

THE ACADIAN.

WOLFVILLE, N. S., JUNE 11, 1915.

Editorial Brevities.

May the brides of June be as happy as if no war clouds hovered over the world.

Those who are prompt in the keeping of appointments have a great deal of waiting to do.

Sergt. Michael O'Leary is not dead. Well, he deserved all the praise given him, which perhaps is not always true of obituary notices.

The Nova Scotia Legislature has passed a compulsory Town Planning Act under which all municipalities in the province have to prepare either town planning by laws or a town planning scheme within three years.

"Come and Let Us Save the Kiddies."

The above words, credited to Mr. Alfred G. Vanderbilt in his last hour upon the doomed Lusitania, will, as the Bishop of London has said, ring round the world. Many men and women have used the same terms, though probably not under such tragic circumstances. To-day, in Canada, we have groups of self-sacrificing men and women, who are devoting both their time and energies to the saving of the children.

The playgrounds movement, which has been taken up by so many cities in Canada, is only one of the many ways in which this result is being secured. In Canadian cities and towns, there are still innumerable children who will not be able to have a day in the country this summer—who are confined, for their pleasure and play, to the street or lane. It is on behalf of these children that the appeal of Alfred Vanderbilt rings out as truly as it did to the children on the Lusitania. Let Canadian men and women, who are interested in child welfare, organize, and see to it that every child, whether of Canadian or foreign parentage, has the opportunity of the open air, and liberty to develop the young life, that he may grow up to manhood, a credit to Canada and Canadians.

It is in opportunities such as this that the true spirit of conservation is found. Canada is looking to the future, and there is no field in which greater results may be secured than in the conservation of the individual unit—the child.

The Preservation of Milk.

(Issued by the Department of the Public Health, Nova Scotia.)

Much attention has of late been directed to the importance of securing clean and safe milk. It has been found that wherever a thorough system of milk inspection and control has been introduced there has been a very notable reduction of sickness and death among young children. Much stress is now being laid upon the necessity for producing milk under conditions of the strictest cleanliness, for paying particular attention to the health of cows, and for requiring refrigeration of the milk during its distribution. The pasteurization of milk has come into very general practice, and has been found to be most efficient in preventing the spread of infection through milk, although it does not lessen in any way the need for the most stringent cleanliness in every stage of its production and distribution. All this has done much towards securing clean and safe milk for the consumer in which these precautions are observed. It must be remembered, though, that all this effort may be to a great extent nullified if the milk does not receive sufficient care after it has been delivered to the consumer.

Many bacteria multiply in milk with extraordinary rapidity unless the milk is kept cold. Some of these bacteria may bring about such changes in the milk as to render it unfit for food, especially for young children. In order to prevent their development, the milk should be stored in perfectly clean containers and kept at a low temperature. It is much better that bottled milk only should be used; as milk delivered from cans is exposed to dust and flies. No milk into which a fly or dirt of any kind has fallen should be used. Milk pails should, therefore, be always kept well covered.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Supplying Coal for the Dominion Buildings," will be received at this office until 4:00 P.M., on Thursday, June 17, 1915, for the supply of coal for the Public Buildings throughout the Dominion.

Conditional specification and form of tender can be obtained on application at this office and from the caretakers of the different Dominion Buildings. Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to the net cash (10 per cent) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or fails to complete the contract. If the tender is not accepted the cheque will be returned.

By order,
R. C. DESBROUERS,
Secretary,
Department of Public Works,
Ottawa, May 29, 1915.

Newspapers will not be sent for this advertisement if they cannot be delivered without extra postage.

Help a Good Cause.

The Nova Scotia Temperance Alliance is supported by the voluntary gifts of the good people of Nova Scotia. In the name of the Alliance I would like to sincerely thank all those who have made this work possible.

We are convinced that this organization has already justified its existence by the fruits it has to show for its efforts. Let me briefly enumerate a few of the things which the Alliance has accomplished.

1. It has succeeded in unifying all the temperance forces of the province so that united action is now possible.

2. The Alliance has succeeded in crystallizing the temperance sentiment of the province so that it is now one of the greatest moral factors to be considered.

3. Together with all temperance organizations, it has carried on a campaign of education that is bound to have a far reaching effect.

4. The Alliance has been one of the chief agencies in securing the passing of the Nova Scotia Temperance Act which is regarded by competent judges as one of the best pieces of temperance legislation in the Dominion of Canada.

5. The Alliance has rendered invaluable service in strengthening the hands of officials in law enforcement, and in making more effective existing laws.

6. It has succeeded in enrolling a large number of the children in the Province as total abstainers.

For these and other reasons that might be advanced, we believe that we can appeal to the people of the Province for support.

