The Subscriber of the control several instances. Let us take some ed as entry clerks, shipping clerks, buyer

latter part of January, and her ordinary food had been timothy and clover hay, with one peck of carrots daily. The work of improvement began by

increasing the food ration by the addition of a pint of oatmeal and three quarts of bran per day, which was gradually increased during the first month to six quarts of bran; the second month to one quart of oil quarts of corn meal, which was coninued until grass came, when the raion was reduced to one pint of oil meal, and four quarts of bran per day. This formed the daily ratio through the summer.'

Such experiments have considerable value, not only because they show something of what can be done with the common cow, but because Nothing on lay like Sher they serve to encourage the average 15 6 -19 2 farmer to give his common or native cow some of the good care and abundant food he would be very likely to bestow upon highly bred and bighpriced stock. Upon the whole, th scrub or native cow deserves fa more credit than she has received for the treatment which has been a corded to her has certainly not bee such as would encourage any animal in well-doing

WASTEFUL WINTERING.

Much food is thrown away every winter in the common management of stock. I do not mean the fodder actually wasted in farmyard or stable, but that which is fed, especially to vounger animals. For instance, supoose I feed four calves and six year ings all winter and in the spring they are no larger than in the pr perceptible immediately after commenc- vious fall, how much of the fodder they consumed is wasted? I will Oil emulsified with the Hypophosphites have a p le of manure proportionate is most remarkable for its healing, o the todder eaten, but it will not be worth more than the cost of the lahor in taking care of the stock. In order to realize any gain on these animals, I must wait for the extra from drowning last week. It is a cold growth they may make in summer day when a milkman can't get something pasture. Tois, undoubtedly, is the actual result of wintering a large proportion of the young cattle in this country. They are fed enough to

ent she chased her husband half a hold their own, that is, not to fall away much. Brethren, there is no profit in that kind of management, as von can all s e. When an animal is fed enough to maintain life and locomotion, and this of course, is necessary, such add tion-I have used Minard's Liniment for al food as it may have will naturally. pronchitis and asthma and it has cured if it isn't required to keep it from me, I believe it the best .- Mrs. ALLAN (reczing (which is not often the case) make growth, if a young one, and more flesh if it is matured or full-"I'se looked eroun' ober dis lan' a heap," said Uncle Opio Read, 'an' ef I'se eber found any use fur de grasshopper I doan know it; but den I doan know dat de grasshopper hab eber foun' any use such as straw or poor hay, the animal cannot consume more than enough to maintain vitality, hence "The Old Preserver" is what they call stronger or richer food is essential

Johnson's Anodyne Liniment way up in Maine where it is made. This name is well deserved, for it is the best liniment this, with calves by giving them each in the world. It will certainly prevent a quart a day of bran and oil meal, diphtheria, and will prevent croup and mixed, two parts of bran and one sthma instantly.—Western Paper.

Croup.—A Mother's Tribute.

"While in the country last winter my little boy, three years old, was taken ill with croup; it seemed as if he would die from strangulation. One of the family suggested the use of AYER'S CHERRY PECTORAL, a bottle of which was always kept in the house. This was tried in small and frequent doses, and to our delight in less than half an hour the little patient was breathing easily. The doctor said that the CHERRY PECTORAL had saved my darling's life. Can you wonder at our gratitude? Sincerely yours, Mrs. EMMA GEDNEY. C.
