

Barrett Specification Roofs

Made in Canada

Cost nothing to maintain

If you incorporate The Barrett Specification verbatim in your building plans, you then will get —

1. —a roof that has a lower cost per year of service than any other roof covering known.
2. —a roof that costs nothing to maintain.
- 3.—that is endorsed by the Underwriters' Laboratories and takes the base rate of insurance.
4. —a roof that will give twenty years or more of service.
5. —that is recognized as standard everywhere and that to-day covers a great many of the first class buildings in the country.

We should like to send every architect, engineer and owner of buildings a copy of the Underwriters' Laboratories Report on Barrett Specification Roofs and also a copy of The Barrett Specification. Address nearest office.

Special Note

We advise incorporating in plans the full wording of The Barrett Specification, in order to avoid any misunderstanding.

If any abbreviated form is desired, however, the following is suggested:

ROOFING—Shall be a Barrett Specification Roof laid as directed in printed Specification, revised August 15, 1911, using the materials specified and subject to the inspection requirement.
