Condition

was a student with an ardent ambiti

the present home of Rev. C. J. Freeman, B. A., Ph.D., the recent rector of St. Mark's Episcopal Church at Anaconda, Mont. Dur-ing the reform movement which has swept reform movement which has swept Boston, Dr. Freeman has been freque ly heard from through the various newsparatively recent date, he has exerted much nce, which has been increased by the fact that he was ten years ago on a commission appointed in England to investi-

in the old world, as well as to the rough pioneers in the mining towns of the Rocky ins, and his utterance as well as his writings have been in the line of progress and liberality, well-seasoned with practical common sense. Dr. Freeman has written this paper a letter which will be read with inter-

"Some five years since I found that deep study and excessive literary work, in accution to my ordinary ministerial duties, were
undermining my health. I detected that I
undermining my health. I detected that I
Fatness is not a desirable qualification for study and excessive literary work, in addiand study I suffered from a dull pain in the head and great weariness, and all thought and study became a trouble to me. I lost appetite, did not relish ordinary food after eating, suffering acute pains in the chest and There was soreness of the stomach. sour water, with most sickly and suffocating feeling in vomiting up such sour water.

At this time I consulted several physicians One said I was run down, another said I had onic indigestion; but this I do know, that with all the prescriptions which they gave had pains in the regions of my kidneys, a very sluggish liver, so much so that I was very much like a yellow man, was depressed in spirits, imagined all sorts of things and was daily becoming worse and felt that I should soon become a confirmed invalid if I did not soon understand my complaints. I followed the advice of physicians most severely, but with all I was completely unable to do my ministerial duty, and all I could possibly do was to rest and try to be thankful. After eighteen months' treatment I found I heart, and was almost afraid to walk across my room. Amid all this I was advised to only tying them up at feeding hours, but altake absolute rest from all mental work. In fact. I was already unable to take any duty for the reason that the feeling of complete prostration after the least exertion, precluded me from any doubt whatever, and it appeared to my mind that I was very near being a perfect wreck. As for taking absolute rest, be in any way stunted from either standing me from any doubt whatever, and it appearperfect wreck. As for taking absolute rest, I could not take more than I did unless it

was so absolute as to rest in the grave. Then long at a time. it would have been absolute enough. "It is now quite three years, since, in adendured, I found creeping upon me a peculiar observing dairyman power of locomotion seemed to be gone, and I likely to give much satisfaction to its owner, I was consoled with the information that it was partial paralysis. Whether it was or ten. not I do not know, but this I do know, I

age of 41 years. a ministerial friend came to see me. I was was something like old Job's comforter, although not quite. He had much regret and for a sick man. But the best thing he did say was this: "Did you ever see Pink Pills?" I said, "Who in the world is he?" He said, "Why do you not try Pink Pills?" He said good-bye very affectionately, so much so that

loubtless he thought it was the last farewell. Nevertheless, after thinking a little, I just came to the conclusion that I would make an innovation and see what Pink Pills would do. I looked at them, and I said can any good possibly come out of those little pink things? Anyway, I would see. I was suspicious of Pink Pills, and I remembered the old proverb: "Sospetto licentia fede," "suspicio is the passport to faith." So Pink Pills I and Pink Pills I swallowed. But one box of them did not cure me, nor did I feel any difference. But after I had taken nine or ten boxes of pills I was decidedly better. Yes, I was certainly improving, and

after eight months of Pink Pills I could get about. The numbness of the left limb was nearly gone, the pains in the head had entirely ceased, the appetite was better, I could enjoy food and I had a free, quiet action of the heart without palpitation. In fact, in twelve months I was a new creature, and to day I can stand and speak over two hours without a rest. I can perform all my

hours without a rest. I can perform all my public duties which devolve upon me, without fatigue, and do all the walking which I have to do, and am thankful for it. I can safely say I was never in a better state of health than I am to-day, and that I attribute it to the patient, persevering use of Dr. Williams' Pink Pills.

