Tricking the Mild-Mannered Chinaman. Special customs officers are on the trail of the Canadians suspected of assisting China-men across to the other side, and if they get men across to the other side, and if they get within reach of Uncle Sam's claws, it is said they will be hauled over the coals. A good story is told of a rick recently played upon the slant-eyed heathen by some Canucks. Six Chinamen made a bargain with two Canadians to ferry them across to Detroit. The ferrymen were to get \$300 for the job. They started after nightfall from a point above the Windsor waterworks and rowed partly across, then turned and headed down the river. When about a mile below Sandwich the Chinamen were landed on the Canadian side. They were told they were in the United States and safe from observation. They paid over the \$300 and the Canadians disappeared. History doesn't tell what became of the Chinamen.

It is a well-known fact that medical science has utterly falled to afford relief in rheumatic cases. We venture the assertion that although Electricity has only been in use as a remedial agent for a few years, it has cured more cases of Rheumatism than all other means combined. Some of our leading physicians, recognizing this fact, are availing themselves of this most potent of nature's forces.

Beware of imitations and the worthless cheap so-called Electric Belts advertised by some concerns and peddled through the country.
