

Dietetic Association is recommending that no one without a degree shall be admitted to its membership.

We are convinced that the future of our course depends on a more thorough advertisement of its merits. Would it not be possible to bring to the attention of first and second year students of McGill and other Universities, as well as applicants to Macdonald College, the splendid opportunities for graduates.

It is only our keen interest in the course which has prompted us to write to you.

Very respectfully yours,

Ruth B. Rooke.