"I fully, cordially and strongly commend Dr. Williams' Pink Pills to all or any who suffer in a similar way, and feel sure that any one who adopts Pink Pills with perseverance and patience cannot find their expectations unrealized or their reasonable hopes blasted. But he will find that blessing which is the reward of a full trust in a true and reblasted. But he will find that blessing which is the reward of a full trust in a true and reliable remedy. I shall always wish and desire the greatest success for Dr. Williams Pink Pills and always cherish a deep feeling of gratitude to the friend who first said to me buy Pink Pills. I have tried them and know their true value, and am truly glad I did, for I have found them from a good experience, to do more than is actually claimed for them."

Very faithfully yours, C. J. FREEMAN, B.A., PH.D. Late rector of St. Mark's, Montana. Dr. Wiliams' Pink Pills contain, in a con-densed form, all the elements necessary to give a new life and richness to the blood and give a new life and richness to the blood and restore shattered nerves. They are an unfalling specific for such diseases as locomotor ataxis, partial paralysis, St. Vitus dance, sciatica, neuralgia, rheumatism, nervousness headache, the after effect of la grippe, palpitation of the heart, pale and sallow complexions, all forms of weakness either in male or female. Pink Pills are sold by all dealers, or will be sent post paid on receipt of price, (50 cents a box, or six boxes for \$2.50—they are never sold in bulk or by the 100) by addressing Dr. Williams' Medicine Company Brockville, Ont., or Schenectady, N. Y.

Agricultural.

Nothing short of experience will teach most dairymen the absolute necessity of car-ing properly and promptly for the young rs of their herds, which are soon to ly to their number and possibly to its pro

ducing value. Presuming that the calf has passed its first summer successfully, far into the autumn toward the approach of winter, yet too early to pass into winter quarters, its owner should see to it that the calf should have not only some grain but a shelter from the storms that abound at such seasons of the year. ble when young cattle are left to take chances

Especially should young heifers have every comfort that can be provided for them so that many evils that accompany exposure with insufficient food may be avoided. Stock that start into their winter quarters in good flesh and with their systems in fine plight, take much less feed to put them through a winter than those which are forced into cold weather, thin and poor from sheer starvation.

Now is the time to see that our heifers are fed at least once a day some kind of nutritious grain, such as bran into which a hand-

heifers intended for the dairy, especially for the first year of their growth. If fed food rich in nitrogenous substances, they can be induced to lay on flesh with but little fat added, pass the winter in excellent condition, and with not extravagant feeding. It is not business to starve any animal, much less those which are destined to become the producers of human food, hence our little groups of heifer calves during every month of the year, but particularly at this this period of the year will surely foretell what their appearance will be when turned

what their appearance will be when turned out in the spring on pasture.

The most important period of the life of a heifer is the last four months of gestation. If she is in the least neglected, it is not dif. ficult to foresee what the outcome will be. With her own wants to supply and those of his study of political economy by the aid of her offspring, she stands during those four other men's eyes; trained his memory until nonths on double duty, and should have he could carry complex tables of statistics every care that the hand of her owner can as easily as other mem could read the figsupply. Most dairy men endeavor to have ures from the printed page, and achieved the cows of their herds to come in, in late fall or early winter, so that on dry feed they and political leader. So complete was his can support a good flow of milk on the first half of their milking period, and when turned to pasture in April or May, will practically fresh again. The feeding of heifers at this time of the year is by no means attended with so much danger as older cows. Practically, heifers coming fresh soon should have a good feed of grain twice a day made I saw the mine of wealth lying around me up of three lbs. bran, two lbs. gluten, one lb. oil meal, with other ensilage or well cured corn stover and clover in such quantities as they will eat with a relish. The grain ra-tion mentioned should be divided in half, SHERIDANS and fed morning and evening. Some may feel afraid of milk fever, but very seldom have heifers with first calves been suscepti-

during latter part of gestation. The question often arises should heifers before calving be confined in the stable continually and tied in stalls. If at all possible, we always let our young heifers run in open stables much of the time,

ble to this dreaded disease that so often at-

tacks fatally the older cows fed too heavy

wavs avoid allowing them to be exposed to cold, raw winds and rain. Heifers need more exercise than grown cows. Their bones and muscles demand that

or lying in one position too much, and too It is not always possible to tell what a heifer will prove to be when she first begins dition to all the pains and penalties which I to show up towards maturity; although an numbness of the left limbs, and in fact could a worthless animal in his herd. An animal not walk about. If I tried to walk I had to that has time to watch what is going on drag the left foot along the ground. The about it when its feed lies before it, is never

