

has signified his willingness, at the request of our Paris House, to supply physicians who are especially known through their work in connection with tuberculosis with a certain amount of his Tuberculosis Serum for clinical tests gratis. Such physicians, if they will communicate with us, we will immediately place in touch with Prof. Marmoreck through our Paris House.

We should be pleased to supply, for clinical experiments in your wards for contagious diseases, a sufficient amount of a new Scarlet Fever Serum for internal administration gratis.

Yours very truly,

PASTEUR VACCINE CO., LIMITED.

A VALUABLE THERAPEUTIC AGENT.

By C. P. ROBBINS, M.D., Louisville, Ky.,

Assistant to the Chair of Obstetrics and Gynecology and Chief of Clinic, Hospital College of Medicine.

One of the principal subjective symptoms of any disease, or disturbance of nature, is pain, and what the patients most often apply to us for, is the relief of this annoying and troublesome feature. If we can arrest this promptly, they are much more liable to trust us for the remedies which will effect a permanent cure. The everlasting resort to morphine is overcome in a great measure by the employment of reliable coal tar products. In cases of intermittent fever it is best to prescribe doses of one or two antikamnia tablets when the first chill comes on. I also find them most valuable in controlling headaches of a neuralgic origin. Rarely more than two tablets are necessary; the pain is promptly dissipated and the patient can go about as usual. The tablets of antikamnia and codeine, I consider the best and most useful in controlling severe pain. I have used them after surgical operations as a substitute for morphine, and find them eminently satisfactory. In controlling the severer forms of neuralgia they rank next to morphine itself.—*Medical Progress*.

BLOODLESS PHLEBOTOMY.

The Denver Chemical Company have issued a number of their journal devoted to the uses of Antiphlogistine in the treatment of inflammations. It states that Antiphlogistine, the original clay poultice, has been on the market for fifteen years, and has never been successfully imitated. The leading article in the issue for February is by Dr. A. Lübbert, of Hamburg, in which he reports a number of cases successfully treated by Antiphlogistine.
