THE BRITISH JOURNAL OF SURGERY. Under the Editorship of a large and experienced Editorial Committee of British Surgeons. *Chairman: Sir BENJAMIN G. A. MURPHY, F.R.C.S.* Editor: *W. HAY GUY, F.R.C.S.*

Established in 1843, our paper contains 1000 pages and 100 illustrations. It contains the most important and up-to-date accounts of contemporary surgery in the Empire, South America, France, Germany, Russia, and the United States. The general interest and reputation of the highest authority and the most up-to-date are a prominent feature.

The Journal is written by Surgeons and is the largest of any of the kind. It contains the most important and up-to-date accounts of contemporary surgery in the Empire, South America, France, Germany, Russia, and the United States. The general interest and reputation of the highest authority and the most up-to-date are a prominent feature.

Price 3s. 6d. With 10 Illustrations. 7 6 net. Postage 2d.

ON MODERN METHODS OF TREATING FRACTURES. By ERNEST W. HAY GUY, F.R.C.S., M.D., F.R.C.S. (Lond.) F.R.C.S. (Edg.). Surgeon, Third General Hospital, Guy's and St. Thomas' Hospitals, Lecturer on Surgery, Prebendary, etc.

This book embodies the experimental and clinical work of the author, including that which formed the subject of his Gower Lecture in 1914. An endeavour is made to examine critically the various methods of Fracture Treatment which have arisen since the discovery of the X-Ray. These are the Methods of Massage and Manipulation, Treatment by Extension, both by rubber plaster and by traction, Operative Treatment, and Bone Grafting.

In Two Volumes. Third English Impression. With more than 100 Illustrations and Plates. Sixteen Coloured Plates. Cloth, bound in 1 vol. 63 6 net, or 31 6 net each Volume. Postage 2d.

LEJARS' URGENT SURGERY. Translated by W. S. DICKIN, F.R.C.S. (Eng.), Surgeon North Riding Infirmary, Middlesbrough; Consulting Surgeon, Epsom Hospital; and ERNEST WALD, M.A., M.D., F.R.C.S.

VOL. I.—SECTIONS I.—Introductory. II.—The Head. III.—The Neck. IV.—The Chest. V.—The Spine. VI.—The Abdomen. Index.
VOL. II.—SECTIONS VII.—The Genito-Urinary Organs. VIII.—The Rectum and Anus. IX.—Strangulated Hernia. X.—The Extremities. Index.

This unique work is a model's key or even perhaps chiefly for the Surgeon, but will be found valuable to the conscientious General Practitioner, who must be able to deal with the emergencies demanding surgical attention. It is essential for Operating Surgeons who are unacquainted with the details of certain operations to compare these methods with their own.
