NIGHT COUGH

You know it! It begins with a tickling, irritating sensation in your throat. You cough clear the throat. In a moment there it is again!

A minute's peace, then again you cough, and so on until you cough your throat sore, and by the time the cough is sufficiently allayed to permit you to sleep, you are thoroughly worn out. This kind of expense is particularly trying to old people.

Peps make this sort of thing quite unnecessary. Put a Peps pastille on your tongue and allow it to slowly dissolve. Healing fumigations are liberated, which mingle with the breath and are carried to the remotest parts of the passages and lungs, allaying the irritation and soothing the inflamed membranes, thus clearing the cough and making sleep possible.

Peps are also best for bronchitis, laryngitis, asthma, sore throat and colds. Try Peps at our expense. Send this advertisement, a 1c. stamp (for return postage to Peps Co., Toronto), and receive **FREE TRIAL PACKAGE**, All dealers, 50c. box.

PEP'S

D. A. R. ENTERPRISE

(Annapolis Spectator)
People who noticed that the Owl train arriving at night had lately been shunted onto the wharves and sliding instead of the wharves as formerly may wonder why but travelers have not fail to notice and appreciate the warm cars which they stepped in the early morning. This effort is made possible through connection with a steamship recently laid in a trench from the locomotive to the cars now stop, connections being made with the car later while the engine is getting up steam. This is one feature of the permanence of the owl service and the fact that the D. A. R. management believe in catering to the comforts of passengers.

OTHER TABLETS NOT ASPIRIN AT ALL

Only Tablets with "Bayer Cross" are Genuine Aspirin

If you don't see the "Bayer cross" on the tablets, you are not getting Aspirin—only an acid imitation. The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, prescribed by physician for over nineteen years and proved safe by millions for Headache, Neuralgia, Rheumatism, Lumbago, Neuritis, and for Pain generally. Made in Canada. Handy tin boxes of 12 tablets—also larger sized "Bayer" packages can be had at drug stores. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

109 years
is the proud record of success that belongs only to **JOHNSON'S Anodyne LINIMENT**
A doctor's famous prescription—Internal and external use—for Coughs, Colds, Sore Throat, Grippe, Bronchitis, Tonsillitis, Cramps, Chills, Sprains, Strains, etc. A safe, sure and satisfying anodyne that soothes, heats, and stops pain.

The Cause of Heart Trouble
Faulty digestion causes the generation of gases in the stomach, which irritate and press down on the heart and interfere with its regular action, causing faintness and pain. 15 to 30 drops of Mother Seigel's Curative Syrup after meals sets digestion right, which allows the heart to beat full and regular.

Irrigation Extends in the West

The year 1919 stands out in the agricultural history of Alberta and Saskatchewan as having proved beyond all doubt the enormous benefits to be derived from farm irrigation. In the drought which affected nearly the whole of these provinces, the south country within the irrigation belt not only produced excellent crops, but in many localities yields were harvested well in excess of the average of what are called good years.

On 145,500 acres in the Leebridge District, 96,200 tons of fodder crops and 3,775,000 bushels of grain have been grown to the total value of about \$6,750,000. Wheat was the largest crop produced, there being well over two million bushels. Other crops harvested included more than a million bushels of oats, nearly 400,000 tons of barley, 25,000 of flax, and 600,000 tons of alfalfa. In addition vegetables were grown and sold from this area.

As another example of what phenomenal yields may be taken from irrigated land, the case of a farmer at Brooks may be cited who on his farm produced a \$9,000 harvest of alfalfa seed. The yield was 14 bushels to the acre, which sold in the neighborhood at \$6. per bushel, and netted him a return of \$740 per acre.

In the large irrigation block of the Canadian Pacific Railway east of Calgary there are approximately 223,500 acres of irrigable land, and approximately 110,000 acres, making more than 20 per cent was in crop this year. On the basis of this year's average production on irrigated land the total area is capable of producing crops to the value of between thirty and thirty-five million dollars yearly with an average of over \$10 per year for each acre of irrigated land.

With such examples as these of the fruits of irrigation it is little wonder that the farmers of the dry belts of Alberta and Saskatchewan are clamoring for extensions to the existing systems of irrigation or the installation of new projects; or that the authorities should be devoting more time and attention to the furthering the schemes of irrigation.

A new project is already under way in the south area of Alberta which will take in the land in the Raymond, Sperling and Macrae districts, and the commissioner of irrigation, with headquarters in Calgary, has recently returned from a reconnaissance trip to the Buffalo Lake country, where he has been gathering information as to the feasibility of another projected scheme. This provides for the diversion of the flood waters of the North Saskatchewan River to irrigate the lands lying to the east and south of Buffalo Lake, all the way to the area between Vermilion and Saskatoon. The scheme, in outline, is to tap the North Saskatchewan River, at or near Rocky Mountain House, and by means of canals and ditches carry the water to lakes and depressions lying to the east, utilizing Buffalo Lake as the main reservoir.

The Alberta Provincial Government is also considering the establishment of an irrigation experimental farm at a point on the Saskatchewan River two miles north of Medicine Hat, covering a distance of twelve miles along the river adjoining the city. There are approximately 35,000 acres of land which can be brought under irrigation under this plan.

The finest feature of irrigated lands is that they can be trusted to produce at least good average crops every year, and indeed, so far from the quality of the land deteriorating, its tendency is to become more productive as the farmer learns by study and observation what quantities of water to use, and the best system of crop rotation.