At a meeting of the finance committee of the Nova Scotia Temperance Alliance, held in Truro, March 26th, it was decided to have the secretary issue an appeal for funds for the carrying on of this good work. The mind of the committee was that all these funds should be in the hands of Mr. P. McG. Archibald, Treasurer, Truro, by July 1st, 1915.

We therefore confidently appeal to the liberal-hearted men and women of this Province to stand by the work that has for its aim the protection of the boys and manhood of our Province from the ravages of strong drink and the deliverance of our women and children from the bondage which it entails. We appeal to all churches and temperance organizations to assist us in carrying on this work. We need at least three thousand one hundred dollars (\$3,100.00) annually for the carrying on of this work.

Our Commander in Chief is capable and energetic, specially endowed and ordained for this work of leading the forces to victory. Shall we not all stand together and render all the assistance possible? It is our battle—IT IS OUR WORK. Nay, rather the battle has been fought and the work has been done. The enemy has begun to waver. He is already half beaten. Let us then all unite together for the overthrow of this awful traffic. Shall Nova Scotia lag behind Russia? Can China prohibit opium while the Christian people of Nova Scotia hesitate to banish RUM?

Rally, men to the call! Remember the date July 1st, and the treasurer is Mr. P. McG. Archibald, Truro.

D. C. ROSS, Secretary,
Nova Scotia Temperance Alliance.

Worry and Weakness.

OPEN INDICATE OVERWORK, AND A RUN DOWN NERVOUS SYSTEM. Overwork and worry have an evil effect on the system and often give rise to nervousness and sleeplessness. Other signs include a weak back, headaches and indigestion. In time if matters are neglected a complete breakdown of the nervous system follows. On every hand one can observe victims of this state of nervous exhaustion who are at a loss to know what to do with themselves, their nervous debilitated state having baffled all ordinary treatment.

If you are a victim of exhausted nerves, if your symptoms are as described above, you need Dr. Williams' Pink Pills because they are a powerful nerve tonic. Their strengthening action on weak nerves is due to the fact that they enrich and build up the blood through which the nerves are fed. Under the tonic influence of Dr. Williams' Pink Pills all traces of nervous weakness disappear together with the headaches, the insomnia, the feeling of intense weakness and depression of spirits that mark the victim of nervous ailments. Here is the proof. Mr. Henry Merr, Port Felix, N. S., says: "It gives me great pleasure to testify as to the value of Dr. Williams' Pink Pills. When I began their use I was a physical wreck. My nerves were all unstrung. I suffered from frequent headaches and backaches, and was almost wholly unfitted for work. I had tried several remedies without success, when I finally decided to give Dr. Williams' Pink Pills a trial. I took six boxes and they made me a well man."

What these Pills did for Mr. Merr they will do for every other weak and nervous man, if given a fair trial. Sold by all medicine dealers or sent by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

LOVEY—On the evening of May 25th, under back gallery, College Hall, a Lady's Gold Bracelet set with blue stones. Finder will please leave same at home of Mr. Elias Curry, Wolfville.

Can't you help us with the amount of your subscription now due? We are going to need it during the next few weeks.

Economic Value of Birds.

The insects that destroy our fruit crops attack every portion of the tree and its fruit. The woolly aphis attacks the roots; the trunk and limbs are preyed upon by millions of plant lice, scale-insects and borers; the leaves are devastated by the all-devouring leaf worms, canker worms and tent caterpillars, while the fruit itself is attacked by the curculio, codling moth and apple maggot. By the annual expenditure of about \$8,000,000 in cash in the spraying of apple trees, the destructiveness of the codling moth and curculio have been greatly reduced; but of course that great sum must be set down as a total

loss to the farmers and consumers, in addition to a shrinkage of \$12,000,000 in the annual crop from insect ravages that could not be prevented.

Now, in view of the foregoing, is it or is it not, worth while for patriotic-minded men to do their very utmost continuously, to protect from foolish and brutal slaughter man's only allies in the insect war, the insect eating birds?—William T. Hornaday in "Wild Life Conservation."

Man's Superiority.

cently in the Inverness News we take the following extract, restraining from any comment:

"Our attention has been called frequently to the well known fact that scores of young women become teachers, nurses, housekeepers, clerks, etc., either singly or in societies, but whatever their efforts, as teachers they cannot replace men; as instructors and uplifters of men. Being superior to women, mentally and

physically, how can man be led to perfect in hood by his inferior? The female teacher can train boys through their twelfth year, but afterwards boys need the strong arm of a man. Why is it we have scores of young men loafing around, some leading irregular, or at least useless lives? There is a remedy for this evil. I vouch for it, there are scores of young men willing and able to render services as teachers right nobly, if they got a shadow of the advantages enjoyed by our young women.

CLEAN—No dust or flying ashes. Ash chutes guide all ashes into convenient pan.

McClary's Sunshine Furnace

No ash shovelling necessary. See the McClary dealer or write for booklet.
