

Improved Gang Lath Machine

This machine is entirely self contained—does not require a counter-shaft and pulley to drive the feed from.

It has a solid iron frame. The feed rolls are milled from solid steel bar and case hardened. In fact the machine is constructed of the best material throughout. Carries four 12 inch saws and will do fully as much work as any other machine made for the same purpose.

I manufacture other lath machines much heavier than this cut shows, and lath bolters of various capacities.

I also have a full line of saw mill and shingle mill machinery, and can quote low figures, especially to cash customers.

Do You Need a Turbine?

Now is the best possible time for replacing your old, worn-out wheel with a new Turbine that will save Worry, save Time, and make Money for you. If you want a well built wheel, a wheel that will give you steady reliable power every day, a wheel that will save water, a wheel that will last you a lifetime, and that is sold at a reasonable price, then write us for catalogue and prices on the

Standard Leffel and Vulcan Turbines.

They are better developers to-day than ever before, and are growing in popularity, as our order books show.

We have now for distribution our new **SAW** and **SHINGLE MILL MACHINERY CATALOGUES**, with engravings and descriptions of our machines with their latest improvements. We will be glad to send you one on receipt of your address. You cannot buy a better Portable Mill than the "Lane Improved".
