

GROWING GIRLS NEED PINK PILLS

This Topic is Necessary for Their Proper Development and to Insure Health and Strength.

There are throughout Canada thousands and thousands of young girls who are in a condition approaching a decline. The complexion is pale or sallow, appetite rickety. A short walk or some upstairs, leaves them breathless and with a violently palpitating heart. Headaches and dizziness often add to their misery. Doctors call this anemia—which, in common English, means poor blood. There is just one sure and certain cure for this trouble—Dr. Williams' Pink Pills. These pills make new, rich, red blood, strengthen every nerve and bring a glow of health to pale faces. Do not waste time and money experimenting with other medicines. Do not delay treatment until you are in a hopeless decline. Get Dr. Williams' Pink Pills at once and see how speedily they will restore your health and strength. Here is the proof: Mrs. Joseph E. LePage, St. Jerome, Que., says: "My daughter Emilia began to lose her health at the age of thirteen years. She suffered from headaches and dizziness. Her appetite was poor. She was pale and apparently ill. She had no strength and could not study nor do any work. Doctors' medicine failed to cure her and I thought she was going into a decline. She was in this condition for several months when a neighbor advised the use of Dr. Williams' Pink Pills, and I decided to give them a trial. It was not long until an improvement was noticed and the continued use of this pills for a month or more completely cured her and she has since enjoyed the best of health. I feel sure that Dr. Williams' Pink Pills will cure any case of this kind."

Dr. Williams' Pink Pills will cure all troubles due to poor and watery blood, such as rheumatism, scalding, indigestion, neuralgia, sciatica, indigestion, and the ailments that make the lives of so many women miserable. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

MERELY OVERLOOKED.

The ways of the crank with an invention are unaccountable. Here is a recent actual example: A brisk, eager individual called on a capitalist for the purpose of inducing him in a device for discouraging burglars.

"I want to get the idea patented," he said, "and I haven't any money. I'm willing to go halves with any man that will give me the financial backing."

"My scheme is the best of health. You first make your doors and windows secure, so that they can't be opened at all from the outside. There are plenty of devices for doing that now-a-days. Make all of them tight and fast except one. Leave that one so that it will open easily. Then run a wire from that window to the head of your bed, where you have an alarm-bell. The burglar comes along, tries the doors and windows, and when he comes to that one he releases it. The alarm goes off and the burglar hears it and flees, or it wakes you up and you are ready for him. In either case it accomplishes your purpose."

"But," said the capitalist, "if you can make all the doors and windows fast except one, why not make that one secure, too, and thus keep the burglar out entirely?"

"I never thought of that!" replied the inventor, rubbing his jaw.

He didn't get the money.

BETTER FIFTEEN MINUTES ON A BIKE THAN A CYCLE OF CATHARTIC.

A few years ago some knowing prophets predicted the collapse of what they claimed had previously been little better than a fad, and was now, nothing less than a boom of a great health producer—the bicycle. Might just as well talk of a steamboat or trolley car boom, there would be about as much room for argument.

This will undoubtedly seem a pretty broad statement to many readers, but it is none the less true. In these progressive days of rapid transportation, the new craze is constantly chronicling ocean steamships and overland express trains. The bicycle has been dubbed "the poor man's automobile," and this phrase puts the whole story in a nutshell. When the wheel first scored its popularity, it was taken up largely by a pleasure-seeking public, who, after being amused, tossed the toy aside and turned their attention to some other form of indulgence. On the other hand, the steady and economical working man bought the wheel as an investment—it was something to bank on, and it checked the heavy car fare expenditure that was always a drain on the family pocket-book. Compared with the street car, the bicycle was just as quick in getting to the office in the morning and back home again at night.

Appreciating an asset of this kind, commercial men, laboring men, and even women in the various walks of mercantile life, have adopted the wheel as an absolute necessity. Transportation is the keynote of both personal and national success—the great problem has always been to conquer distance. The wheel, therefore, is a staple and dependable quantity. It has proved its value both in regard to reducing doctor's bills and street railway dividends. The Spring of 1908 will, no doubt, see a tremendous revival of the bicycle craze.

The Cycle is the Thing.

Others—If then the bicycle is King for a while.

He who speaks from experience leaves a lot of things unsaid.

