

# Syrup Cocillana Compound

## A COUGH SYRUP

THAT YOU CAN PRESCRIBE  
WITH CONFIDENCE.

Syrup Cocillana Compound is an efficient expectorant, indicated especially in the first stage of acute bronchitis with unusual irritation, and in chronic bronchitis when secretion is scanty and cough excessive. It is agreeable to the palate. It is attractive in appearance.

It does not lock up the secretions or constipate the bowels—in fact, it is slightly laxative in effect.

Syrup Cocillana Compound appeals especially to the prescription writer. Its name does not suggest its therapeutic uses. It is not known to the public as a "cough syrup." It is not "sold over the counter."
