King Humbert's Generosity.

King Humbert's Generosity. LONDON, Jan. 19.—A pretty story is going the rounds regarding King Humbert's wellknown generosity. It appears that, while out boar hunting the other day in the country to the north of Rome, he met some peasants who had formed a corporation among themselves to cultivate the land. pesants who had formed a corporation among themselves to cultivate the land. Becoming interested in their conversation, he made inquiries as to their conversation, he made inquiries as to their conversation, he made inquiries as to their condition, and, upon hearing that they needed a loan of 30,000 francs, gave them an order upon the spot for that amount, instructing them that the money, instead of being repaid to him, should be devoted to the foundation of a superannuation fund. The King is in the habit of sending the game that he shoots while out boar hunting as presents to the various ambassadors, ministers and dignitaries of his household. The other day he gave directions that a particularly fine boar which he had laid low with his rifle should be sent to the Turkish Ambassador, Mahmud Nedin Pasha, entirely forgetting that the latter was prohibited by his religion from eating the flesh of swine. His Excellency as the flesh of swine will be discourteous to refuse it, or to draw the attention of the King to the mistake that he had made. IMPORTED MERCHANDISE. Points of Harrison's Message

To Be Transmitted to Congress Regarding C. P. R. Shipments Through Foreign Goods.

New York, Jan. 20.—A Washington special says the President will send to Congress within a few days a special mescage in response to the Pitt resolution, sage in response to the House what New York, Jan. 20.—A Washington special says the President will send to Congress within a few days a special message in response to the Pitt resolution, calling upon him to inform the House what regulations are now in force concerning the transportation of imported merchandise in bond or duty paid, and products or manuactures of the United States from one port in the United States over Canadian territory to another port therein, and especially whether a careful inspection of such merchandise should not be had at the Canadian frontier upon departure or arrival. The correspondent claims to be able to state, upon high authority, that the message of President Harrison will point out clearly a plan by which the discrimination in favor of the Canadian Pacific Railway against the railroads of the United States may be effectively prevented without violation of the treaty of Washington. The President will declare that this Government has a right to require the inspection by its customs officers of goods received from a territory not contiguous at one American port, and sent by the high seas to another American port for transhipment. For example, the greater bulk of the silks, and teas from the Orient for importation into this country are delivered in bond at San Francisco and then sent by vessel to Columbia in the State of Washington, whence, under seal, they are carried over the Canadian Pacific road and thence across the border to New York or some other United States port.

Under the view which President Harrison will take such importations would hereafter receive examination by United States customs officials upon arrival at San Francisco and the duty upon then would be immediately levied and collected. The effect of this would be to throw their transportation across the continent into the control of American roads instead of the Canadian military line. These will be the chief points of the much heralded retaliatory message soon to be transmitted to Congress.