NEWEST FRENCH DIRIGIBLE.

Propeller Blades on a Large Wheel at the Middle of the Balloon.

The newest dirigible balloon constructed in Paris is regarded as creating a revolution in the matter of aerial motive power. It is the joint product of M. Kistmann, a Dutch engineer, and Baron Edmond de Moray of Paris. Its special feature is that the entire driving apparatus is located in the body of the balloon at its centre.

All the dirigibles previously made had the propeller located under the basket. This had the effect of disturbing equilibrium; whether the fan was ahead or astern, it tended to force the balloon into a vertical position. When the propeller was attached to the car, as in the case of the Patrie and the Ville de Paris, there was an enormous loss of effect owing to the drag of the balloon proper. This had to be offset by great power in the propeller or else by enormous speed of revolution. The propeller of the Ville de Paris has blades more than ten yards long, which revolve at the rate of 140 turns a minute; the Patrie's propeller blades were only three and one-half yards in length, but they made 1,200 revolutions a minute. Both of these engines added enormously to the weight to be sustained in the air.

The Kistmann-Moray flying machine is built on the principle laid down by Col. Renard that the motive power, stably applied and held should all be as near as possible not only to the centre of gravity but also to the mass of the balloon. The apparatus consists of two separate cylinders of silk stretched over a steel framework and held together at intervals of about eight inches by a central core and also by strong bars of steel bent into the shape of the capital letter C and extending outward about twenty inches from the body.

In the interval between the two cylinders there is a wheel of the same diameter as the body revolving on its central axle and driven from a suspended motor. The propeller blades are attached to the rim of the wheel and revolve freely within the U-shaped spaces. The entire balloon is constructed for experimental purposes, weighs about 275 pounds, not counting the pilot. On a trial it developed a speed exceeding 36 miles an hour with the fans revolving 70 turns a minute.

This trial machine only had a capacity of about 450 cubic yards; but one already begun of 1,500. It will be driven by a 20-horse-power motor, weighing only 80 pounds, and it is expected that it will carry two persons 36 miles an hour in a wind not exceeding a speed of seven to eight yards a second. The cost of it is estimated at \$8,000 to \$10,000. The size will be much smaller than the Patrie, not exceeding 1,800 cubic feet to the Patrie's 3,300. It will take only half the number of army yards to transport its sections in camp, and it will need only six hours to inflate it to twelve needed for the Patrie. It will be able to remain thirty-six hours in the air.

A SAFE MEDICINE FOR ALL CHILDREN.

All so-called "soothing" syrups and most of the powders advertised to cure the ailments of babies and young children contain poisonous opiates, and an overdose may kill the child. Baby's Own Tablets are absolutely safe. You have the guarantee of a government analyst to the truth of the statement. Good for the new born babe and the well grown child. The Tablets positively cure such ailments as colic, sour stomach, indigestion, constipation, diarrhoea and teething troubles. They also cure simple fever, break up colds, prevent croup and destroy worms. Every mother who has used this medicine praises it highly. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Weak and Pale Women foolishly keep this way when by using Dr. Williams' Pink Pills they could very quickly recover their health and strength. Try it.

The girl asked the polite salesman if he had good cheese. "We have some lovely cheese," was the smiling answer. "You should not say lovely cheese," she corrected. "Why not?" It is, he declared. "Because with a boarding school dignity—lovely should be used to qualify only something that is alive."

"Well," he retorted, "I'll stick to lovely."

ITCH, MANGE, PRITIE SCRATCHES and every form of contagious itch in human or animal cured in 30 minutes by Wolff's Sanitary Lotion. It never fails. Sold by all druggists.

JOINING.

"What I want," said the young man, "is to get married and have a quiet and peaceful home of my own."

"Well," replied the man who knew, "sometimes it works that way, and sometimes it's like joining a debating society."

DIFFERENT FLAVORING.

Mr. Bacon—This milk tastes different this morning, dear. Have you been changing your milkman?

Mrs. Bacon—No; but understand his well went dry and he's been using water from the one next door.

Men should look for this Tag on Cheung Tobacco. It guarantees the high quality of Black Watch. The Big Black Plug.

FIRST AID.

