PREHISTORIC RELICS FOUND.

pakota Bad Lands, in search of geological information and specimens of prehistoric animal and plant life, a brisk trade in such articles has sprung up among the residents of this region. Several mastodon's teeth of extraordinary size have been unearthed within the past few weeks. Reports have also been received of the discovery of at least two fine skulls of the elothere, a species of giant hog, and of a number of the same animal in the vicinity of Pine Ridge. Bones of the matomynodon and hyrocodon—both animals of the rhinocoros family—have been found in considerable numbers, although as yet no confolete skeleton has been discovered in any one spot. Fragments of the titonothere, another member of the rhinocoros tribe, with two spreading horns similar to those of a cow, but situated well forward on the nose, are brought almost daily.

Lord Russell Leaves Washington

A Farmer's Loss.

Gorrie, Ont., Sept. 19.—At 3 o'clock this afternoon the stable, driving and hay house of W. H. Gregg, who lives a quarter of a mile from Gorrie, were destroyed by fire. The buildings contained a large quantity of hay, also machinery and a span of horses, all of which were consumed. The fire originated from a spark from steam threshers. The buildings are insured in the Howick Mutual Fire Insurance Company. Loss supposed to be about \$1000.

A novel point of law has been raised at the Sessions by Lawyer Duvernet in the case against Henry E. Veitch, who is charged with non-support of his wife. Mr. Duvernet pointed out to Judge McDougnil that the case would be a most tedious one, and would, if the evidence was proceeded with, occupy the attention of the court for several days, there being allegations of adultery by the defence, but he claimed that the defendant could not probably be tried in Canada, as his domicile was in the United States, and so, therefore, was the domicile of his wife. He also claimed that similar proceedings were now pending in the Buffalo courts, and that in any case the defendant was outside the jurisdiction of His Honor's court. Argument will be heard this week.

Many ladies in Toronto are complaining bitterly about the number of pedlars who knock at their doors daily. The man who acts as a gentleman is entitled to earn an honest living if he can, but there are a number of pedlars plying their trade in this city who ought to be suppressed. One in particular sells tinware. He has more cheek than an itherant beggar. This man rings the bell and, when the door is opened by the housewife or servant girl, he forces his way into the house. It is not long since he sent a young woman into hysterics by embracing her as soon as he had got inside the door. A threat of arrest caused him to move on. His language towards some women has been of the most villainous character. This cowardly fellow generally makes it certain that there are no men around before he becomes outrageous in his actions. The police ought to get after him and withdraw his license as a pedlar if he has one.

In the Children's Court Saturday, Ernie Scott and Reggle Rowentree were charged with stealing newspapers from the West End News Agency. On Friday 130 Worlds were stolen, and on Saturday 200 Worlds and parcels of The Globe and Mall and Empire. The boy's were remanded till Wednesday.

INFLAMMATORY RHEUMATISM-Mr. INFLAMMATORY RHEUMATISM—Mr. S. Ackerman, commercial traveler, Belleville, writes: "Some years ago I used I Dr. Thomas Electric Oil for Inflammatory Rheumatism, and three bottles effected a complete cure. I was the whole of one summer unable to move without crutches, and every movement caused excruciating pains. I am now out on the road and exposed to all kinds of weather, but have never been troubled with rheumatism since. I, however, keep a bottle of Dr. Thomas Oil on hand, and I always recommend it to others, as it did so much for me.

On Saturday Laura Fenton attempted to jump from a moving train at the Union Station. Three days ago she checked her trunk for Brockville, and has since been acting strangely at the depot. She was arrested, and the Magistrate remanded her to find out if she is insane.

Mrs. Thos. Errett, Port Burwell, Ont., says: "I had been weak and miserable two years. I took Miller's Compound Iron Pills and never felt better than

days they have been covering. When the bank statement appeared, showing an increase in reserves of \$1.680,000, the trading element sold stocks, claiming that a larger increase was to be expected. The bank statement would indicate that the drain on New York banks is about over, and The Financial Chronicle estimates that between \$5,000,000 and \$6,000,000 was sent to the South and West, against which the banks received nearly \$6,000,000 from gold importers and treasury operations. Money continues firm at 6 to 7 per cent, and it is generally thought that considerable amounts are withheld from the market so as to facilitate gold simportations. Discounts are hardening at Paris, which may throw the drain of gold back upon Loudon. The treasury now has about \$117,500,000 in gold. A small bank in Troy falled to-day. Bank clearings throughout the country decreased 17 per cent, this week. Twenty railroads for the second week of September show a gross decrease of 3 per cent. Trade reports indicate a better feeling and more confidence, but little tangible improvement. There has, however, been some speculative buying of commodities, while other features are the reopening of some iron works, the continued heavy grain export and the importations of gold.

There has been a slight sag in the price of sliver builton since the date of the Chicago convention. Corn and oats were steady and firm in sympathy with wheat.

Provisions—The feeling in a general way was comparatively steady and the changes in prices were slight, outside orders were limited and local trading moderate. For eign advices indicate a steady feeling in that quarter.

Melntyre & Wardwell (John J. Dixon) say. Cables this morning again showed surprising strength, and this is the real factor that has given us the advance we have had this week. There is probably more wheat under contract for shipment from Atlantic ports to-day than the trade has seen in years. Of all the wheat that New York has bought from interior markets, we do not believe there is much over 1,000,000 bushels left unsold to exporters or millers. Primary markets report an excellent demand from interior mills and the mills report they are naving the best demand for flour they have had for a long time. The world's shipments, which are fairly large, come almost entirely from Russia and the Danublan ports and America. The European shipments are mostly taken care of by the Continent, while England seems to be able to handle anything we may have to offer. it seems almost a certainty that we did not raise any more white wheat that is the wheat that England can always use. There is not much likelihood of our running into a rampant bould market, for the r