Heifers while on pasture get what is essencould not walk about and I began to think
my second childhood had commenced at the ment; but when the reaction takes place of changing from green to dry feed greatest care should be taken to make the change as sick in bed and could hardly move, and he gradual as possible so that no sudden shock will take from her the power to still assimilate sufficient protien out of a winter ration seration which was a very poor balm as will continue the complete development of motherhood and milk to support the off-

> It will bear repeating here again that a preponderance of feed fed to incoming heif. rs should be strong in albumnoids as rations overcharged with carbohydrates necessarily rob her of power to store up life sustaining elements within to such extent as will satis fy her condition prior to the birth of her

spring when dropped.

Now that she has fulfilled the mission for which she was intended and is ready to perform not only the duty of mother to her calf, but to supply her owner with milk she should be fed at least one third stronger after calving than before, but nearer a balanced ration.

Where the younger members of our herds receive their just requirements and are se-lected with careful judgment, there is but little doubt that they will come through the most rigid winter strong and healthy,

A report from the New Jersey station gives the plan of an experiment for the im-provement of light lands by the use of crimson clover and cowpeas and a statement regarding the method of cultivating cowpeas on a large scale in New Jersey. Cowpeas, following crimson clover, yielded at the rate of 14,400 pounds of green material per acre. The vines contained 2,278, 1 pound of organic dry matter, 70.6 pounds of nitrogen, 17.3 pounds of phosphoric acid and 50.4 pounds of potash. The roots on one acre veighed only 1,080 pounds and contained 294.2 pounds of organic dry matter, 4.2 pounds of nitrogen, 1.5 pounds of phosphoric acid and 4.4 pounds of potash per acre. The roots and vines grown on an acre contained total of 34.8 pounds of nitrogen, 18.8 pounds of phosphoric acid and 54.8 pounds of potash. The nitrogen in the vines is equivalent to that contained in 487½ pounds of nitrate of soda and is valued at about \$11.

—"I am cured since taking Hood's Sarsa-parilla," is what many thousands are saying. It gives renewed vitality and vigor.

CURING HAMS.—The following receipt is a hundred years old: For curing pork, hams and beef, to one hundred pounds of meat use nine pounds salt (rock salt is the best but other kinds do very well) three pounds sugar, one pint molasses, three cunces saltpetre, one ounce soda, five to six gallons water. Put all together in cold water, beat slowly, till the salt is dissolved. Roil and skim well and cover meat when pickle is cold and keep meat under pickle five or six weeks. Then smoke according to taste. Each day for one week is a good average.

The designs, made by artists, are

Tell me, ye flowing streams
That smoothly glide along,
Is there one cherished place,
Where printer's meet no wrong?
The gentle brook replied,
In murmurs soft and low,
And winding on its verdant way,
It meekly answered "No." Thick draperies are only for winter. With the approach of spring they should be shaken, folded from the devastating moth, and stored in newspapers. Printer's ink is not a food craved by this persistent insect. From tapestry and brocade of the richer sorts, hangings range in beauty and value to the denim, burlaps and yachting cloths that

Tell me, ye murky clouds,
Now rising in the west,
Is there upon the globe
One spot by printers blest?
The flashing clouds outspoke
With an indignant glow,
A voice that filled the earth with awe
In thunders answered, "No." Tell me, hard-hearted man,
Withholding day by day,
Is there no honor in thy breast
The printer's bill to pay?
Unanswering turns he around—
How plain his actions show;
An uttered cath-capp'd sound is heard,
His actions answered, "No." oity dwellings or for any use in country cot-tages, denim is both serviceable and attrac-tive. The designs

A Printer's Consolation

Tell me ye winged winds,
That round my pathway lay,
Is there no place on earth
Where printers get their pay?
The whispering breeze went by—
With accents filled with woe,
A voice borne on the sorrowing in sadness answered, "No."