Mr. Figgins, the head of the family, observing that the crows over his kitchen had become clogged by autumn leaves, climbed a tree standing near the house, with the intention of removing the obstruction. Just as he was about to scoop out a handful of the leaves the dead limb on which he was standing gave way, and he started to fall. Instinctively grasping at other limbs, and managing to get his legs round the trunk of the tree, he checked his fall, and hung there, head downward, holding on with all his might. "Sopha!" he yelled. "Come out here, quick!"

Mrs. Figgins, terribly alarmed, came hurrying out.

"O, Arthur!" she exclaimed. "How did that happen?"

"Never mind how it happened!" he shouted. "Get a chair!"

"The chair was brought."

"Now stand up on it!"

"Arthur, I'm not strong enough to help you down!"

"I'll get down all right," he panted, "as soon as I can get right end upward. What I want you to do is to take this fountain pen out of the holder in my vest pocket. It's leaking like anything."

ZAM-BUK CURES PILES.

This distressing complaint is successfully dealt with by the Zam-Buk treatment. The agony of Piles is excruciating, and every sufferer should keep in mind giving Zam-Buk a thorough trial. Zam-Buk subdues the pain, allays the inflammation and enables rest and comfort to come to the worn-out sufferer.

Mrs. E. Foxall of 75 Scott St., St. Thomas, Ont., writes: "I consider it my duty to write of the benefits derived from using Zam-Buk. For some months I was a constant sufferer from bleeding piles. I had used a great many remedies, but got no relief until I had tried Zam-Buk. It cured me and I have had no return of the trouble. Since my cure, I have advised others suffering with a similar complaint to use Zam-Buk, and in each instance have had satisfactory reports."

Zam-Buk also cures cuts, burns, scalds, head-ache, tooth-ache, rheumatism, abrasions, and all skin troubles and diseases. Of all stores and druggists 50 cents box or from Zam-Buk Co., Toronto, post-paid for price, 3 boxes for \$1.25.

"THE BETTER THE DAY, ETC."

"Tommy," said a young lady visitor, "why not come to our Sabbath school? Several of your little friends have joined us lately."

Tommy hesitated a moment. "Does a red-headed kid by the name of Jimmy Brown go to your school?"

"Yes, indeed," replied the new teacher.

"Well, then," replied Tommy, with an air of interest, "I'll be there next Sunday, you bet. I've been layin' for that kid for three weeks and never knew where to find him."

THE TRADERS' BANK OF CANADA.

Annual Statement Shows Solid Position.

The annual statement of the Traders' Bank just issued shows a year of successful operations and the strong position which this Bank stands. It is a privilege to be able to state that the usual allowances, amount to \$32,822.21, the shareholders a year's dividend at the rate of 7% has been paid, whilst the rest amount of the Bank has been increased by \$10,000. In the next of prosperous times the Bank's directors have not been unkind of the interests of its officers, having donated \$5,000 to the Guarantee Fund and like amount to the Pension Fund. The balance of \$3,364 has been carried forward to next year. The Capital Stock of this Bank now stands at \$4,352,310 and the Reserve Fund at \$2,000,000. The confidence of the public in the Traders' Bank is attested by the fact that the amount of deposits, the immediately available assets of this strong institution amounts to between six and seven million dollars. The whole statement of the Traders' Bank is well calculated to extend the confidence of the people of Canada in the institution and reflects the greatest credit in the management. It is plainly evident that the recently appointed general manager is adhering to the sound conservative principles which have characterized this Bank since it was established years ago.

'Tis a Marvellous Thing—When the cures effected by Dr. Thomas' Electric Oil are considered, the speedy and permanent relief it has brought to the suffering wherever it has been used, it can be regarded as a marvellous thing that so potent a medicine should result from the six simple ingredients which enter into its composition. A trial will convince the most sceptical of its healing virtues.

IT DIDN'T WORK.

A man who had been out of work for a long time suddenly recollected reading a story of a clerk who applied for a situation. He was courteously told that there was not a vacancy, and, as he turned away, he stooped and picked up a pin from the floor. The employer, struck by the action, called him back, and said: "You seem a careful sort of man. Call back to-morrow and we will give you a job."

Our hero therefore determined to copy this man's example, and next day saw him standing before a large manufacturer, having previously dropped a pin on the floor.

