of Killowen to cross-examine Lord Grimthorpe, and the excitement was intense over what was expected to be a battle of the giants.

But the men knew one another's powers, and the encounter was only distinguished by urbanity and a tender regard for each other's feelings. Lord Grimthorpe, however, had to pay £200 damages.

2,000,000 Tons of Water.

Saturday, Sept. 24, according to the Observatory officials, 2,000,000 tons of water were unloaded on Toronto during the rain storm of that day. There was a recorded waterfall of 1.91 inches. The City of Toronto covers an area of 17.17 square miles. An inch of water over an acre of land means 100 tons of water. The record was easy. It was the heaviest rainfall since August 31, 1901, when 2.19 inches fell. Other heavy falls this year were: On May 18, 1.63 inches; July 12, 1.03 inches, and during the storm of August 19-20, when 1.87 inches fell. During this latter storm, however, Toronto got off easily compared with other parts of the Province. On August 20, these figures are on record: At Dealdown, in Kent County, 2.19 inches; Georgetown, Malton County, 2.34 inches; Westminster, in Middlesex County, 2.65 inches; Princeton, in Oxford, 2.29 inches; Smith's Falls, 2.34; Wyoming, in Lambton, 3.9 inches; Dutton, in Middlesex, 2.75 inches, and—hold your breath—at Watford, in Lambton County, there came a deluge of 5 inches vouchered for. The rain on Saturday was general throughout the Province.

Ocean Temperatures.

It is always cold at the bottom of the sea; the influence of the warm surface currents does not extend below 100 fathoms. In the great depths the temperature is for ever close to the freezing point. In the tropics the difference between the surface and bottom temperatures is frequently over 45 degrees. From 100 fathoms down, or throughout the waters beyond the influence of the sun, temperatures remain practically constant. At the surface the lines of equal temperatures are parallel with the equator, although subject to deflections by currents; at the bottom they follow the general trend of the continents. The coldness at the bottom of the sea is due to the water in Polar regions sinking and gradually spreading itself over the ocean floor.

Oldest Living Tree.

The baobab trees of Senegambia are believed to be the oldest living trees on earth. Some scientists have put the age of one of these trees at 6,000 years; and the conscientious and conservative Livingstone was not less than 1,400 years old. This is the tree that sends out the immense branches that bend to the ground for support, although they grow sometimes to a length of seventy-five feet before they bend downward. There is one of these trees with ground-resting branches, covering such an area that the umbrageous spaces are used for the purpose of a public hall, its portals being ornamented by quaint, rude sculptures cut out of the living wood.

Boiling-Point of Water.

Water boils at different temperatures, according to the elevation above the sea level. In London water boils practically at 212 degrees Fahr.; in Munich, in Germany, at 209.4 degrees; in the city of Mexico at 200 degrees; and in the Himalayas, at an elevation of 18,000 feet above the level of the sea, at 180 degrees. These differences are caused by the varying pressure of the atmosphere at these points. In London the whole weight of the air has to be overcome. In Mexico, 7,000 feet above the sea, there is 7,000 feet less of atmosphere to be resisted, consequently less heat is required, and boiling takes place at a lower temperature.

Need of Improving Common Cattle.

The need of improving common stock appears very plain at slaughtering time. In recent tests at a large number of abattoirs, where many native cattle were handled, the average dressed weight was not over 60 per cent. of the live, whereas animals even tolerably well bred and fed should dress 60 per cent. This would amount to a loss of 96.2 pounds per head, which at a sale price of 8 cents per pound means a loss of \$7.70 per animal.

She Knew.

Tramp—It is needless to ask you the question, madam. You knew what I want.
Lady—Yes; I know what you want badly, but I've only one bar of soap in the house, and the servant is using it. Come again some other time.

There is nothing like Sunlight Soap for Household Utensils.

When you have to use hard water it is not an easy matter to wash household utensils. To do good washing you should have good soap and soft water (rain water). If you use hard water you must have good soap, and the best soap you can get is Sunlight Soap because it softens the hard water and makes a copious creamy lather. Use Sunlight Soap for all household purposes and the results will surprise you.

SUNLIGHT SOAP

ASK FOR THE OCTAGON BAR.
Sunlight Soap washes the clothes white without injuring the hands.

THE STAGE

"All the world's a stage and all the men and women merely players."

ANNOUNCEMENTS.

Way Down East—Nov. 7.
Bugle Band Minstrels—Nov. 9-10.
Guy Bros' Minstrels—Nov. 12.
On the Bridge at Midnight—Nov. 14.
The Mummy and Humming Bird—Nov. 17.
Lyceum Course—Nov. 21.
Local "Pinafore"—24-25.
Sons of Scotland Benefit—Nov. 30.
(Supplied to The Planet by Press Agents.)

There are many things to take into reckoning when accounting for the tremendous vogue of "Way Down East" which will be at the Grand on Monday, Nov. 7th. The simplicity of the story appeals to everybody, the broad fun of the inimitable Hi-Holler and the comedy of the other characters, the realism of the various scenes, the wonderful simulation of the blizzard, the strength of the Company, and the power of the third act scene; these things in some measure will tell why "Way Down East" fills the theatres season after season. Added to this is the fact that the cast is kept up to its original standard of excellence while the production is made more elaborate each succeeding season.

FRUITFUL FACTS.

Lemons are an excellent remedy in pulmonary disease.
Persia practically enjoys the monopoly of the date trade.
Sicily has some of the finest lemon orchards in the world.
The pear tree will continue bearing fruit for several centuries.
The cherry, the peach and the plum all originally came from Persia.
Strawberries are regarded as particularly good for sciatica and gout.
At one time strawberries were sold strung on straws. Thus they got their name.
The banana is a perfect food. Weight for weight it is claimed to be as nutritious as the beefsteak.

Windsor Salt

used in homes all over Canada where purity is appreciated. It will not cake.