Tell me, ye gentle nymphs,
Who bless life's hours through,
Is there one sacred shrine
Where printer's get their due?
A mantling blush her cheek diffused,
Did tenfold grace impart,
A soft, responsive sigh replied,
"'Tis found in Woman's heart."

Tell me, angelic hosts,
Ye messengers of love,
Shall suffering printers here below
Have no redress above?
The angel band replied:
"To us is knowledge given—
Delinquents on the printer's books,
Can never enter Heaven!"

He Was All Right. He had a bland good-natured smile on his face as he walked up to a policeman on Wood-ward avenue the other day and said: "I wish you'd look at my vest and see if

it is all right." "I don't see anything wrong with your vest" replied the officer after a glance.

"Is it long enough?" "I think so." "Does it seem to work up?" 'No. What's the matter anyhow?' "Bin in town since seven o'clock this norning," said the man as he winked and

chuckled and smiled again, and ever since I good taste. The black Roman floss, Asiatic down my vest. Took me more'n four hour rope silk and Asiatic twisted embroidery are times before I understood. I was purty sure she was all right when I asked you to look. either run nor fade. This makes them most It's jest a way the fellers have, ain't it?" "Yes, just a way."

"They don't mean that my vest is too

to show signs of wear, and as every woman " No." is not blessed with a millionaire papa or rich "And they don't do it to hurt my feelings?" husband, a few furnishing up hints may not "Oh no!" come amiss. The careful woman who gets "Jest want to see if the old man has an double wear out of her clothes never throws

"That's all." "That's the way I took it, and every time a feller winked and grinned and told me to pull down my vest I winked and grinned and pulled her down—so. I jest bought six safety pins and am goin' to pin her down and keep her right there. See? Do I look like a man from Flyville? See any insects trying to light on my shoulders? He-he! Vest all right—fellers all right—old man having deadloads of fun, and going to keep her right up fur three days more.

Where He Drew the Line

The old man who sold windmills adjusted his chair at a new angle, crossed his feet on the railing of the balcony, locked his hands over the top of his head, and began:

'Curious fellows, those Wayback farmers are; droll chaps to deal with, too; cute and sharp at a bargain. Most of them know a good thing when they see it, so I took a good ter) dissolve one-half a compressed yeast cake in a half-cup of luke-warm water. Put into centre and pour in the yeast and one pint of sort helped me to a good laugh the other day,

warm milk. Stir thoroughly with a spoon; and I might as well pass it on. cover well and stand in a warm place until light. In the evening add two well-beaten who owned several fine farms, with prime eggs, one-half cup of sugar, one heaping teaorchards and meadows, barns and fences in sponful of salt, one generous half cup of butter and sweet lard mixed. Knead thor-fort.

"He listened closely while I expatiated on the excellence of our make of machines: then place over night. In the morning knead taking a fresh supply of Cavendish, he down, turn out on a bread-board and roll squared himself in his chair, with his hands out with a rolling-pin to one-half inch in his pockets, and held forth in this fashion: "'Waal, stranger,' he said, 'your machine spread melted butter over the tops; fold over | may be all right; but now see here. I settled here in the airly fifties, broke the trail for the last few miles, blazin' the trees as we came along. I had a fair start, good health, a yoke o' cattle, a cow, an axe, with one bit an' three coppers in my pocket. I built a log house with a shake ruff an' a puncheon floor, an' a cow-shed of popple poles ruffed with sed. I worked hard, up airly an' down late, clearin' up and by degrees, an' diggin' a livin' out o' the sile by main strength, an' no favors except the blessin' o' the Almighty. The Lord's been good to me. He's gi'n me housen an' barns; He's gi'n me horses an cattle; He's gi'n me sheep an' swine, an' feathered fowl o' many kinds. An' now,

pump water for 'em.' "