Getting the usual reply that there was no vacancy, he turned away, and then like the other man, stooped and picked up a pin. But the result was different.

"Here, Henry!" shouted the employer, to his servant, "see this fellow off the premises. A man who steals a pin would steal anything!"

VIRGIN OIL OF PINE

WILL BREAK UP A COLD IN 24 HOURS AND CURE ANY COUGH THAT IS CURABLE.

It is the only preparation of pine compounded from the active principles of forest trees that is intended for internal use. It permeates the whole system with the wholesome, healthful atmosphere of the pine woods, heating any irritation of the mucous surface that may be present. Its action on the kidneys is most beneficial, affording speedy relief in cases of rheumatism due to uric acid in the system.

Put up for dispensing through druggists only in 1/2 oz. vials, each vial securely sealed in a round wooden case. Be sure to get the genuine Virgin Oil of Pine compound pure, prepared only by Leach Chemical Co., Cincinnati, O.

Properties, uses and directions with every vial.

ORIGINS OF TYPHOID.

Dr. Scott, the medical health officer of the County of Surrey, has made a special report on the prevalence of typhoid in that district of England. His conclusions are interesting. He says that it is doubtful whether even 10 per cent. of the cases can be attributed to the drinking of polluted or infected water. He believes that polluted and infected foods are a much more frequent source of typhoid illness than is generally supposed. He refers to cases which it is impossible to connect with preceding cases, and suggests the possibility of origin from other bacilli than those which are regarded as the inviolable specific causes of typhoid. Recent investigations in Germany show that patients may harbor typhoid bacilli months after recovery from illness, and that persons in good health may be the hosts of the organism.

DON'T OVERDRAW YOUR BANK ACCOUNT.

To overdraw your bank account, whether mentally or physically, is more outside waste tissue, overdraw material. Repair and rejuvenate your rheumatic system by using the famous Mineral Salt Syringes of the "St. Catharines Well" of J. D. McDonald, Bank. A postal card to J. D. McDonald, Bank, Toronto, will bring you an illustrated descriptive matter.

"I see by your sign that you are a disappointed man."

"What do you dispense with?" "With accuracy, sir," "I was afraid you did."

Bickle's Anti-Consumptive Syrup is the result of expert chemical experiments, undertaken to discover a preventive of inflammation of the lungs and consumption, by destroying the germs that develop these diseases, and fill the world with pitiable subjects hopelessly stricken. The use of this Syrup will prevent the dire consequences of neglected colds. A trial, which costs only 25 cents, will convince you that this is correct.

Professor Morselli says that all Tubercles are more given to suicide than sane ones. Perhaps they grow tired of living so long.

We make the emphatic statement that the D. & L. Menth-I-Plaster will do more to relieve neuralgia, rheumatism, tooth-ache, and all other pains, than any other plaster. 25c. tin and \$1.00. All druggists.

When it comes to getting his dues, his satanic majesty never gets left.

They Cleanse the System Thoroughly. Parmelee's Vegetable Pills clear the stomach and bowels of biliousness, cause the excretory vessels to throw off impurities from the blood into the bowels and expel the deleterious mass of the body. They do this without pain or inconvenience to the patient, who speedily realizes their good offices as soon as they begin to take effect. They have strong recommendations from all kinds of people.

Mrs. Wildman—"I can tell you this, Mr. Wildman: if you continue in your present life of extravagance you'll surely pay for it some day."

"I wish, my dear, that my creditors had the same faith in my good intentions."

That Tormenting Cold that made you wretched will not come back if you take Holloway's Corn Cure.

As the result of the intervention of Sir Arthur MacDonnell, strike of workers employed by the Dublin Gas Company was settled.

Is there anything more annoying than having your corn stepped upon? Is there anything more delightful than getting rid of it? Holloway's Corn Cure will do it. Try it and be convinced.

AN IMPORTANT DISTINCTION.

"Don't be afraid," said the woman on the front step, "that dog likes strangers."

"Yes, madam," answered Meandering Mike, "I do not question your assurance that he would like me. But do you refer to him as a seeker for companionship or as an epicure?"

DODD'S KIDNEY PILLS
CURES RHEUMATISM, BRUISES, DISBACK, GRAVEL, NEURALGIA, MIGRAINE, HEADACHE, BACKACHE, STIFFNESS, AND ALL AFFECTIONS OF THE URINARY TRACT.

