J. Richardson.	J. C. Garden.	E. B. Allen.
H. O. Eddrup.	F. Burrows.	T. G. Lewis.
C. L. Worth.		

Chairman,—

There is just one thing I would like to say and that is that the subscriptions have not been coming in as well as last year, and there are a number of subscriptions outstanding and it would help the Club a great deal if the members would pay up between now and the next meeting.

There is no other business to bring before the meeting but I would like to read you a letter received from the Minister of Education, the Hon. Dr. R. A. Pyne, acknowledging receipt of copy of Resolution urging the Government of the Province of Ontario to establish technical or industrial schools, in connection with the paper given by Mr. Clarkson W. James, which was adopted by the Club. The letter is as follows:

"I am in receipt of your letter enclosing copy of Resolution unanimously adopted by your Club in connection with the paper contributed by Mr. Clarkson W. James. I am much pleased to know you appreciate the matters brought before you."

The Minister of Education has gone to England and this is one of the subjects he is looking into very closely over there and I hope something may result from that.

I have very much pleasure in introducing Mr. G. D. Bly, Mechanical and Electrical Engineer, of the Monarch Supply Co., Toronto, who has kindly consented to give a paper on "Elementary Electricity."