ISSUE NO 6-08.

IN A SUBMARINE COLLISION.

Minutes of Terror for the Crew of the French Diver Souffleur.

A member of the crew of the Souffleur, the French submarine which was damaged in a collision under water with another craft, the Bonite, a few weeks ago, gives a thrilling description of the situation during the minutes when every man thought death was inevitable. The submarines had been manoeuvring outside Trouan harbor when the accident happened.

The Souffleur was at a depth of 25 feet and was preparing to fire a blank torpedo at the hull of the battleship lauroquibry, when suddenly a black shadow loomed up through the green water.

"It came upon us with a rush," says the narrator, "Lieut. Rollinat realized the danger on the instant and shouted the order to sink. The hope was that the other boat would pass over us; but it was too late. The Bonite struck us with full force."

"All the men were dazed around and the general were seriously injured. The greatest disaster was the capsizing of the wet batteries of our electric accumulators. The sulphuric acid was spilled, and it attacked the metal plates the battery became filled with stifling vapors. "Some of the men felt almost impossible, and yet that new danger was threatening us. It was only a question of time when the acid would cut its way through the plates and let in the sea."

"When we got some of the apparatus to work and attempted to rise we were again in peril of collision. The Bonite lay directly above us. Minutes passed without a word, the men clenching their hands till the nails dug into their palms to control their emotions.

"At last Rollinat gave the order, 'Let go the weights.' The vessel began rising slowly at first and then faster. Men looked at the pool of acid and felt as if the motion upward was a race with its action, a race with life as the prize.

"Then came the slight shock like that of striking a cushion which showed that the boat had reached the surface. A rush for the hatch followed, and the next moment the men were tumbling out into the light and air that they never expected to see again."

"Every man of the crew, it may be added, volunteered to go down again with the Souffleur when she was repaired."

They Advertise Themselves. Immediately they were offered to the public, Parmelee's Vegetable Pills became popular because of the good report they made for themselves. That reputation has grown, and they now rank among the first medicines for use in attacks of dyspepsia and biliousness, complaints of the liver and kidneys, rheumatism, fever and ague and the innumerable complications to which these ailments give rise.

Stranger—"Madam, a boy who I am informed is your son, has just thrown a stone at me, causing a very painful wound. What are you going to do about it?" Mother—"I don't know. Have you tried arsenic?"

Scratching is foolish; it only makes a bad matter worse. Weaver's Corns and other pains, means the salt of ammonia and other salts. Why not buy a bottle to-day?

"To be quite candid, Sir, that fellow you scolded so gone on with the most unspeakable little ass in the room!" "Georgel! You forget yourself!"

Worms cause feverishness, moaning, and restlessness during sleep. Mother Graves' Worm Exterminator is pleasant, sure and effectual. If your druggist has none in stock, get him to procure it for you.

"You've got a fellow in there that won't wait on me again, not much," said an irate customer, as he emerged from the dining-room and slapped his money down on the pay desk. "I'm not stung," continued the customer, "and I don't mind giving tips; but when a waiter hangs round till a fellow has nearly finished eating and whistles, 'Do not forget me,' I think it is about time something was done."

Miss Blonlock—"How dare you tell people my hair is bleached? You know it is false."

Miss Ravenwing—"Yes, dear, I know it is. I told them it was bleached before you got it."

CHRONIC CATARRH RELIEVED BY PE-RU NA.

MRS. F. CARR.

Mrs. F. Carr, Vineland, Ont., writes: "For several years I was afflicted with catarrh, which made life a burden. The coughing and hacking which accompanied the disease was terrible. The complaint finally extended to the stomach and I was in a wretched condition. I tried different remedies and the best professional treatment all in vain. Finally, as a last resort, I tried Pe-Ru Na upon the recommendation of my sister in Hamilton, and in a few days I could see steady improvement and after using four bottles of that precious medicine I was feeling well again. My old trouble being completely a thing of the past."

"To-day I would not take one thousand dollars for what this grand medicine has done for me!"

Pe-Ru Na is a universally recognized catarrh remedy. It will relieve catarrh in its most obstinate form.
